Table of Contents

Message from the General Chairs	xix
Message from the Program Chairs	xx
Organizing Committee	xxi
Program Committee	xxii

2025 IEEE 10th International Conference on Data Science in Cyberspace

Enhancing Vulnerability Mining with Large Language Model	1
<i>Jinghua Lian (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Yuyu He (Guangzhou University, China), Yanli Chen (Guangzhou University, China; Key Laboratory Ministry of Industry and Information Technology, China; Key Laboratory of Cyberspace Security, Ministry of Education, China), Youyu Liu (Guangzhou University, China), and Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China)</i>	
Unlocking LLM Potential: Critical Breakthroughs and Frontier Explorations in Retrieval-Augmented Generation	9
<i>Youyu Liu (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Yanli Chen (Guangzhou University, China), Yuyu He (Guangzhou University, China), Jinghua Lian (Guangzhou University, China; Peng Cheng Laboratory, Shenzhen, China; Quanzhou Normal University, China), and Hui Lu (Guangzhou University, China)</i>	
The Dawn of Intelligent Fuzzing: Exploring the Application of Large Language Models in Fuzzing	17
<i>Zhourui Zhang (Guangzhou University, China), Zefeng Lu (Guangzhou University, China), Yanli Chen (Guangzhou University, China), Yuyu He (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China), and Jinghang Wu (Guangzhou University, China)</i>	
Long Text Knowledge Graph Extraction Technology Based on Large Models	25
<i>Yang Hu (National University of Defense Technology, China), Yibin Fu (National University of Defense Technology, China), Zhaoyun Ding (National University of Defense Technology, China), and MingRui Lao (National University of Defense Technology, China)</i>	

Malicious Triggering False Data Injection Attack that Increases Smart Grid Scheduling Cost.....	33
<i>Hezhong Pan (Jinan University, China), Fen Yuan (Jinan University, China), Peiyi Han (Harbin Institute of Technology Shenzhen, China), Shaoming Duan (Pengcheng Laboratory, China), Chuanyi Liu (Harbin Institute of Technology Shenzhen, China), Junbin Fang (Jinan University, China), and Bin Zhou (Jinan University, China)</i>	
A Marriage Law Question-Answering System Based On Knowledge Graph	41
<i>Yue Zhang (National University of Defense Technology, China), Weijie Deng (National University of Defense Technology, China), and Zhaoyun Ding (National University of Defense Technology, China)</i>	
Temporal Knowledge Graph Completion Enhanced by Spatio-Temporal Hypergraph and Contrastive Learning	46
<i>Yashen Wang (Artificial Intelligence Institute of CETC, China), Xiaoling Zhu (CETC Academy of Electronics and Information Technology Group Co., Ltd., China), Miao Zhuang (Academy of Military Sciences, China), and Xiaowan Li (Artificial Intelligence Institute of CETC, China)</i>	
Path-Based Explanation for Temporal Knowledge Graph Completion	54
<i>Ziyi Chen (National University of Defense Technology, China), Chenxi Zhu (National University of Defense Technology, China), Ye Wang (National University of Defense Technology, China), and Aiping Li (National University of Defense Technology, China)</i>	
Document-Level Relation Extraction from Macro-Micro Perspective	62
<i>Xin Wen (Beijing University of Posts and Telecommunications, China; China Electronics Corporation, China), Yixuan Huo (Beijing University of Posts and Telecommunications, China), Jinqiao Shi (Beijing University of Posts and Telecommunications, China), Majing Su (The 6th Research Institute of China Electronics Corporation, China), Jiapeng Zhao (Beijing University of Posts and Telecommunications, China; Zhejiang University, China), Weihao Li (The 6th Research Institute of China Electronics Corporation, China), Jinxin Zuo (Beijing University of Posts and Telecommunications, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)</i>	
Deep Learning for Adaptive Intrusion Detection in Open-World: A Survey	70
<i>Ruofei Wang (Institute of Systems Engineering, China), Honglin Zhuang (Institute of Systems Engineering, China), Huayang Cao (Institute of Systems Engineering, China), and Yaning Zheng (Institute of Systems Engineering, China)</i>	
Temporal Knowledge Graph Reasoning: A Survey of Representation Learning, Rule-Based Learning, and Neural-Symbolic Hybrid Methods	78
<i>Ziwen Wang (Shandong University, China) and Aiping Li (National University of Defense Technology, China)</i>	

