Volume 13711

Proceedings of SPIE 0277-786X, V. 13711

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Lasers, High-Power Lasers, and Applications XVI*, edited by Shibin Jiang, Zhaoyang Li, Ingmar Hartl, Proc. of SPIE 13711, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Symposium Committees*
- xi *Conference Committee*

LASER TECHNOLOGY FOR LARGE FACILITY AND APPLICATION

- 13711 04 **Modeling the impact of compressor diffraction grating defects on the quality of femtosecond laser beams and possibilities for their correction** [13711-3]

ULTRAFAST LASERS AND APPLICATIONS

- 13711 06 **Development of freely controllable optical frequency comb based on ultrashort pulse fiber laser for highly sensitive spectroscopy applications (Invited Paper)** [13711-5]

ULTRAFAST AND ADVANCED SOLID-STATE LASERS I

- 13711 0B **Ultra-large-mode-area Tm-doped antiresonant tapered fiber design for high-power 2.3 μm laser (Invited Paper)** [13711-10]
- 13711 0D **Generation of burst-mode pulse in thulium-doped fiber laser based on MoS₂ passive Q-switching and pump modulation technology** [13711-12]

ULTRAFAST AND ADVANCED SOLID-STATE LASERS II

- 13711 0G **Reducing ASE in thin-disk lasers through optimization of the active element-heatsink interface** [13711-14]

ULTRAFAST AND ADVANCED SOLID-STATE LASERS III

- 13711 0I **High-performance ultrafast Raman fiber laser based on nonlinear optical gain modulation (Invited Paper)** [13711-17]
- 13711 0J **Dynamic saturable absorber-enabled high-performance fiber laser (Invited Paper)** [13711-18]
- 13711 0L **Dynamic process simulation and experimental investigation of 1st- and 2nd-Stokes dual-wavelength cascaded Raman laser** [13711-20]

ULTRAFAST AND ADVANCED SOLID-STATE LASERS IV

- 13711 0M **Long-wave mid-infrared ultrashort laser pulse generation based on two-color fiber CPA: experiment, modeling, and extended study (Invited Paper)** [13711-21]
- 13711 0N **Narrow-band lasing in a random distributed feedback fiber laser with embedded SNAP microresonator** [13711-22]
- 13711 0O **Simplified superresolution spectroscopy with random Raman fiber laser** [13711-23]

ULTRAFAST AND ADVANCED SOLID-STATE LASERS V

- 13711 0Q **High-repetition-rate 2.4 W picosecond 213-nm deep ultraviolet light generation at 81 MHz (Invited Paper)** [13711-25]
- 13711 0S **All-fiber narrow line 1.6 mJ/9 ns high-power MOPA system with spun Yb-doped tapered fiber** [13711-28]

SPATIOTEMPORAL CONTROL OF POWER LASERS

- 13711 0T **Over-600th-order HG mode laser and LG vortex beam based on off-axis pumping (Invited Paper)** [13711-29]

LASER ELEMENTS AND MATERIALS

- 13711 0W **In situ detection of laser-induced damage onset by photoacoustic spectroscopy** [13711-33]

POSTER SESSION

- 13711 0Z **Beam cleaning effect in multimode fiber tapered amplifier with CW single-frequency seed** [13711-27]
- 13711 11 **A rapid pulse shaping method for large-scale laser facilities** [13711-38]
- 13711 12 **0.42 mJ linearly polarized pulsed single-frequency fiber amplifier at 1550 nm based on pre-shaped seed pulse** [13711-39]
- 13711 13 **Experimental study on high-power laser scanning irradiation of granite** [13711-40]
- 13711 14 **Nonlinear refractive index-based temporal overlap detection for supercontinuum pump-probe spectroscopy** [13711-41]
- 13711 15 **Wavefront precompensation technology of high-energy lasers** [13711-42]

- 13711 17 **Increasing bandwidth of thick crystal SHG-FROG via spectral correction and trace truncation** [13711-44]
- 13711 18 **CW Laser damage effect of A-type sandwich antenna cover material under tangential airflow** [13711-45]
- 13711 19 **Evaluation of the output properties of an end-pumped mixed K-Rb-Cs vapor laser** [13711-46]
