Volume 13715

Proceedings of SPIE 0277-786X, V. 13715

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optoelectronic Devices and Integration XIV*, edited by Xuping Zhang, Baojun Li, Changyuan Yu, Xinliang Zhang, Proc. of SPIE 13715, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Symposium Committees*
- xi *Conference Committee*

OPTOELECTRONIC DEVICES AND INTEGRATION I

- 13715 03 **Subwavelength nanotechnology for broadband modal and power management in silicon photonics (Invited Paper)** [13715-1]

OPTOELECTRONIC DEVICES AND INTEGRATION III

- 13715 0B **A successive variational mode decomposition-based positioning method for asymmetric dual Mach-Zehnder fiber optic sensor** [13715-10]
- 13715 0C **High-resolution spatial responsivity of PureB single-photon avalanche diodes using focused-laser scanning** [13715-11]
- 13715 0D **Real-time and high-accuracy photonic-assisted microwave frequency measurements in random fiber grating array (Invited Paper)** [13715-12]

OPTOELECTRONIC DEVICES AND INTEGRATION IV

- 13715 0K **Bandwidth-tunable dual-wavelength erbium-doped fiber laser based on nonlinear polarization evolution** [13715-19]

OPTOELECTRONIC DEVICES AND INTEGRATION V

- 13715 0O **Hybrid white OLEDs with co-host and sandwich emissive layers for exciton management and enhanced color quality** [13715-31]

OPTOELECTRONIC DEVICES AND INTEGRATION VI

- 13715 0P **Optoelectronic tweezers and digital microfluidics for biomicromanipulation (Invited Paper)** [13715-23]
- 13715 0R **Analysis of crosstalk in 7-core single-mode homogeneous trench-assisted uncoupled multicore fiber with 125 μ m cladding for metro network interconnects** [13715-25]

- 13715 0S **Ripple-free, high-performance DC-DC booster based on integrated optoelectronic devices** [13715-26]
- 13715 0T **Development of a bespoke opensource programme for GHz and THz coaxial delay line phase shifters design utilizing liquid crystal for 5.5G-6G applications and education purposes** [13715-28]

POSTER SESSION

- 13715 0U **A novel low-noise wide-bandwidth transimpedance amplifier for LiDAR applications** [13715-22]
- 13715 0V **Properties of near-field distribution of terahertz wave through subwavelength Cu metal slit with modified surfaces on microchips** [13715-32]
- 13715 0W **Enhanced fast object classification using complementary single-pixel detection** [13715-33]
- 13715 0X **Blur invariants constructed by digital micromirror device for target recognition** [13715-34]
- 13715 0Y **Broadband multifunction grating coupler for efficient fiber-to-chip coupling** [13715-35]
- 13715 0Z **Application potential of miniaturized acoustic arrays in photoacoustic fusion platforms: algorithms and hardware implementation** [13715-36]
- 13715 10 **On-chip high-performance spectrometer based on MRRs** [13715-37]
- 13715 11 **Wavelength demodulation of multitype FBGs based on AWG with cascaded neural network** [13715-38]
- 13715 12 **A design of computational spectrometer based on waveguide grating filters with varied period number** [13715-39]
- 13715 14 **Spectral computational reconstruction algorithm assisted by window-sampled artificial neural network** [13715-41]
- 13715 15 **Hetero-integrated optical beam-forming network for broadband microwave photonics receiver** [13715-42]
- 13715 16 **A deep-learning-based optical fiber sensor for non-invasive electrocardiogram monitoring** [13715-43]
- 13715 18 **Studies on the wideband design of anisotropic acousto-optic deflector with tellurium dioxide crystal** [13715-45]

- 13715 19 **A scheme on optical delay module based on chirped gratings for photonic computing**
[13715-46]
- 13715 1A **Inverse-designed ultra-compact on-chip 1x2 power splitter with low insertion loss**
[13715-47]