Reverse Engineering of Private Protocols: Methods, Tools, Challenges and Future Directions.....	86
<i>Ke Shi (Guangzhou University, China), Xingchi Chen (Guangzhou University, China), Yuyu He (Guangzhou University, China), Yanli Chen (Guangzhou University, China; Key Laboratory Ministry of Industry and Information Technology, China; Key Laboratory of Cyberspace Security, Ministry of Education, China), Zhigang Wang (Guangzhou University, China), and Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China)</i>	
An Arms Race in the Inbox: A Systematic Review of Phishing Generation and the Rise of LLMs.....	94
<i>Zhouyang Liu (Guangzhou University, China), Yanli Chen (Guangzhou University, China; Key Laboratory Ministry of Industry and Information Technology, China), Yuyu He (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China), Xinge Zhang (Guangzhou University, China), and Jinghang Wu (Guangzhou University, China)</i>	
Huntrace: Graph Neural Network Based apt Intrusion Detection on Homogeneous Provenance Graphs	102
<i>Yijing Zhu (Guangzhou University), Jianye Yang (Guangzhou University; PengCheng Laboratory), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen); PengCheng Laboratory)</i>	
WOVE-HM:A Robust Weighted Soft-Voting Ensemble Method for Heterogeneous Models in Intrusion Detection	110
<i>Rongxin Hu (Guangzhou University, China), Zhiqiang Zhang (Peng Cheng Laboratory, China), Youwen Wen (Guangzhou University, China), Minhao Li (Guangzhou University, China), Xiaobin Tang (Guangzhou University, China), and Le Wang (Guangzhou University, China; Peng Cheng Laboratory, China)</i>	
Meta-Graph Enhanced Heterogeneous Graph Neural Network for Cyber Attack Behavior Detection....	118
<i>Saibing Bi (University of Electronic Science and Technology of China, China), Liyi Zeng (Pengcheng Laboratory, China), and Zhaoquan Gu (Pengcheng Laboratory, China; Harbin Institute of Technology (Shenzhen), China)</i>	
Abnormal Data Transmission Behavior Detection and Entity Discovery Based on Deep Learning ..	127
<i>Chong Zhang (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Zhe Zou (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Dailin Li (Harbin Institute of Technology, China), and Chengpeng Zhang (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)</i>	

A Dual-Filtering Approach for Malicious Traffic Detection Against Label Noise and Class Imbalance Issues	135
<i>Xinkai Yi (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Chenlu Zhuansun (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Qinglin Yang (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Pengdeng Li (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Yuan Liu (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), and Zhihong Tian (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China)</i>	
DASA: A Unified Defense Method Against Adversarial Sample Attacks	143
<i>Wenqian Xu (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Ximing Zhang (China Southern Power Grid, China), Yixin Jiang (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Chao Hong (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Zhihong Liang (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Yiwei Yang (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Peiming Xu (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), Yuan Zhang (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China), and Leyu Bi (Guangdong Provincial Key Laboratory of Power System Network Security, Electric Power Research Institute, CSG, China)</i>	
Robust Adversarial Patch via Multi-View Optimization for Monocular Depth Estimation	151
<i>Yuxin He (Harbin Institute of Technology (Shenzhen), China), Hao Tan (Harbin Institute of Technology (Shenzhen), China), Ruonan Li (Pengcheng Laboratory, China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China; Pengcheng Laboratory, China)</i>	
An Empirical Study Of Adversarial Samples On The Performance Of Unknown Attack Detection Models	159
<i>Hengyuan Li (Harbin Institute of Technology (Shenzhen), China), Chenyun Duan (Harbin Institute of Technology (Shenzhen), China), Mingrui Mingrui (Harbin Institute of Technology (Shenzhen), China; Peng Cheng Laboratory, China), Jiarui Li (Harbin Institute of Technology (Shenzhen), China; Peng Cheng Laboratory, China), Lei Du (Harbin Institute of Technology (Shenzhen), China; Peng Cheng Laboratory, China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China; Peng Cheng Laboratory, China)</i>	
DualPerturb: Robustness Evaluation of Graph Neural Networks via Joint Perturbation Based on Influence Maximization	167
<i>Luyang NIU (Guangzhou University), Jianye Yang (Guangzhou University), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen))</i>	

