Volume 13667

Proceedings of SPIE 0277-786X, V. 13667

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors, Systems, and Next-Generation Satellites XXIX*, edited by Sachidananda R. Babu, Arnaud Hélière, Tomoyuki Urabe, Proc. of SPIE 13667, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

EUROPEAN MISSIONS

- 13667 04 **ALTIUS atmospheric limb sounding mission: spectral filters calibration and flight instrument integration** [13667-2]
- 13667 05 **The ESA ALTIUS instrument model for spectral performance assessments** [13667-3]
- 13667 07 **A versatile Fourier transform spectrometer model for Earth observation missions** [13667-7]
- 13667 08 **EE-11 candidate mission CAIRT: an overview of the Phase 0 and A System studies** [13667-8]

US MISSIONS

- 13667 0B **Hyperspectral design of the Ocean Color Instrument on the NASA PACE mission and its significance for science** [13667-10]
- 13667 0C **Hyperspectral calibration of OCI and on-orbit results** [13667-11]

CHIME MISSION I

- 13667 0G **CHIME's end to end simulator (CHEES): simulating, testing and generating hyperspectral products** [13667-15]
- 13667 0H **CHIME's Hyperspectral Imager (HSI): status of instrument design and performance at CDR** [13667-16]
- 13667 0I **Copernicus CHIME's imaging spectrometer: technologies, performances, and perspectives** [13667-17]

CHIME MISSION II

- 13667 0J **CHIME development for hyperspectral imaging: overcoming data volume and processing challenges** [13667-18]
- 13667 0K **CHIME calibration concept** [13667-19]

- 13667 OL **Geolocation error impact on retrieval uncertainty: a new algorithm for high-resolution Earth observation missions** [13667-20]

JAPANESE MISSIONS I

- 13667 OM **Overview of satellite-based Earth observation missions in Japan (Invited Paper)** [13667-21]
- 13667 ON **High resolution and high frequency 3D Earth observation satellite system** [13667-22]
- 13667 OO **Conceptual design of LiDAR altimeter satellite system** [13667-23]
- 13667 OP **Development status of MOLI project** [13667-24]
- 13667 OQ **Development of next generation GRUS: a medium-resolution Earth observation constellation for multipurpose applications** [13667-25]

JAPANESE MISSIONS II

- 13667 OR **Post-launch operational results and current status of ALOS-4 (Invited Paper)** [13667-26]
- 13667 OS **A feasibility study of estimating horizontal wind using Doppler velocity observation by airborne precipitation radar** [13667-27]
- 13667 OT **The development status of precipitation measuring mission (PMM): the next generation rain mission** [13667-28]

JAPANESE MISSIONS III

- 13667 OV **Greenhouse gas observations by GOSAT series** [13667-30]
- 13667 OW **Development and ground performance evaluation of the TANSO-3 for the GOSAT-GW satellite** [13667-31]
- 13667 OX **Current status and in-orbit calibration plan of TANSO-3 onboard GOSAT-GW** [13667-32]
- 13667 OY **Overview and updates for launch of the GOSAT-GW/AMSR3** [13667-33]
- 13667 OZ **Status of GCOM-C/SGLI during the post-routine operations phase** [13667-34]

FOCAL PLANE AND TECHNOLOGIES

- 13667 11 **Radiation-hardened HV Bias and Clock Drivers for next-generation CMOS TDI detector**
[13667-35]
- 13667 12 **Design of a selective focal plane array for hyperspectral long-wave infrared sensing**
[13667-36]
- 13667 13 **Latest developments of SWIR detectors for space applications at LYNRED** [13667-37]
- 13667 14 **Optical and photometric designing for space-based ultra-lightweight electro-optical telescopic systems with an optically-sparse non-uniform-sized segmented primary aperture mirror** [13667-38]

SMALL SATELLITES I

- 13667 16 **On-board SAR imaging and higher processing demonstration in collaboration with QPS-SAR satellite and JAXA software platform** [13667-41]
- 13667 17 **Overview of the small hyperspectral satellites development project** [13667-42]
- 13667 18 **Evaluation and improvement of the imaging quality of four on-orbit satellites based on the joint Lunar observation** [13667-43]
- 13667 19 **The design of a highly integrated and open architecture micro-satellite (Invited Paper)**
[13667-44]

SMALL SATELLITES II

- 13667 1A **Latest status of small SAR satellite constellation** [13667-46]
- 13667 1C **Tiny Telescope: reaching diffraction limited resolution imaging with a single optical element**
[13667-50]

ON-GROUND AND IN-ORBIT CALIBRATION

- 13667 1F **Observation status in orbit for first one year of the EarthCARE Cloud Profiling Radar**
[13667-53]
- 13667 1G **Artificial intelligence radiometric calibration for infrared and microwave remote sensing satellite** [13667-54]
- 13667 1H **Spectral reconstruction method to analyze a double absorption dip of CO₂ around 4.3 μ m in a static modulated Fourier-transform spectrometer** [13667-56]

POSTER SESSION

- 13667 1J **Development of a deployable baffle for CubeSat star trackers actuated by shape memory alloy wires** [13667-59]
- 13667 1K **Formosat-8A focal plane assembly performance** [13667-60]
- 13667 1L **Wide field-of-view biaxial FMCW LiDAR with high-speed detection utilizing a photoreceiver based on static unitary detector technique** [13667-61]
- 13667 1M **IUVR: a compact imaging ultraviolet radiometer for satellite-based atmospheric limb radiation monitoring** [13667-62]
