# TABLE OF CONTENTS

|                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Reduction of current consumption in servomotors through the analysis of jerk profile of the motion dynamics .....                                                 | 1  |
| <i>Gonzalez Villagomez Esau, Rodriguez Donate Carlos, Gonzalez Villagomez Jacob, Calderon Uribe Uriel</i>                                                         |    |
| Machine learning application for prediction of peptides with antiarboviral therapeutic potential .....                                                            | 5  |
| <i>Víctor Hermosilla-Mechetti, Víctor Martínez, Helena Gomez-Adorno, Diego P. Pinto-Roa, José Colbes</i>                                                          |    |
| Impact of Data Preprocessing on Type 2 Diabetes Classification Using Artificial Neural Networks .....                                                             | 11 |
| <i>José Diego Gutierrez-Medina, Antony Morales-Cervantes, Marco Vinicio Chavez-Baez</i>                                                                           |    |
| Experimental Verification of the LVC Converter under Reduced Ripple Operation .....                                                                               | 19 |
| <i>Julio Cesar Hernandez-Ochoa, Julio Cesar Rosas-Caro, Jesus Elias Valdez-Resendiz<br/>Antonio Valderrabano-Gonzalez, Daniel Guillen, Adolfo R. López</i>        |    |
| Intelligent Passivity-Based Control of Boost Converters with Fuzzy-Tuned Damping Injection .....                                                                  | 25 |
| <i>Mario Ivan Nava-Bustamante, José Luis Meza-Medina, Rodrigo Loera-Palomo</i>                                                                                    |    |
| Practical Evaluation of an Optimized LES-QB Converter: Implementation and Experimentation .....                                                                   | 31 |
| <i>Jose Solís-Rodriguez, Julio Cesar Rosas-Caro, Jesus Elias Valdez-Resendiz, Hector R. Robles-Campos<br/>Daniel Guillen, Adolfo R. López</i>                     |    |
| A watermark-based defense mechanism approach against LiDAR point insertion attacks in autonomous vehicles .....                                                   | 37 |
| <i>Sergio Alberto Salguero-Luna, Kelsey Alejandra Ramírez-Gutiérrez</i>                                                                                           |    |
| Hardware-In-the-Loop Simulation Applied to an Electric Vehicle Powertrain .....                                                                                   | 43 |
| <i>N. A. López Navarrete, J. J. Rodríguez Rivas, O. Carranza Castillo, F. Pérez Carmona, R. Ortega Gonzalez<br/>N. L. Diaz Aldana, C. L. Trujillo Rodríguez</i>   |    |
| Grid-Forming and BESS: Review of Advances and Challenges .....                                                                                                    | 49 |
| <i>J. Galvez-García, V. Torres-García, J. R. Rodríguez, H. F. Ruíz-Paredes</i>                                                                                    |    |
| Supercapacitor-Based Energy Storage System Using Two- and Three-Level Converter Topologies .....                                                                  | 57 |
| <i>Andrea Xiomara Monroy Zalapa, Daniela Bobadilla Manjarrez, José Luis Monroy-Morales<br/>Rafael Peña-Alzola, David Campos-Gaona</i>                             |    |
| Computational Modeling of Sodium-Ion Battery Cells for Stationary Microgrid Applications .....                                                                    | 62 |
| <i>Miguel Constantino Barajas, Vicente Vengas Rebollar, Edgar L. Moreno-Goytia<br/>Angel Constantino Barajas, Jose Eduardo Avalos Arcos, Reynaldo Perez Lemus</i> |    |
| Modeling and Nonlinear Control of a Buck Converter Using Lyapunov Functions .....                                                                                 | 66 |
| <i>Cesar A. Hernández-Jacobo, Rodrigo Loera-Palomo, Francisco S. Sellschopp-Sánchez<br/>Carlos Álvarez-Macías, Jorge A. Morales-Saldaña</i>                       |    |
| An Off-Lattice Parallel Algorithm for Tumor Immunosurveillance Based on Cess-Finley Model .....                                                                   | 72 |
| <i>Eduardo R. Rodriguez-Gallegos, Julio C. Perez-Sansalvador, Gustavo Rodriguez-Gomez<br/>Saul E. Pomares-Hernandez</i>                                           |    |
| Oscillation Source Location Assisted by the O-splines Filter .....                                                                                                | 78 |
| <i>Reynaldo Dominguez-Navarrete, A. Zamora, Jose Ortiz-Bejar, M.R.A. Paternina</i>                                                                                |    |

|                                                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Grid-Feeding to a Grid-Forming Converter with Photovoltaic Energy in an Islanded AC Microgrid .....                                                                                                                    | 84  |
| <i>A. Valle L. Obed, Perez R. Javier, D. Flores N. Darcy, A. Beristain J. Jose, de J. Teran Gonzalez G. Raul A. L. Gonzalez S. Ana</i>                                                                                 |     |
