Volume 13670

Proceedings of SPIE 0277-786X, V. 13670

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence and Image and Signal Processing for Remote Sensing XXXI*, edited by Lorenzo Bruzzone, Francesca Bovolo, Fabio Bovenga, Proc. of SPIE 13670, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

PANSHARPENING, PRE-PROCESSING, RESTORATION

- 13670 02 **A proposal for full-scale processing and assessment of MS pansharpening** [13670-1]
- 13670 03 **Two-channel image reconstruction from single-sensor data using optimized spatial light modulators** [13670-2]
- 13670 04 **Infrared-guided generative network for paired low-light image enhancement** [13670-4]

CLASSIFICATION AND ANALYSIS OF HYPERSPECTRAL IMAGES

- 13670 06 **Multimodal analysis of hyperspectral images from HYPSONO-1/2 cube satellites** [13670-6]
- 13670 07 **Synthesis of PRISMA data from Landsat 8 or 9 data using machine learning tools** [13670-8]
- 13670 08 **Accurately simulating spectral remote sensing scenes for machine learning applications** [13670-9]
- 13670 09 **A multitask spectral-spatial multiscale network for hyperspectral image classification** [13670-10]

SEMANTIC SEGMENTATION AND CLASSIFICATION

- 13670 0A **CyCoRS: a self-supervised representation learning method for radar sounder data analysis** [13670-11]
- 13670 0B **Enhanced-RSMamba: state space model for semantic segmentation of remote sensing images** [13670-12]
- 13670 0C **Performance evaluation of deep learning techniques for remote image classification** [13670-58]
- 13670 0D **Onboard conformal prediction for domain shift in Earth observation** [13670-14]
- 13670 0E **Rate-distortion trade-off for learned semantic compression for remote sensing platforms** [13670-15]

SEMANTIC SEGMENTATION AND IMAGE ANALYSIS

- 13670 OF **Enhancing land cover classification with data augmentation in multispectral aerial imagery** [13670-16]
- 13670 OH **Spectral-temporal feature analysis for vegetation classification using Sentinel-2: a comparison of XGBoost, random forest, and neural network** [13670-18]
- 13670 OI **Infrared-visible image fusion method based on gated transposed transformer and cascaded cross attention** [13670-19]
- 13670 OJ **Temporal analysis of floods using the ConvLSTM network for multisource data classification (Best Student Paper Award)** [13670-57]

TARGET DETECTION AND SIMULATION

- 13670 OK **Oriented object detection in remote sensing imagery using active label selection strategy** [13670-21]
- 13670 OL **MDHA-YOLO: multiscale dense nested interaction network with hybrid attention for infrared small UAV target detection** [13670-22]
- 13670 OM **Deep learning-based detection of rooftop photovoltaic panels using high-resolution remote sensing imagery** [13670-23]
- 13670 ON **Physics-informed AI for real-time quantification of methane emissions using optical gas imaging** [13670-24]
- 13670 OO **A multilayer simulation method for distributed polarimetric radar sounder architectures** [13670-25]

CHANGE DETECTION

- 13670 OP **Mapping intra-annual integrated crop-livestock systems in Mato Grosso using deep learning and MODIS time series** [13670-26]
- 13670 OQ **Intra- and inter-annual analysis of remote sensing time series with multitask learning** [13670-27]
- 13670 OR **ReFUJetNet: a deep learning framework for optical and SAR change detection utilizing a remote-sensing foundation model, Gabor jet, and multistage CNN** [13670-28]
- 13670 OS **Enabling real-time wildfire detection through edge AI onboard CubeSat platforms** [13670-29]
- 13670 OT **Multimodal sensor fusion for resilient perception: combining radar and imaging for all-weather object tracking** [13670-30]

MICROWAVE REMOTE SENSING I

- 13670 0U **Towards robust micro-motion estimation in bistatic and distributed SAR using extended Kalman filtering** [13670-31]
- 13670 0V **Assessment of regression models for retrieving biophysical vegetation parameters from Sentinel-1 SAR data: a case study on a citrus farm in Colombia** [13670-51]
- 13670 0Y **Methodology based on multitemporal SAR Interferometry for the detection of ground displacement in tropical regions** [13670-35]

MICROWAVE REMOTE SENSING II

- 13670 0Z **Advances in SAR speckle filtering using a CNN and simulated training data** [13670-36]
- 13670 11 **An empirical model for the shape parameter of K distribution in radar sea clutter at low grazing angles** [13670-38]

POSTER SESSION

- 13670 13 **Simulation and analysis of space-time correlated spiky sea clutter with KK distribution** [13670-41]
- 13670 14 **Landslide surface motion monitoring from satellite data and compared with potential European Ground Motion Service** [13670-42]
- 13670 15 **Development of a prototype tool for high-performance surface displacement estimation based on the ICOPS-2 and MintPy** [13670-43]
- 13670 16 **Monitoring ground displacement in the Aegean region (Hellenic Arc)-based InSAR analysis** [13670-44]
- 13670 17 **Multibranch generative adversarial network for noise reduction in SAR imagery** [13670-45]
- 13670 1A **Interferogram combination from stepped interferometry in a static modulated Fourier-transform spectrometer for enhanced selective performance** [13670-48]
- 13670 1B **Imagery simulation of space-borne multispectral sensors via reflectance characteristic modeling of Earth surface** [13670-49]
- 13670 1C **Context-based low-light image enhancement via multiscale neural implicit representation** [13670-50]
- 13670 1D **Image reconstruction for wavefront sensing based on ghost imaging and deep learning** [13670-52]

- 13670 1E **Multimodal image fusion based on semantic guidance and multitask synchronous optimization** [13670-53]
- 13670 1H **Heterogeneous object-level change detection based on spatial-channel decoupling downsampling and diverse branch structure** [13670-56]
