Volume 13679

Proceedings of SPIE 0277-786X, V. 13679

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence for Security and Defence Applications III*, edited by Hugo J. Kuijf, Radhakrishna Prabhu, Yitzhak Yitzhaky, Proc. of SPIE 13679, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OBJECT DETECTION AND TRACKING I

- 13679 02 **Towards precise subpixel infrared target detection based on AI: an empirical study on SNR limits** [13679-1]
- 13679 03 **Multimodal ship detection using YOLOv11: comparative analysis of SWIR, LWIR, and visible sensors under diverse maritime and environmental conditions** [13679-2]
- 13679 04 **Analysing operational performance of few-shot learning using synthetic data** [13679-3]
- 13679 05 **The impact of burn-in on semi-supervised single-stage object detection on small military datasets** [13679-4]
- 13679 06 **Multi-human motion tracking with transformer network augmentation** [13679-5]
- 13679 07 **Air-to-ground real-time temporal small object detection from a flying platform** [13679-6]

OBJECT DETECTION AND TRACKING II

- 13679 09 **Real-time and robust deep learning object detection based on feature domain adversarial** [13679-12]
- 13679 0A **Anti-AI camouflage for naval vessels** [13679-9]
- 13679 0B **Milliseconds matter: pushing YOLO to the limit for real-time object detection** [13679-10]
- 13679 0C **KOIOS: AI techniques for secure, robust, frugal, resilient, and explainable solutions in defence applications** [13679-11]

OBJECT DETECTION AND TRACKING III

- 13679 0E **Visual breeder and travel document authenticator** [13679-13]
- 13679 0F **Mobile vision systems for security: automating surveillance with scene change detection** [13679-14]
- 13679 0G **Federated object detection for defense and security applications using realistic unbalanced heterogeneous data distributions** [13679-15]

13679 OH **Underwater object detection in forward-looking sonar using a transformer-guided enhancement** [13679-16]

13679 OI **Removing power lines from digital surface models using OSM data** [13679-17]

DETECTION, RECOGNITION, AND IDENTIFICATION

13679 OJ **Face recognition in the wild: augmentation-based robustness against real-world degradations** [13679-20]

13679 OK **Insights into deep learning-based vessel detection and characterization using SAR and AIS data** [13679-21]

13679 OL **Combining global and local vision foundation models for explainable tattoo matching** [13679-23]

13679 OM **A deep-learning framework for concealed and unconcealed face analysis in submillimeter wave imaging (Best Student Paper Award)** [13679-18]

13679 ON **Audio foundation models for gunshot characterization: a self-supervised learning approach** [13679-19]

ADVERSARIAL AI AND COUNTER AI

13679 OO **Can invisible physical events easily fool spiking neural networks?** [13679-24]

13679 OP **Vision transformers: the threat of realistic adversarial patches** [13679-25]

13679 OQ **AutoDetect: designing an autoencoder-based detection method for poisoning attacks on object detection applications in the military domain** [13679-26]

SYNTHETIC AND SIMULATED DATA, GENERATIVE AI

13679 OS **Synthesizing low-frequency active sonar data for automatic target recognition using machine learning** [13679-28]

13679 OU **Predicting pedestrian trajectories in outdoor environments using deep learning methods** [13679-30]

13679 OV **Data augmentation for vehicle detection with diffusion-based object inpainting** [13679-31]

- 13679 0W **Generative AI for novel contexts and controllable dataset creation applied to vehicle detector model training** [13679-32]
- 13679 0X **Prescriptive maintenance for military vehicles using frugal learning** [13679-33]

HUMAN-AI COLLABORATION AND ADVANCES IN AI

- 13679 0Y **Human-AI teaming co-learning in military operations** [13679-34]
- 13679 0Z **A workflow-oriented framework for asynchronous human-AI collaboration in hybrid and compute-intensive HPC environments** [13679-35]
- 13679 10 **Semi-automatic continuous adjustment of person detectors for public transport applications** [13679-36]
- 13679 11 **Efficient representation of 3D spatial data for defense-related applications** [13679-37]

CLASSIFICATION, SEGMENTATION, AND SCENE UNDERSTANDING

- 13679 12 **Improving classification accuracy in post-turbulence-mitigation tasks via perceptual loss optimization** [13679-38]
- 13679 13 **Occlusion robustness of CLIP for military vehicle classification** [13679-39]
- 13679 14 **From bounding boxes to semantic segmentation: leveraging SAM for weak supervision in remote sensing** [13679-42]
- 13679 15 **Intelligent model mining in sensor data for military mission environment representation** [13679-41]

POSTER SESSION

- 13679 17 **Feature selection for enhanced IIoT security: a machine learning approach to intrusion detection** [13679-43]
- 13679 18 **Enhancing financial security with machine learning-based credit card fraud detection** [13679-44]
- 13679 19 **VehicLens: an integrated AI system for vehicle classification and occupant analysis in border security applications** [13679-45]
- 13679 1A **Textual inversion for efficient adaptation of open-vocabulary object detectors without forgetting** [13679-46]
- 13679 1C **An AI-powered framework for streamlined image and audio annotations** [13679-48]

- 13679 1D **AI-enabled detection of vessels in distributed acoustic sensing (DAS) data using submarine fiber-optic cables** [13679-49]
- 13679 1E **Adaptive e-learning for image analysts: an xAPI-driven performance framework** [13679-50]
- 13679 1G **Frequency-domain transformation of audio signals for image-based encoding schemes** [13679-53]
- 13679 1H **Feature fusion for unified adversarial attack detection for object detection** [13679-54]
- 13679 1I **AI-enhanced imaging and multimodal detection of rare-earth fluorescence-based security features for document authentication and border control** [13679-55]