Navigating the Black Box: Leveraging LLMs for Effective Text-Level Graph Injection Attacks.....	175
<i>Yuefei Lyu (Beijing University of Posts and Telecommunications, China), Chaozhuo Li (Beijing University of Posts and Telecommunications, China), Xi Zhang (Beijing University of Posts and Telecommunications, China), and Tianle Zhang (Beijing University of Posts and Telecommunications, China)</i>	
CAT-Mamba: A State Space Model Approach for Encrypted Malicious Traffic Detection	183
<i>Yunpeng Gao (Inner Mongolia University of Technology, China), Gang Wang (Inner Mongolia University of Technology, China), Peng Wang (Inner Mongolia Electric Power Research Institute, China), and Ying Wang (Inner Mongolia University of Technology, China)</i>	
I Know What You Watch: Finding Video Titles in Encrypted Traffic	191
<i>Likun Liu (Harbin Institute of Technology, China), Jingwei Li (Jinritoutiao Technology Co., Ltd, China), Mengmeng Ge (Harbin Institute of Technology, China), Zhichao Hu (Harbin Institute of Technology, China), and Xiangzhan Yu (Harbin Institute of Technology, China)</i>	
Hierarchical Byte-Level Modeling via CNN and Mamba for Encrypted Traffic Classification	199
<i>Ling Liu (Harbin Institute of Technology (Shenzhen), China), Siqin Guo (Guangzhou University, China), Yanlin He (Guangzhou University, China), and Ning Hu (Peng Cheng Laboratory, China)</i>	
Hybrid-Net: A Multimodal Deep Learning Framework for Anonymous Traffic Classification	207
<i>YanLin He (Guangzhou University, China), YuZhen Zhong (Guangzhou University, China), and Ning Hu (Peng Cheng Laboratory, China)</i>	
DAT: A Two-Stage Encrypted Traffic Classification Method Based on C4.5 Decision Tree and Transformer	216
<i>Siqin Guo (Guangzhou University, China), Rui Wu (Guangzhou University, China), and Ning Hu (Peng Cheng Laboratory, China)</i>	
The Pursuer of Light: Exploration and Evolution of DAST Technology in XSS Vulnerability Detection	224
<i>Youpeng Li (Guangzhou University, China), Zefeng Lu (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Yanli Chen (Guangzhou University, China), Yuyu He (Guangzhou University, China), and Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China)</i>	
Optimizing Code Vulnerability Detection via GRPO and SFT Fine-Tuning of Compact LLMs	232
<i>Qixian Luo (China Telecom Group Co., Ltd., China), Yunfan Tian (China Telecom Research Institute, China), Wenyu Song (China Telecom Group Co., Ltd., China), and Yun Duan (China Telecom Group Co., Ltd., China)</i>	
From Heuristics to Intelligence: Evolving Black-box Scanners for Modern Web Applications	247
<i>Jieyao Xue (Guangzhou University, China), Yuyu He (Guangzhou University, China), Yanjun Xiao (PINGXING Lab (Nsfocus Technology Group Company), China), Yanli Chen (Guangzhou University, China; Key Laboratory Ministry of Industry and Information Technology, China; Key Laboratory of Cyberspace Security, Ministry of Education, China), Zhigang Wang (Guangzhou University, China), and Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China)</i>	

