# TABLE OF CONTENTS

|                                                                                                                                                                              |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Privacy protection mechanism for multi-source heterogeneous distributed data representation and blockchain smart contract annotation .....                                   | 1  |
| <i>Ting Li, Zhiyuan He, Dan Pan, Yuxiang Cai, Ting Fu, Mingyang Lei</i>                                                                                                      |    |
| Application of Trusted Execution Environment Security Situation Identification for Decryptable Traffic and Non-Decryptable Traffic Data .....                                | 7  |
| <i>Qiongyin Zhang, Heng Tang, Fan Yang, Zhengkun Liu, Xueyan Wang</i>                                                                                                        |    |
| Graph-Guided Channel Pruning for Lightweight YOLOv8: Optimizing Depthwise Separable Convolutions for UAV Real-Time Detection .....                                           | 11 |
| <i>Junliang Zhang, Kaicheng Shi, Mengqin Sun</i>                                                                                                                             |    |
| Research on Small Object Image Recognition Algorithm Based on Attention Mechanism and SuperResolution Reconstruction: Taking Industrial Defect Detection as an Example ..... | 16 |
| <i>Huanle Hou</i>                                                                                                                                                            |    |
| Edge-Guided Hybrid CNN-Transformer Network with Canny Prior for Pneumonia Lesion Segmentation .....                                                                          | 22 |
| <i>Fujiao Ju, Shuhan Zhao, Shaotao Zhu</i>                                                                                                                                   |    |
| Semantic Prompting and Cascade Attention for Segment Anything Model 2 .....                                                                                                  | 26 |
| <i>Zhechao Liu</i>                                                                                                                                                           |    |
| Safety Harness Detection for High-Altitude Workers Based on the Improved YOLOv11 .....                                                                                       | 30 |
| <i>Qiliang Du, Zhizhu Min, Lianfang Tian, Ling Yuan</i>                                                                                                                      |    |
| A Non-Intrusive Driver Stress Monitoring Framework Based on Unsupervised Clustering Label Generation and Temporal Parameter Optimization .....                               | 34 |
| <i>Shiyu Zhong, Lu Zhang, Wei Lu, Wuhao Qin</i>                                                                                                                              |    |
| An Improved D-S Evidence Theory-Based Multi-Sensor Data Fusion Method for MIMU .....                                                                                         | 38 |
| <i>Tan Li, Huijie Quan, Weining Song, Nanjiang Chen, Qi Wang, Fangfang Gao, Yanwen Lin, Runmin Yin</i>                                                                       |    |
| MTL-TN: An Uncertainty-Weighted Multi-Task Framework for Unified Thyroid Nodule Segmentation and TI-RADS Classification .....                                                | 44 |
| <i>Tianhao Xiang, Bingjiang Li, Zhenyuan Hu, Xinyi Wang, Yan Dang, Yingjia Deng</i>                                                                                          |    |
| LECA: Statistical-Prior Guided Learnable Channel Attention Enhancement for Screw Detection .....                                                                             | 49 |
| <i>Zhexuan Li, Donghao Zhang, Liqi Yan, Chao Yang, Xiangqing Li</i>                                                                                                          |    |
| High-Accuracy Visual Rotation Angle Measurement for Low-Precision Pan-Tilt Platforms .....                                                                                   | 54 |
| <i>Jiaman Hong, Jingwen Xu, Shuixin Pan, Wenjun Chen, Yueqiang Zhang, Dilong Li</i>                                                                                          |    |
| Lightweight Contrast-Enhanced Vision Mamba Network for Remote Sensing Change Detection .....                                                                                 | 59 |
| <i>Hao Zhou, Xiyuan Wang, Chunmei Huang, Chunshu Li</i>                                                                                                                      |    |
| FedPKT: Robust Cross-Domain Few-Shot Intrusion Detection via Prototypical Knowledge Transfer .....                                                                           | 65 |
| <i>Kai Yin, Jianfei Zhang, Zhihua Xia, Chenxi Yu</i>                                                                                                                         |    |
| Challenges and Innovative Approaches in Ground Penetrating Radar for Pavement Assessment .....                                                                               | 69 |
| <i>Xinyue Zhang</i>                                                                                                                                                          |    |

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Lightweight coal gangue identification algorithm based on YOLOv11n-DPN .....                                                                                           | 73  |
| <i>Shiqi Zhang, Huizhi Ren</i>                                                                                                                                         |     |
| Graph Neural Network-Based Automatic Detection and Repair of Code Vulnerabilities .....                                                                                | 77  |
| <i>Haoxuan Li</i>                                                                                                                                                      |     |
| Low-Light Object Detection Based on Improved YOLOv8 .....                                                                                                              | 83  |
| <i>Dongli Bao, Xiao Hao</i>                                                                                                                                            |     |
| Environment Perception Method for Autonomous Vehicle Platoons Based on LiDAR–Vision Fusion<br>and Multi-Scale Attention Mechanism .....                                | 87  |
| <i>Yuzhe Ma, Jingqi Wang</i>                                                                                                                                           |     |
| An Object Detection Algorithm for Autonomous Driving Based on YOLOv8 .....                                                                                             | 91  |
| <i>Baida Chen, Dandan Huang, Zhi Liu, Yibing Lin</i>                                                                                                                   |     |
| Reliability Analysis of a Remote Monitoring System for Navigational Aids Based on NB-IoT .....                                                                         | 95  |
| <i>Qiang Guo, Lili Tan</i>                                                                                                                                             |     |
| MP-PPO:A Deep Reinforcement Learning Model for Industrial IoT Malicious Traffic Data Detection .....                                                                   | 99  |
| <i>Yutao Hu, Yongxin Feng, Yuntao Zhao, Xuedong Mao, Pan Wang, Guojie Ren</i>                                                                                          |     |
| The Atmospheric Turbulence Restoration Algorithm Based on MIMO-UNet .....                                                                                              | 105 |
| <i>Yibing Lin, Dandan Huang, Zhi Liu, Baida Chen</i>                                                                                                                   |     |
| Coaxial Cable Connector Detection Based on Improved YOLO11 .....                                                                                                       | 109 |
| <i>Lianfang Tian, Jiekai Huang, Qiliang Du, Yuxiang Wu</i>                                                                                                             |     |
| Occlusion-Aware Lightweight Convolutional Neural Network for Traffic Sign Recognition .....                                                                            | 113 |
| <i>Ling Xu, Yiguo Wan, Xin Wu, Cheng Yao, Kaizhong Zou, Xiangqing Wang, Zhanfei Cao, Jiaying Wu<br/>Dongfei Wang</i>                                                   |     |
| APDQN: A DRL Model with Inter-Group Attention for UAV Intrusion Detection .....                                                                                        | 120 |
| <i>Xuedong Mao, Yongxin Feng, Yuntao Zhao, Yutao Hu</i>                                                                                                                |     |
| A PUF-Based Adaptive Encrypted Communication Method for Firefighting IoT .....                                                                                         | 126 |
| <i>Zhiru Li, Haitao Zhu, Jian Cheng, Xiaoyi Duan, Liang Dong</i>                                                                                                       |     |
| An Improved Method for Small Moving Object Segmentation in Indoor Surveillance .....                                                                                   | 131 |
| <i>Lianfang Tian, Minglun Chen, Qiliang Du, Yuxiang Wu</i>                                                                                                             |     |
| A Lightweight Cross-Scale Transformer for Medical Image Segmentation .....                                                                                             | 135 |
