Volume 13713

Proceedings of SPIE 0277-786X, V. 13713

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Laser Processing and Manufacturing IX*, edited by Minghui Hong, Ting Huang, Yuji Sano, Jianhua Yao, Proc. of SPIE 13713, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Symposium Committees*
- ix *Conference Committee*

LASER PROCESSING AND MANUFACTURING

- 13713 03 **Research on welding processes and performance characterization of 1060 aluminum alloy based on ultrafast laser** [13713-2]
- 13713 05 **Study on the effect of ultrashort laser shock peening on the microstructure and mechanical properties of TB6 titanium alloy** [13713-4]
- 13713 06 **High-precision micrometer-level homogenized light spot laser repair technology for mini LED displays** [13713-5]

LASER PROCESS OPTIMIZATION

- 13713 09 **Mild ultrafast laser foaming of poly(lactic acid) via photothermal effects** [13713-9]
- 13713 0A **Preparation of large-area laser roughening structure on magnesium fluoride ceramics: enhancing adhesion at heterogeneous interfaces** [13713-11]
- 13713 0B **The measurement and application of laser-induced graphene nanostructures** [13713-12]

LASER PROCESSING FOR MATERIALS AND DEVICES

- 13713 0C **Si carrier wafer reuse after laser lift-off (LLO) and thermal damage characterization for advanced packaging (Invited Paper)** [13713-13]
- 13713 0D **Femtosecond laser processing of controllable size microcavities in quartz fiber cyanate resin composites** [13713-14]
- 13713 0E **Femtosecond laser burst mode processing for modified layer fabrication in 4H-SiC wafers** [13713-15]
- 13713 0F **Direct metal film-constrained plasma ablation method by femtosecond laser etching of grooves on C-plane single crystal sapphire (C-Al₂O₃)** [13713-34]
- 13713 0G **Magnetic-lens-assisted pulsed laser deposition for microfabrication** [13713-16]
- 13713 0H **Directional bouncing of droplets on femtosecond laser-processed stepped micropillar arrays for self-cleaning and anti-icing** [13713-17]

POSTER SESSION

- 13713 OI **Femtosecond laser radiation patterning of GST thin-film based on structured light** [13713-18]
- 13713 OJ **The mechanisms and patterns of plasma generation during femtosecond laser processing of diamond** [13713-20]
- 13713 OK **Microstructure and tribological performance of a laser cladded Stellite 6/NiF122Fe/WC gradient coating on H13 tool steel** [13713-21]
- 13713 OL **Double-pulse laser peening using near infrared laser** [13713-22]
- 13713 OM **Fabrication of X-ray refractive lenses based on 3D printing** [13713-23]
- 13713 ON **Feedrate-dependent laser power control** [13713-24]
- 13713 OO **Short-pulse CO₂ laser processing for crack repair with initial cracks in borosilicate glass** [13713-25]
- 13713 OP **Crack-free processing of two different thin glasses by short-pulse CO₂ laser with and without pulse tail** [13713-26]
- 13713 OQ **Laser cladding of 316L/WC gradient coatings: crack behavior and stress control** [13713-27]
- 13713 OS **Acoustic signal analysis for evaluating laser peening effectiveness** [13713-29]
- 13713 OT **Study on the mechanism of femtosecond laser ablation of gold thin films based on TTM-MD coupling theory** [13713-30]
- 13713 OU **Effects of multispot laser peening on residual stress distribution** [13713-31]
- 13713 OV **Femtosecond laser modification process of semiconductor silicon carbide wafers** [13713-32]
- 13713 OW **An open control architecture for the application of machine learning methods in laser material processing with galvanometer scanners** [13713-33]

DIGITAL POSTER SESSION

- 13713 OX **Femtosecond laser written high-index contrast low-loss mid-IR waveguides in Suprasil 3001** [13713-19]