Multi-Head Attention-Based Perturbation Testing Method for Artificial Intelligence Models	255
<i>Wensian Xu (CSG, China), Yixin Jiang (CSG, China), Ximing Zhang (China Southern Power Grid, China), Yiwei Yang (CSG, China), Zhihong Liang (CSG, China), Chao Hong (CSG, China), Leyu Bi (CSG, China), Yunan Zhang (CSG, China), and Peiming Xu (CSG, China)</i>	
AugForen: A Data Augmentation-Based Neural Backdoor Forensics for Few-Shot Scenarios	263
<i>Miaohua Zhuo (Guangzhou University, China) and Mohan Li (Guangzhou University, China)</i>	
MDDC: Malicious Package Detection with Multi-Dimensional Feature Extraction and Density-Constrained GAN-Based Data Augmentation	271
<i>Huacong Zhou (Guangzhou University, China), Yuhan Chai (Guangzhou University, China), Tao Leng (Sichuan Police College, China), Xiaobin Xie (Guangzhou University, China), Yuhang Wang (Beijing Aerospace Automatic Control Institute, China), Zhenqi Cai (Guangzhou University, China), Yongxin Cai (Guangzhou University, China), and Jing Qiu (Guangzhou University, China)</i>	
ACCI: a Multi-Feature PyPI Package Anomaly Detection Method Based on Script Deep Semantics.	279
<i>Xiaobin Xie (Guangzhou University, China), Qiyang Feng (Guangzhou University, China), Tao Leng (Sichuan Police College, China), Huacong Zhou (Guangzhou University, China), Yongxin Cai (Guangzhou University, China), Zhenqi Cai (Guangzhou University, China), Jing Qiu (Guangzhou University, China), and Yuhan Chai (Guangzhou University, China)</i>	
MalGuard: Malicious Package Detection Based on Dual Validation of Rule Scanning and Large Language Model	287
<i>Zhenqi Cai (Guangzhou University, China), Yongxin Cai (Guangzhou University, China), Tao Leng (Sichuan Police College, China), Huacong Zhou (Guangzhou University, China), Xiaobin Xie (Guangzhou University, China), Yifei Sun (Guangzhou University, China), Yuhan Chai (Guangzhou University, China), and Jing Qiu (Guangzhou University, China)</i>	
Risk Identification for Registered Domain Name Ownership in the Chinese Mainland Based on Dependency Relationships	295
<i>Keyu Lu (Pengcheng Laboratory, China), Yanchen Qiao (Pengcheng Laboratory, China), Shutu Yang (Pengcheng Laboratory, China), Qiuwen Wang (Pengcheng Laboratory, China; Harbin University of Science and Technology, China), Yu Zhang (Pengcheng Laboratory, China; Harbin Institute of Technology, China), and Weizhe Zhang (Pengcheng Laboratory, China; Harbin Institute of Technology, China)</i>	
DisinfoNet: A Comprehensive Dataset of Disinformation with Contents and Propagation Dynamics over Social Networks	303
<i>Jinchen Shi (National University of Defense Technology, China), Hui Yang (The 30th Research Institute of China Electronics Technology Group Corporation, China), Hongjie Qiu (The 30th Research Institute of China Electronics Technology Group Corporation, China), Hao Guo (National University of Defense Technology, China), Minnan Luo (Xi'an Jiaotong University, China), and Xiang Zhao (National University of Defense Technology, China)</i>	

Violence-Provoking Speech Detection Technology for Asian Hate	311
<i>Bojie Yang (National University of Defense Technology, China), Ye Wang (National University of Defense Technology, China), Xiang Zeng (National University of Defense Technology, China), and Bin Zhou (National University of Defense Technology, China)</i>	
FedCMB: A Cross-Modal Federated Learning Framework for Multi-Modal Cyberbullying Detection with Shared Feature Space	319
<i>WeiQi Zhang (Deakin University, Australia), Chengzu Dong (Lingnan University, China), and Peng Wang (Harbin Institute of Technology (Shenzhen), China)</i>	
Multimodal Biases Mitigation: Multimodal Multi-Granularity Causal Reasoning Framework for Multimodal Fake News Detection	327
<i>Zhi Zeng (Xi'an Jiaotong University), Minnan Luo (Xi'an Jiaotong University), Xiangzheng Kong (Xi'an Jiaotong University), Hao Guo (National University of Defense Technology), Hui Yang (Technology Group Corporation), and Xiang Zhao (National University of Defense Technology)</i>	
Risk Assessment and Prediction of False Information Propagation from the Perspective of Motifs	335
<i>Dingyuan Fan (National University of Defense Technology, China), Yang Fang (National University of Defense Technology, China), Tianyang Shao (National University of Defense Technology, China), Jiuyang Tang (National University of Defense Technology, China), and Xiang Zhao (National University of Defense Technology, China)</i>	
MSTnet: Multimodal Soft Threshold Fusion Network Based on BERT	343
<i>Guangxia Xu (Guangzhou University, China), Yakun Yuan (Chongqing University of Posts and Telecommunications, China), and Xing Huang (Guangzhou University, China)</i>	
Hierarchical Aware Relation Extraction Based on Prompt-Tuning	351
<i>Xin Wen (Beijing University of Posts and Telecommunications, China; China Electronics Corporation, China), Yixuan Huo (Beijing University of Posts and Telecommunications, China), Jinqiao Shi (Beijing University of Posts and Telecommunications, China), Majing Su (The 6th Research Institute of China Electronics Corporation, China), Jiapeng Zhao (Beijing University of Posts and Telecommunications, China; Zhejiang University, China), Weihao Li (The 6th Research Institute of China Electronics Corporation, China), Jinxin Zuo (Beijing University of Posts and Telecommunications, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)</i>	
Reasoning Paths as Signals: Augmenting Multi-hop Fact Verification Through Structural Reasoning Progression	359
<i>Liwen Zheng (Beijing University of Posts and Telecommunicatios), Chaozhao Li (Beijing University of Posts and Telecommunicatios), Haoran Jia (Beijing University of Posts and Telecommunicatios), and Xi Zhang (Beijing University of Posts and Telecommunicatios)</i>	
Proactive Defense Mechanism Against BGP Attacks Leveraging RPKI	367
<i>Yao Li (Jiangnan University, China), Xiaofeng Wang (Jiangnan University, China; Pengcheng Laboratory, China), Bo Yu (Jiangnan University, China), and Jie Wu (Jiangnan University, China)</i>	

