Volume 13666

Proceedings of SPIE 0277-786X, V. 13666

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Remote Sensing for Agriculture, Ecosystems, and Hydrology XXVII*, edited by Christopher M. Neale, Antonino Maltese, Charles R. Bostater Jr., Alexandre Castagna, Proc. of SPIE 13666. Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510692718
ISBN: 9781510692725 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MARINE SENSING I

- 13666 02 **Diachronic analysis of vegetation dynamics in the Stagnone di Marsala Lagoon through satellite images (Invited Paper)** [13666-1]
- 13666 04 **Comparison of multispectral and hyperspectral LWIR imaging for the detection and quantification of volatile HNS in the marine environment (Invited Paper)** [13666-3]

MARINE SENSING II

- 13666 05 **IWS - Internal Waves Service: a world-first repository for planetary-scale internal solitary waves monitoring (Invited Paper)** [13666-4]
- 13666 06 **Remote sensing technology utilized by CHS to support safety of navigation in the Arctic** [13666-5]
- 13666 07 **Bathymetry mapping using the high resolution VEN μ S satellite: an easy-to-transfer estimation over Glorioso Islands** [13666-6]
- 13666 08 **Satellite-based scalable and operational monitoring of water quality and benthic habitats for environmental sustainability (Best Student Paper Award)** [13666-7]

MARINE SENSING III

- 13666 09 **Mapping submerged vegetation in very shallow-water environments using unmanned surface vehicle (USV): Kaiafas Lagoon case study, W. Peloponnesus, Greece (Invited Paper)** [13666-9]
- 13666 0A **El Niño–Southern Oscillation (ENSO) 2022–2024 in the ocean and coast of the Central Mexican Pacific** [13666-8]
- 13666 0B **Fetch modeling for littoral water wave glint correction using WorldView-3 satellite imagery** [13666-74]

UAV REMOTE SENSING FOR PRECISION AGRICULTURE AND ECOSYSTEMS

- 13666 0C **Pairing multiple remote sensors for crop management and agricultural sustainability** [13666-13]

- 13666 OD **DART-simulated sensitivity analysis of UAV solar-induced chlorophyll fluorescence imaging measurements** [13666-14]
- 13666 OE **High-accuracy UAS imagery for the estimation of olive tree canopy volume** [13666-15]

HYPERSPECTRAL IMAGING AND PROCESSING ENVIRONMENTAL MONITORING

- 13666 OG **Monitoring vineyard microclimate using decadal satellite thermal infrared time series** [13666-18]
- 13666 OH **Earth observation hyperspectral remote sensing in agriculture: capacity building experience within the Horizon Europe EXPERT project between ASI, DLR, and ROSA space agencies** [13666-19]
- 13666 OI **Machine-learning-based detection and severity estimation of drought stress in plants using hyperspectral imaging data** [13666-20]
- 13666 OJ **Sustainable synthesis of doped blue-emissive carbon nanoparticles for environmental sensing applications** [13666-21]

SYNTHETIC APERTURE RADAR (SAR) FOR SOIL AND AGRICULTURE MONITORING

- 13666 OL **Integrating optical and synthetic aperture radar (SAR) satellite data for advanced rice yield estimation: a case study in Suphan Buri, Ang Thong, and Chai Nat, Thailand** [13666-23]
- 13666 ON **A framework for mapping cropping pattern using time series Earth observation data** [13666-27]

HIGH SPATIAL RESOLUTION FOR LAND AND WATER MONITORING

- 13666 OQ **Ultra-wide agricultural remote sensing satellite and its multispectral remote sensing applications** [13666-29]
- 13666 OS **Naiad: novel agentic intelligent autonomous system for inland water monitoring** [13666-32]

EVAPOTRANSPIRATION AND ENERGY BALANCE IN CLIMATE RESEARCH

- 13666 OV **Monitoring tea plantation growth patterns in Assam using time series multi-spectral imagery** [13666-35]
- 13666 OW **Black carbon impact on snow and vegetation interactions affecting environmental feedback loops and climate change** [13666-36]
- 13666 OX **A framework for estimating daily crop water requirements in long-established tea gardens** [13666-37]

LIDAR FOR ENVIRONMENTAL AND AGRICULTURAL APPLICATIONS

- 13666 0Y **Profiling of marine plastic litters by laser-diode-based fluorescence (LD-fluoro) LiDAR with machine learning** [13666-38]
- 13666 0Z **Mapping of small farming plots using remote sensing and regional statistical surveys** [13666-39]
- 13666 10 **Using multisource and multiscale remote sensing data for miscanthus and switchgrass yield and biomass production estimation** [13666-40]
- 13666 11 **Remote sensed images for prediction of stem water potential in olive groves** [13666-41]
- 13666 12 **Evaluation of full-waveform bottom return extraction in whitewater rapids using bathymetric LiDAR** [13666-42]

MACHINE LEARNING AND DEEP LEARNING FOR REMOTE SENSING

- 13666 13 **Towards integrated approach for soil salinity assessment using remote sensing and process-based salt accumulation modelling** [13666-44]
- 13666 14 **Hyperspectral classification of tree species for precision water management in Mediterranean agriculture** [13666-46]
- 13666 15 **Advancing flood susceptibility forecasting using multiple machine learning models and remote sensing** [13666-48]

REMOTE SENSING FOR CLIMATE AND ENVIRONMENTAL MONITORING

- 13666 16 **Aggregate effects of density and black carbon content variations on the hyperspectral reflectance of snow under natural conditions** [13666-49]
- 13666 17 **The impact of land use classification accuracy on computing landscape metrics for health risk and agricultural models** [13666-50]
- 13666 18 **Non-centrifugal cane sugar (NCS) crop monitoring through remote sensing time series in Colombia** [13666-51]
- 13666 19 **Integrating Sentinel-1 and Sentinel-2 derived parameters for wetland carbon modelling in the Grassland Biome of South Africa** [13666-52]

ADVANCED REMOTE SENSING TECHNIQUES FOR AGRICULTURE AND HYDROLOGY

- 13666 1A **Addressing climate-induced aridity in vineyards through a data-driven approach based on open-access EO: the case study of Negramaro in the Puglia region** [13666-53]

- 13666 1B **Estimation of soil roughness in agricultural areas by remote sensing** [13666-54]
- 13666 1F **Satellite-based monitoring of chlorophyll-a and sea surface temperature for identifying potential fishing zones (PFZs) for Hilsha fish: a case study in the Bay of Bengal** [13666-10]

POSTER SESSION

- 13666 1G **Quantitative analysis of benthic macroinvertebrate–sediment relationships in tidal flats using ultra-high-resolution UAV data** [13666-16]
- 13666 1J **Marine hazardous and noxious substances spill monitoring: an experimental approach to hyperspectral remote sensing and clustering techniques** [13666-61]
- 13666 1K **Improving timeliness and accuracy of daily gap-free satellite sea surface salinity using a self-supervised deep neural network** [13666-62]
- 13666 1L **Performance evaluation of ship detection using the 250m Geostationary Ocean Color Imager-II (GOCI-II)** [13666-63]
- 13666 1M **Tracking tidal creek boundary migration in tidal flats using KOMPSAT imagery and airborne LiDAR DSMs** [13666-64]
- 13666 1U **A new improved mixed water index method: a case study of the Three-River Source Region** [13666-72]
- 13666 1V **3D fruit orchard reconstruction and geometric parameter estimation using LiDAR-based SLAM systems** [13666-73]
