**Volume 13671**

Proceedings of SPIE 0277-786X, V. 13671

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Earth Resources and Environmental Remote Sensing/GIS Applications XVI*, edited by Karsten Schulz, Ulrich Michel, Konstantinos G. Nikolakopoulos, Valerio Gagliardi, Ana C. Teodoro, Proc. of SPIE 13671, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510692817

ISBN: 9781510692824 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

ix *Conference Committee*

---

## HAZARD MITIGATION GEOLOGIC APPLICATIONS

---

- 13671 03 **The role of Earth observation (EO) data and artificial intelligence (AI) techniques in mining exploration** [13671-1]
- 13671 04 **Mineral mapping using Spectral Angle Mapper on multisensor remote sensing data** [13671-2]
- 13671 05 **Remote sensing mapping for sustained development of a geosite: the case of Falakra, Limnos Greece** [13671-3]

---

## REMOTE SENSING TO CIVIL AND ENVIRONMENTAL APPLICATIONS I

---

- 13671 07 **Digital twins for predictive maintenance of road pavements using self-sensing asphalt materials: laboratory assessment** [13671-5]
- 13671 08 **A digital-based approach for efficient and reliable bridge inspections using non-destructive technologies (Best Student Paper Award)** [13671-6]
- 13671 09 **IoT-based system for traffic load monitoring using self-sensing asphalt mixtures** [13671-7]
- 13671 0A **Real-time LiDAR applications for assessing the safety of vulnerable road users at urban intersections** [13671-8]
- 13671 0B **Magnetically responsive asphalt materials for smart infrastructure: characterization and potential in remote sensing applications** [13671-9]

---

#### REMOTE SENSING TO CIVIL AND ENVIRONMENTAL APPLICATIONS II

---

- 13671 0C **Civil and environmental engineering applications: the Italian Space Agency's contribution to innovation in the downstream sector** [13671-10]
- 13671 0D **Remote sensing data and GIS tools for detecting surface urban heat islands: the MIRIFICUS project** [13671-11]
- 13671 0E **Joint processing of Sentinel-2 and PRISMA data for monitoring urban areas (TUS:CAN Project)** [13671-12]
- 13671 0F **MODISAT: satellite technology-derived displacement measurements for smart monitoring of bridges** [13671-13]
- 13671 0G **Democratization of Earth observation (DEM-EO): an integrated web-based solution for critical infrastructure and environmental monitoring** [13671-14]

---

#### REMOTE SENSING TO CIVIL AND ENVIRONMENTAL APPLICATIONS III

---

- 13671 0H **GARMOSAT: an experimental approach for the creation of operational procedures and decision support tools for investigation of GHG emissions from urban landfills using remote sensing data by Copernicus Constellation and ASI PRISMA with ground truth measurements validation** [13671-15]
- 13671 0I **Rheticus® Safeway: an operational EO satellite monitoring service for infrastructure maintenance support** [13671-16]
- 13671 0J **Integrating multi-resolution Earth observation and ground-based data for enhanced coastal and mangrove monitoring in Kenya** [13671-17]
- 13671 0K **Enhancing hydraulic risk assessment using next-generation satellite remote sensing: the RESCUE\_SAT project** [13671-18]
- 13671 0L **Estimation and integration of 3D PS-InSAR data for enhanced structural health interpretation using BIM-based models** [13671-19]

---

#### REMOTE SENSING FOR ARCHAEOLOGY, PRESERVATION OF CULTURAL AND NATURAL HERITAGE

---

- 13671 0M **Monitoring Hurst Castle's structural changes: a case study using satellite remote sensing and multi-temporal analysis** [13671-20]
- 13671 0N **Transforming history through digitization and 3D heritage replication** [13671-21]
- 13671 0O **Innovative methods for monitoring cultural heritage affected by climate change by enhancing visitor experience** [13671-22]

---

#### PROCESSING METHODOLOGIES I

---

- 13671 OP **Remote sensing-based geospatial assessment of carbon sequestration by forested areas** [13671-24]
- 13671 OQ **Transformer-based lossy hyperspectral satellite data compression** [13671-25]
- 13671 OR **Retrieval and evaluation of surface reflectance from Chinese GF5 01A hyperspectral imager** [13671-27]
- 13671 OS **The ecological vulnerability assessment and driving factor analysis of the Taihang Mountain area based on the SRP framework** [13671-47]