CHP-ABE: A Privacy-Enhanced CP-ABE Scheme with Policy Hiding and Obfuscation	375
<i>Guangxia Xu (Guangzhou University, China), Haolin Li (Chongqing University of Posts and Telecommunications, China), and Lu Wang (Guangzhou University, China)</i>	
When Reputation Meets Auction: A Dual Incentive Mechanism for Mitigating Clean Label Attack in Data Trading Markets	383
<i>Qingyuan Li (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Chenlu Zhuansun (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Yiji Lin (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Qinglin Yang (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Pengdeng Li (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), Yuan Liu (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China), and Zhihong Tian (Guangzhou University, China; Guangdong Key Laboratory of Industrial Control System Security, China)</i>	
Graph Neural Network-Enhanced Semantic Invariant Robust Watermarking for Large Language Models	391
<i>Jingqi Jia (Beijing Jiaotong University, China), Yunzhe Tian (Beijing Jiaotong University, China), Xinyi Zhao (Beijing Jiaotong University, China), Xiangyu Shi (Beijing Jiaotong University, China), Ping Ye (Beijing Jiaotong University, China), Xiaoshu Cui (Beijing Jiaotong University, China), Yanfeng Gu (Beijing Jiaotong University, China), Xingyu Wu (Beijing Jiaotong University, China), Dianjing Cheng (Beijing Jiaotong University, China), and Wenjia Niu (Beijing Jiaotong University, China)</i>	
MIX-LSM: Research on Mixed Data Storage Strategies for HTAP Based on LSM Trees	399
<i>Shengfei Shi (Harbin Institute of Technology, China), Keyi Ai (Harbin Institute of Technology, China), Xiaoxiao Xie (Harbin Institute of Technology, China), Chao Yi (China North Vehicle Research Institute, China), and Yue Liu (China North Vehicle Research Institute, China)</i>	
MDW-Net: A Lightweight Convolutional Neural Network Model for Chinese Font Recognition	407
<i>Changlong Liu (National University of Defense Technology, China; Unit 31305 of PLA, China), Xuewen Zhou (National University of Defense Technology, China; Unit 31306 of PLA, China), Rong Jiang (National University of Defense Technology, China), Bin Zhou (National University of Defense Technology, China), and Dan Ma (Unit 31305 of PLA, China)</i>	
Multi-Object Trajectory Prediction Method Based on OC-SORT and Hybrid Kalman Filter	415
<i>Zhiyang Cui (Harbin Institute of Technology (Shenzhen), China), Ruonan Li (Pengcheng Laboratory, China), Hao Tan (Harbin Institute of Technology (Shenzhen), China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China; Pengcheng Laboratory, China)</i>	

