# TABLE OF CONTENTS

|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Value-Based Reinforcement Learning for Mapless Navigation of a Mobile Robot .....                                                                  | 1  |
| <i>Dilli Bhaskar, Ayyappadas Rajagopal, Nandagopan Kalathil, Shaikshavali Chitraganti</i>                                                          |    |
| Real-Time Gait Adaptation for Quadrupeds using Model Predictive Control and Reinforcement Learning .....                                           | 7  |
| <i>Ganga Nair B, Prakrut Kotecha, Shishir Kolathaya</i>                                                                                            |    |
| Reinforcement Learning-based Control of a Full-body Biomechanical Model with Exoskeletons while Tracking Motion Capture Data .....                 | 13 |
| <i>Rugved Upadhye, Vighnesh Vatsal, Kaushik Das</i>                                                                                                |    |
| Find Us a Safe Path: Risk-Aware Multi-Agent Reinforcement Learning for Unknown Environment .....                                                   | 19 |
| <i>John Rebeiro, Archit Sharma, Dharmendra Sharma, Peeyush Thakur, Narendra Kumar Dhar</i>                                                         |    |
| Deep Reinforcement Learning based Control Design for Aircraft Recovery from Loss-of-Control Scenario .....                                         | 25 |
| <i>Imran Sayyed, Aayush Konar, Nandan Kumar Sinha</i>                                                                                              |    |
| Design of Bayesian Optimization Based Adaptive Reward Shaping Augmented Reinforcement Learning Based Control of a Lab-Scale Electric Circuit ..... | 31 |
| <i>Shrabasti Batabyal, Roshni Maiti, Aparajita Sengupta</i>                                                                                        |    |
| Continuous-Time Adaptive Distributed Optimization Driven Geometric-mean within a Weight-Unbalanced Network .....                                   | 37 |
| <i>Agniva Banerjee, Ashish Shukla, Yashaswini Mathur, Arijit Sen</i>                                                                               |    |
| Convergence analysis of Federated Learning in a Stochastic Approximation Setting .....                                                             | 43 |
| <i>Srihari P V, Bharath Bhikkaji</i>                                                                                                               |    |
| Nonlinear Kolmogorov equation: a template for multi-agent ‘stateless’ learning .....                                                               | 49 |
| <i>Vivek S Borkar</i>                                                                                                                              |    |
| Active Target–Attacker–Defender differential game framework for analyzing multiple differential drive robot interactions .....                     | 54 |
| <i>Harish Bhamitipadi Magesh, Ritabrata Mandal, Moon Chetry, Shyni Thomas, Bharath Bhikkaji Puduru Viswanadha Reddy</i>                            |    |
| Active Alignment Control for Contact-Based Inspection with a Single Range Sensor on Micro Quadrotors .....                                         | 60 |
| <i>Sandeep Gupta, Anuj Nandanwar, Narendra Kumar Dhar, Suwendu Samanta, Laxmidhar Behera</i>                                                       |    |
| Real Time Leak Detection in Urban Water Networks using a Hybrid Data Driven Approach: Insights from the SWaDNet Testbed .....                      | 66 |
| <i>Akhil Arava, Venkata Reddy Palleti</i>                                                                                                          |    |
| State Estimation in Parallel-Connected Battery Packs with Contact Resistances in the Presence of Non-Gaussian Noise .....                          | 72 |
| <i>Jaffar Ali Lone, Rohit Kumar Singh, Shovan Bhaumik, Nutan Kumar Tomar</i>                                                                       |    |
| Kalman–Savitzky–Golay Filtering for Autonomous Turret Systems: Target Tracking and Engagement .....                                                | 78 |
| <i>Puvvada Vamsidhar, Danda Vamsi Chakradhar, Raghavarapu Dharani, Ravishankar Prakash Desai</i>                                                   |    |

|                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Modified Koopman-Kalman filter for denoising communication uncertainties: A case study to multi-agent systems sharing critical information ..... | 84  |
| <i>Ravi Kiran Akumalla, Chakravarthi Jada, Ramakrishna Pasumathy, Muslim Malik, Tushar Jain</i>                                                  |     |
| Near-Optimal Analytical Terminal Descent Guidance for Lunar Landers under State and Control Constraints .....                                    | 90  |
| <i>Aditya Rallapalli, Suraj Kumar, Rijesh M P, Ashok Kumar Kakula, Bharat Kumar GVP</i>                                                          |     |
| Closed-Loop Control Law for Low Thrust Orbit Transfer with Guaranteed Stability .....                                                            | 96  |
| <i>Suraj Kumar, Aditya Rallapalli, Nivriti Priyadarshini, Bharat Kumar GVP, Ravi Kumar L</i>                                                     |     |
| Polynomial Guidance for 3D Trajectory Planning in Autonomous Aerial Refueling .....                                                              | 102 |
| <i>Mohit Kumar Malhotra, Ashwini Ratnoo, Vijay V. Patel</i>                                                                                      |     |
| Relative Side-Bearing Angle-Based Circumnavigation of a Target Using Unmanned Aerial Vehicle with Boundary Constraints .....                     | 108 |
| <i>Ranit Roychowdhury, Anoop Jain, Jayant Kumar Mohanta</i>                                                                                      |     |
| Impact Angle and Input Constrained Guidance Against Stationary Targets .....                                                                     | 114 |