| Block-Level Validation of an Analog Front End for sEMG Signal Conditioning in Myoelectric Control .....                                                                                                                | 90  |
| <i>Samantha Guadalupe Páez-Monreal, Mireya Moreno-Lucio, Gilberto Jiménez-Díaz<br/>Verónica Libertad Medina-Llamas, Celina Lizet Castañeda-Miranda, Ma. Del Rosario Martínez Blanco<br/>Luis Octavio Solís-Sánchez</i> |     |
| Per-Unit Energy Function Reshaping for Zone III Pitchless DFIG Control .....                                                                                                                                           | 96  |
| <i>Daniel Alvarado, Alexander G. Loukianov, J.M. Cañedo</i>                                                                                                                                                            |     |
| Hybrid Harmonic State Estimation in Power Systems Using Time–Frequency Domain Integration .....                                                                                                                        | 102 |
| <i>Andrés Suárez Vieyra, Ismael Molina Moreno, Marco Vinicio Chávez Báez, Javier Correa Gomez</i>                                                                                                                      |     |
| Multimodal Urban Traffic Monitoring Using Artificial Vision and Crowdsourced Data .....                                                                                                                                | 109 |
| <i>Bernardo Hernández-Sánchez, Ilse Cervantes, Juan Terven, Cesar J. Montiel Moctezuma</i>                                                                                                                             |     |
| Fuzzy Logic Controller Optimized by Bear Smell Search Algorithm for a Two-Level Three-Phase<br>Inverter .....                                                                                                          | 115 |
| <i>Jesús Salazar De León, Cesar A. Hernández-Jacobo, Juan Felipe Guerra Cano, Ramon Garcia-Hernandez</i>                                                                                                               |     |
| Scalable Software Architecture for Sensory Analysis Data Management for Research Purposes .....                                                                                                                        | 121 |
| <i>Juan Carlos Avilés Díaz, Maria S. Avila-Garcia, Marco Bianchetti, María Elena Sosa Morales<br/>Roberto Rojas Laguna</i>                                                                                             |     |
| Evaluation of Strategies for Inertial Control in Wind Turbines and Their Effect on Blade Dynamics .....                                                                                                                | 127 |
| <i>Brian Loza, Luis I. Minchala, Josué Pacheco-Chérrez</i>                                                                                                                                                             |     |
| AIoT Architecture for Object Identification and Counting Using Transfer Learning .....                                                                                                                                 | 133 |
| <i>César Manuel Hernández Mendoza, Juan Pablo Serrano Rubio, Citlali García Hernández<br/>Maricela Aguilar Almanza</i>                                                                                                 |     |
| Transformer-Based Network Traffic Flow Embeddings for Unsupervised Anomaly Detection in IoMT<br>environments .....                                                                                                     | 139 |
| <i>Mireya Lucia Hernandez-Jaimes, Alfonso Martinez-Cruz, Kelsey Alejandra Ramírez-Gutiérrez</i>                                                                                                                        |     |
| Glaucoma Classification Using Fundus Images with a Pretrained EfficientNet Model .....                                                                                                                                 | 145 |
| <i>Carlos Medina-Betancourt, Luis M. Ledesma-Carrillo, Eduardo Cabal-Yépez, Misael López-Ramírez<br/>Ruth I. Mata-Chávez, Geovanni Hernández-Gómez</i>                                                                 |     |
| A Comparative Study of Tuning Methods for PID and Fuzzy Controllers Applied to a Three-Phase<br>Induction Motor .....                                                                                                  | 151 |
| <i>Diego Armando Zepeda Ornelas, Salvador Ramírez Zavala, Juan Anzures Marín, Vicente Torres García</i>                                                                                                                |     |
| Rate of Change of Frequency-Based Load Shedding Scheme for Enhanced Frequency Stability .....                                                                                                                          | 157 |
| <i>Yair Leonardo Cirilo Díaz, David Sebastián Baltazar</i>                                                                                                                                                             |     |
| Comparative Analysis of Power-line Denoising Techniques in Electromyographic Signals .....                                                                                                                             | 164 |