Research on the Application of Artificial Intelligence in the Trajectory of Hypersonic Flight Aircraft	423
<i>Yixuan Tao (National University of Defense Technology, China), Zihao Li (National University of Defense Technology, China), Kaixing Liu (National University of Defense Technology, China), and Wei Huang (National University of Defense Technology, China)</i>	
PVMTA: Prediction Vector Monitoring and Adaptive Temperature Adjustment Against Model Extraction	431
<i>Yubo Tang (Harbin Institute of Technology, China), Wenjian Luo (Harbin Institute of Technology, China), Zipeng Ye (Harbin Institute of Technology, China), and Qi Zhou (Harbin Institute of Technology, China)</i>	
Technical Overview of Container Vulnerabilities	441
<i>Xinhui Zhang (Guangzhou University, China), Weiyong Zhang (Guangzhou University, China), Qiu Jiang (Guangzhou University, China), Zihao Lin (Guangzhou University, China), Baowang Lai (Guangzhou University, China), and Hui Lu (Guangzhou University, China)</i>	
Reverse Format of Dameng Database	449
<i>Chengpeng Zhang (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Zhe Zou (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), and Yao Zhang (Harbin Institute of Technology, China)</i>	
Organization Clustering of Social Media Accounts Based on Large Language Models	457
<i>Shudong Li (Guangzhou University, China; Guangzhou University, China), Xin Zhang (Guangzhou University, China), Mingjun Yao (Guangzhou University, China), Tianle Zhang (Beijing University of Posts and Telecommunications, China), and Tiantian Ji (Beijing University of Posts and Telecommunications, China)</i>	
Unveiling Directed Gray-Box Fuzzing: A Profound Insight from Foundational Principles to Future Frontiers	464
<i>Zhenghao Li (Guangzhou University, China), Xingchi Chen (Guangzhou University, China), Yanli Chen (Guangzhou University, China; Key Laboratory Ministry of Industry and Information Technology, China), Zhigang Wang (Guangzhou University, China), Yuyu He (Guangzhou University, China), and Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China)</i>	
Unlocking the Next Generation of REST API Security: A Critical Analysis of the Path from Fuzzing to LLMs	472
<i>Xinge Zhang (Guangzhou University, China), Yuyu He (Guangzhou University, China), Yanli Chen (Guangzhou University, China), Zhigang Wang (Guangzhou University, China), Hui Lu (Guangzhou University, China; Peng Cheng Laboratory, China; Quanzhou Normal University, China), and JingHang Wu (Guangzhou University, China)</i>	
Large Language Model Jailbreak Based on Stylistic Rewriting	480
<i>Wenbo Hou (Pengcheng Laboratory, China; Harbin Institute of Technology, China), Ning Hu (Pengcheng Laboratory, China), Yamin Hu (Harbin Institute of Technology, China), and Wenjian Luo (Harbin Institute of Technology, China)</i>	

IMPACT: Immunity-Inspired Dynamic Memory Forensics Model for Fileless Cryptojacking Threats	487
<i>Yu Zhang (Guangdong Polytechnic Normal University, China), Yuanquan Shi (Hunan First Normal University, China), and Qingzhong Liu (Sam Houston State University, USA)</i>	
A Malware Classification Method Based on Visualization of TF-IDF Transfer Entropy Graphs	495
<i>Yu Zhang (Guangdong Polytechnic Normal University, China), Weiyi Huang (Guangdong Polytechnic Normal University, China), Yuanquan Shi (Hunan First Normal University, China), and Yujun Yang (Huaihua University, China)</i>	
A Method for Improving Retrieval Effectiveness in RAG	501
<i>Xuwen Zhou (National University of Defense Technology, China; Unit 31306 of PLA, China), Zhuowei Li (National University of Defense Technology, China), Rong Jiang (National University of Defense Technology, China), Chaojun Xu (National University of Defense Technology, China), and Chengcheng Shao (National University of Defense Technology, China)</i>	
RapidDev-HPC: A Rapid Development Tool for HPC Applications	508
<i>Di Wang (Jinan Institute of Supercomputing Technology, China), Ying Guo (Jinan Institute of Supercomputing Technology, China), and Jibin Wang (Jinan Institute of Supercomputing Technology, China; Qilu University of Technology, China; Shandong Fundamental Research Center for Computer Science, China)</i>	
Error-Resistant Transmission Mechanism for Video Streams Based on Multi-Descriptive Coding and Cross-Layer Multi-Path Routing	515
<i>Chunyan Yang (Electric Power Research Institute of Guangxi Power Grid Co., Ltd.), Cong Lin (Electric Power Research Institute of Guangxi Power Grid Co., Ltd.), and Yating Su (Hezhou Power Supply Bureau, Guangxi Power Grid Co., Ltd.)</i>	
A Social Network Account Classification Method Guided by Character Network Features	521
<i>Zhiyong Yang (University of Electronic Science and Technology of China, China), Xia Wu (University of Electronic Science and Technology of China, China), Xiaoxi Zhai (University of Electronic Science and Technology of China, China), Qing Zhao (University of Electronic Science and Technology of China, China), and Hangyu Hu (University of Electronic Science and Technology of China, China)</i>	