| <i>Vinay Kathiriya, Saurabh Kumar, Shashi Ranjan Kumar</i>                                                                                       |     |
| Exact-Time Convergent Impact Time Guidance Against Moving Targets .....                                                                          | 120 |
| <i>M. Kidron, Saurabh Kumar, Shashi Ranjan Kumar</i>                                                                                             |     |
| Convergence of Momentum-Based Optimization Algorithms with Time-Varying Parameters .....                                                         | 126 |
| <i>Mathukumalli Vidyasagar</i>                                                                                                                   |     |
| Trajectory Optimization for Minimum Threat Exposure using Physics-Informed Neural Networks .....                                                 | 132 |
| <i>Alexandra E. Ballentine, Raghvendra V. Cowlagi</i>                                                                                            |     |
| Multi-Criteria Rake Link Optimization in a Dense Suburban Railway Network .....                                                                  | 138 |
| <i>Sourav Dey, Hiroki Hill Kobayashi</i>                                                                                                         |     |
| Solving Infinite-Horizon Optimal Control Problems using the Extreme Theory of Functional Connections .....                                       | 144 |
| <i>Tanay Raghunandan Srinivasa, Suraj Kumar</i>                                                                                                  |     |
| Powered Descent Trajectory Optimization of Chandrayaan-3 using Radau Collocation and Controllable Sets .....                                     | 150 |
| <i>Suraj Kumar, Aditya Rallapalli, Ashok Kumar Kakula, Bharat Kumar GVP</i>                                                                      |     |
| A Scalable Entropy-Based Framework for Intermodal Hub Location and Routing in Freight Transport Network .....                                    | 156 |
| <i>Rahul Goyal, G.V.L. Satya Kumar, Prasanna Ramamoorthy, Amber Srivastava</i>                                                                   |     |
| Taming Byzantine Adversaries in Decentralized Multi-Agent Reinforcement Learning .....                                                           | 162 |
| <i>Tamoghno Kandar, Mayank Baranwal</i>                                                                                                          |     |
| Soft Normalized Advantage Functions for Reinforcement Learning in Optimal Control Problems .....                                                 | 168 |
| <i>Dilli Bhaskar, Athira Mullachery, Shaikshavali Chitraganti</i>                                                                                |     |
| Reliable Policy Iteration: Performance Robustness Across Architecture and Environment Perturbations .....                                        | 174 |
| <i>S.R. Eshwar, Aniruddha Mukherjee, Kintan Saha, Krishna Agarwal, Gagan Thoppe, Aditya Gopalan Gal Dalal</i>                                    |     |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Stochastic maximum principle for non-zero sum delayed mean-field differential game under partial information .....                      | 180 |
| <i>G. Saranya, P. Muthukumar</i>                                                                                                        |     |
| Multiple UAV Allocation and Scheduling for Mine Dispensing Missions .....                                                               | 186 |
| <i>Lovesh Goyal, Joel Geroje M</i>                                                                                                      |     |
| Virtual Leader-based Multi-UAV Formation Path Following Guidance Using Vector Field .....                                               | 192 |
| <i>Subham Basak, Satadal Ghosh</i>                                                                                                      |     |
| Prescribed Time Resilient Flocking in Multi-Agent System .....                                                                          | 198 |
| <i>Khushboo Rani, Imran Ali, Anuj Nandanwar, Narendra Kumar Dhar</i>                                                                    |     |
| Event-Triggered Polynomial Model Predictive Control for Multi-Agent Navigation .....                                                    | 204 |
| <i>Harini V, Anusree Rajan, Pavankumar Tallapragada</i>                                                                                 |     |
| A Differential Game Approach to Collision-Aware Multi-Agent Target Defense in 3D UAV Systems .....                                      | 210 |
| <i>Vijaysubramanian S., Yalla Ananda Kumar, Sharad Kumar Singh</i>                                                                      |     |
| Decentralized Multi-Robot Path Planning with Adaptive Diffusion Convolution Mechanism .....                                             | 216 |
| <i>Velamala Rahul, Deepak Mishra, Sourav Bhowmick</i>                                                                                   |     |
| Enhanced Hankel DMDc System Identification through Noise-Normalized Total Least Squares .....                                           | 222 |
| <i>Balakumaran Swaminathan, Joel George Manathara</i>                                                                                   |     |
| Sensor Importance towards Observability Degree via Shapley Values .....                                                                 | 228 |
| <i>Vishal Chalapadi Ravindra</i>                                                                                                        |     |
| Sparse Structure Learning via ADMM in Networks Obeying Conservation Laws .....                                                          | 234 |