---

#### PROCESSING METHODOLOGIES II

---

- 13671 OT **High-resolution thermal sharpener supported by generative techniques: case study in Perth, Australia** [13671-28]
- 13671 OU **Pipeline for synthetic remote sensing data generation using Unreal Engine** [13671-29]
- 13671 OV **High quality synthetic particle data: simulating dust, smoke, and fog in Unreal Engine (Best Student Paper Award)** [13671-30]
- 13671 OW **Assessment of the urban heat island (UHI) effect in Perth, Australia (2000–2024)** [13671-31]

---

#### ENVIRONMENTAL MONITORING CONCEPTS I

---

- 13671 OX **Detection of water pipeline leakages using high-resolution satellite imagery and auxiliary ground data in Cyprus: case study of community councils of Doros and Monagri** [13671-32]
- 13671 OY **Spectral mapping of beach minerals along the northwest Iberian Atlantic coast using Sentinel-2 imagery** [13671-33]
- 13671 OZ **Classification of green stormwater infrastructure using machine learning and high-resolution satellite remote sensing** [13671-34]
- 13671 IO **Study on the impact of photovoltaic power stations on vegetation in Hainan Prefecture** [13671-35]

---

## ENVIRONMENTAL MONITORING CONCEPTS II

---

- 13671 12 **Technical and business viewpoints for the management of remote sensing data in emission monitoring** [13671-37]
- 13671 13 **Assessment of 'invisible' but 'crucial' green water resources for better quantification of the planet's water reserves, thanks to Earth observation** [13671-38]
- 13671 14 **Monitoring methane emissions at Hassi Messaoud from 2021 to 2024 using CH4 Sentinel and integrated methane inversion: assessing Algeria's progress toward its 2030 GHG reduction target** [13671-39]
- 13671 15 **Radiometric principles and field validation of AGNI: a bi-spectral OGI system for real-time flare efficiency monitoring** [13671-40]

---

## EARTH OBSERVATION USING GEE AND AUTOMATED METHODOLOGIES

---

- 13671 16 **On-demand landslide tracking: an automated processing routine as part of the Greek National Satellite Space Project** [13671-41]
- 13671 17 **NeuenahrFlood dataset and an improved human-in-the-loop strategy for efficient flood water segmentation** [13671-42]
- 13671 18 **Characterization of wildfire severity using deep learning and satellite time series analysis** [13671-45]
- 13671 19 **Novel application of hyperspectral indices and payment for ecosystem services policy for forest fire susceptibility mapping in eastern Maharashtra** [13671-48]

---

## POSTER SESSION

---

- 13671 1C **EGMS: from space measurements to deformation interpretation and analysis** [13671-49]
- 13671 1D **Investigating Pléiades imagery for high-resolution topographic analysis in alpine headwater zones** [13671-50]
- 13671 1E **Segmenting orthophoto generated from drone images and integrating geospatial information for the Noto-earthquake-induced road damage recognition** [13671-51]
- 13671 1F **Administrative borders and environmental change: a GIS and remote sensing approach to understanding forest fires in disputed territories** [13671-52]
- 13671 1H **Preliminary assessment of Sentinel-2 data for shallow waters' bathymetry in Ria de Vigo, Spain** [13671-54]
- 13671 1I **Photopolymer based holographic optical elements for shaping and redirecting LED light** [13671-55]

- 13671 1K **The role of active remote sensors for geological studies: a preliminary review** [13671-57]
- 13671 1L **Remote sensing for rare earth element exploration: a case study in Galicia, Spain**  
[13671-58]
- 13671 1M **Employing remote sensing data for detection of unregulated landfills around Stolipinovo district, Plovdiv province, Bulgaria** [13671-59]
- 13671 1N **Integrating Earth observation for the precise monitoring of novel farming systems and water harvesting techniques to address extreme drought in the Mediterranean region, including saline and drought-resilient species: WaterMellon Project** [13671-60]
- 13671 1O **Tracking vegetation shifts in Bakhira Wildlife Sanctuary: a remote sensing approach to climate-driven wetland change** [13671-62]
- 13671 1R **A low-cost method for ore identification using a magnetic susceptibility sensor: a case study on magnesite** [13671-65]