High Precision Passive Positioning System and Intelligent Charging Scheduling Strategy for Electric Vehicle Charging Station Based on Visible Light	531
<i>Yujie Zhao (State Grid Feicheng Power Supply Company, State Grid Shandong Electric Power Company, China; State Grid Shandong Electric Power Research Institute, China), Wenting Wang (State Grid Shandong Electric Power Research Institute, China), Yonghao Yu (City University of Macau, China; Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Min Li (City University of Macau, China; Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Shujun Gu (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Jiaming Hu (Datang Northeast Electric Power Test and Research Institute Co., Ltd, China), and Yongde Guo (City University of Macau, China)</i>	
An Intelligent Security Response Playbook Recommendation Algorithm Based on Deep Learning Network	538
<i>Xiangyun Xu (University of Electronic Science and Technology of China, China), Xiang Gao (University of Electronic Science and Technology of China, China), Mengling Cui (University of Electronic Science and Technology of China, China), Hangyu Hu (University of Electronic Science and Technology of China, China), and Xingmiao Yao (University of Electronic Science and Technology of China, China)</i>	
Dense Crowd Hazard Behavior Recognition Method Based on Semantic-Density Fusion Transformer with Dual Branch Feature Fusion Mechanism	546
<i>Tie Hua Zhou (Northeast Electric Power University, China), Xue Yan (Northeast Electric Power University, China), Haoyu Hao (Northeast Electric Power University, China), and Ling Wang (Northeast Electric Power University, China)</i>	
Potential Bottlenecks Identification and Performance Optimization for Multi-Video Surveillance System with Dense Crowd Scene Recognition	552
<i>Tie Hua Zhou (Northeast Electric Power University, China), Zhiwei Jian (Northeast Electric Power University, China), Jingran Sun (Jilin People's Hospital, China), Dongsheng Li (Northeast Electric Power University, China), and Ling Wang (Northeast Electric Power University, China)</i>	

Semi-Supervised Text Generation via Large Model Interaction	558
<i>Zhai Lizhi (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Zhe Ji (Northeastern University, China), Yuting Shen (North China Institute of Computing Technology, China), Guotong Hu (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Jiabei Yang (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Qingchao Jia (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Zhenfeng Yan (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Yiming Bu (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), and Meng Luo (The 54th Research Institute of CETC, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China)</i>	
Mining key Influence Factors in Social Networks Under Complex Public Opinion Environments ...	567
<i>Qingchao Jia (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Jiabei Yang (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Zhao Su (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Yiming Bu (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Lizhi Zhai (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Meng Luo (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), Guotong Hu (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China), and Huichao Jia (The 54th Research Institute of China Electronics Technology Group Corporation, China; Hebei Key Laboratory of Intelligent Information Perception and Processing, China)</i>	
Detecting Cryptomining Malware Using Virtual Machine Introspection	575
<i>Chen Zhiyang (Jiangnan University, China), Xiaofeng Wang (Jiangnan University, China), Lijian Dong (Jiangnan University, China), and Jie Wu (Jiangnan University, China)</i>	
Naval Ship Movement Prediction Based on Temporal Knowledge Graph Reasoning	582
<i>Siyang Sun (National University of Defense Technology, China), Deqi Cao (National University of Defense Technology, China), Yibin Fu (National University of Defense Technology, China), and Zhaoyun Ding (National University of Defense Technology, China)</i>	

