Volume 13675

Proceedings of SPIE 0277-786X, V. 13675

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers and Technologies for Optical Countermeasures III*, edited by Marc Eichhorn, Gareth D. Lewis, Proc. of SPIE 13675, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SPECIAL TOPIC: UAV COUNTER-SENSOR AND COUNTER-PLATFORM LASERS

- 13675 02 **A laser weapon demonstration to counter small UAS: lessons learned** [13675-1]
- 13675 03 **High-power 2 μm laser: from the laser-matter effect on UAVs to the development of a fiber laser source** [13675-3]
- 13675 04 **Further steps towards modelling the effects of a high-energy laser beam on drone structures** [13675-2]
- 13675 05 **Validation of directed energy laser simulation and evaluation of HEL weapon thermal impacts on UAV with MuSES** [13675-4]
- 13675 06 **Actively pulse-shaped 2 mJ, 200 W fiber MOPA at 2048 nm for mid-IR generation in OPOs (Invited Paper, Best Student Paper Award)** [13675-6]

LASER TYPES AND LASER ARCHITECTURES SUITABLE FOR POWER SCALING

- 13675 07 **Pulsed high-power thulium-doped all-fibre laser** [13675-9]

OPTICAL COUNTERMEASURES

- 13675 08 **Measuring shooting performance under laser dazzle using commercial dry fire training systems** [13675-13]
- 13675 09 **Evaluating laser dazzling effects using an updated shooting simulator: insights from eye tracking and EEG** [13675-15]
- 13675 0A **Microcontroller-based pulse coding of quantum cascade lasers for infrared countermeasures and communication** [13675-16]

LASER PROPAGATION

- 13675 0B **Pulsed scattering events during HEL atmospheric propagation** [13675-19]
- 13675 0C **High-energy laser performance loss under atmospheric extinction** [13675-20]