SCFAO: A Self-Contained Framework for APT Organizational Consistency Assessment	589
<i>Hesong Wang (Guangzhou University, China), Ziyu Wang (Guangzhou University, China), Yinghai Zhou (Guangzhou University, China), Mingkun Yuan (DBAPP Security Co., Ltd., China), and Zhihong Tian (Guangzhou University, China)</i>	
A Cascading Failure Simulation Framework for Cyber Physical Systems Based on Cyber Ranges ...	597
<i>Xing Zou (Peng Cheng Laboratory, China), Ning Hu (Peng Cheng Laboratory, China), Xiaofeng Wang (Peng Cheng Laboratory, China), Yifei Zhou (Peng Cheng Laboratory, China), Jie Wu (Jiangnan University and Peng Cheng Laboratory), and Kekai Wang (Jiangnan University, China)</i>	
POMG Modelling and Deep Reinforcement Learning-Based Autonomous Defense Strategies	
Generation in Intelligent Equipment Clusters	605
<i>Junjie Liu (Beijing University of Posts and Telecommunications, China), Linyuan Yao (Beijing Institute of Astronautical Systems Engineering, China), Yang Liu (Beijing Institute of Technology and with the Beijing, Institute of Astronautical Systems Engineering, China), Yaojun Qiao (Beijing University of Posts and Telecommunications, China), and Daoqi Han (Beijing University of Posts and Telecommunications, China)</i>	
AGSDSNtest: Software Defined Space-Based Network Security Testing on Attack Graph	613
<i>Liqiang He (Academy of Military Sciences, China), Jinjing Zhao (Academy of Military Sciences, China), Ruonan Wang (Academy of Military Sciences, China), Hongzheng Zhang (Academy of Military Sciences, China), and Ling Pang (Academy of Military Sciences, China)</i>	
A Survey of Configuration Testing Technologies	621
<i>Fan Zhong (Institute of Systems Engineering, Academy of Military Sciences, China), Minhuan Huang (Institute of Systems Engineering, Academy of Military Sciences, China), Xiang Li (Institute of Systems Engineering, Academy of Military Sciences, China), and Yuanping Nie (Institute of Systems Engineering, Academy of Military Sciences, China)</i>	
EnSNet: A Lightweight and Secure Inversible Neural Network Steganography Model for Encryption Domains	628
<i>Lijing Ren (Institute of Artificial Intelligence, China), Denghui Zhang (Guangzhou University, China; Qilu University of Technology (Shandong Academy of Sciences), China), and Qingduo Zeng (Guangdong University of Technology, China)</i>	
Enhancing Test Case Generation for Fuzzing Deep Learning Libraries Using Few-Shot Learning....	635
<i>Bing Yang (University of Electronic Science and Technology of China, China), Senyi Li (University of Electronic Science and Technology of China, China), Junqiang Li (University of Electronic Science and Technology of China, China), Kaiyu Du (University of Electronic Science and Technology of China, China), Hongfang Yu (University of Electronic Science and Technology of China, China), Jian Sun (University of Electronic Science and Technology of China, China), and Long Luo (University of Electronic Science and Technology of China, China)</i>	

Lightweight Code Coverage Analysis for Deep Learning Library Fuzzing	643
<i>Senyi Li (University of Electronic Science and Technology of China, China), Bing Yang (University of Electronic Science and Technology of China, China), Hongfang Yu (University of Electronic Science and Technology of China, China), and Long Luo (University of Electronic Science and Technology of China, China)</i>	
Automatic Generation of Advanced TTP Rules Using Large Language Models	651
<i>Li Zhou (Guangzhou University, China), Fang Li (Guangzhou University, China), Wuqi Qi (Guangzhou University, China), and Wei Wu (Guangzhou University, China)</i>	
Enhancing Software Vulnerability Analysis via Large Language Models: A Systematic Review	658
<i>Lin Wang (Institute of Systems Engineering, Academy of Military Science, China), Jin Li (Institute of Systems Engineering, Academy of Military Science, China), Zhaojie Li (Institute of Systems Engineering, Academy of Military Science, China), Shuaibing Lu (Institute of Systems Engineering, Academy of Military Science, China), and Guanghua Yang (Institute of Systems Engineering, Academy of Military Science, China)</i>	
IncrFuzz: LLM-Driven Incremental Fuzz Driver Generation for Library APIs	666
<i>Xiao Feng (Southeast University, China; Academy of Military Sciences, China), Taotao Gu (Tsinghua University, China), Shuaibing Lu (Academy of Military Sciences, China), and Xiaohui Kuang (Southeast University, China; Academy of Military Sciences, China)</i>	
Optimization of Enhanced Dynamic Container Cleaning Strategy in Container-Based Cloud Environments	674
<i>Feifan Hu (Beijing University of Posts and Telecommunications, China), Zhenkun Fu (Beijing Institute of Astronautical Systems Engineering, China), Yang Liu (Beijing Institute of Technology and with Beijing Institute of Astronautical Systems Engineering, China), Yaojun Qiao (Beijing University of Posts and Telecommunications, China), and Daoqi Han (Beijing University of Posts and Telecommunications, China)</i>	
Deep Learning-Based Video Content Recognition: From C3D and ResNet18 to Fusion Models	682
<i>Yuanyao Jiang (Institute of Systems Engineering, China), Ling Pang (Institute of Systems Engineering, China), Yaning Zheng (Institute of Systems Engineering, China), and Hu Li (Institute of Systems Engineering, China)</i>	
Author Index	689
