**Volume 13716**

Proceedings of SPIE 0277-786X, V. 13716

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Design and Testing XV*, edited by Yongtian Wang, Tina E. Kidger, Rengmao Wu, Proc. of SPIE 13716, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510693845
ISBN: 9781510693852 (electronic)

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Symposium Committees*
xi *Conference Committee*

**ADVANCED IMAGING TECHNIQUES I**

13716 02 **Plate-corrected adaptive optics relays (Invited Paper)** [13716-1]

13716 04 **Method for fast simulation of ghosts in imaging optical systems** [13716-3]

13716 05 **A hybrid meta-refractive lens for extended field-of-view beam steering** [13716-4]

13716 06 **A general neural network structure based on KAN-transformer for the electromagnetic response prediction of micro/nano-optical devices** [13716-5]

**FABRICATION AND TESTING**

13716 09 **Model-based alignment method for segmented space telescopes using extended beacon** [13716-8]

13716 0A **Precision optical axis alignment optimization approach based on differentiable optics in optical assembly** [13716-9]

13716 0B **Phase retrieval from two-frame random phase-shifted interferograms based on normalized phase-shifting frame insert network** [13716-10]

13716 0C **An optimization method used to measure chromatic aberration with Shack-Hartmann wavefront sensor** [13716-11]

**ADVANCED IMAGING TECHNIQUES II**

13716 0F **Compact high-resolution microscope objective lens with wide field-of-view** [13716-14]

13716 0G **Zoom control and aberration trade-off method for stabilized zoom systems** [13716-15]

**OPTICAL SYSTEM DESIGNS**

13716 0K **Research on chromatic aberration sensitivity-weighted optimization method for freeform surface deformation zoom systems** [13716-19]

**FREEFORM OPTICS**

13716 0M **Freeform optical design: mathematical models and numerical methods (Invited Paper)** [13716-21]

13716 0N **Broadband adaptive illumination with programmable freeform optics** [13716-22]

13716 0O **Janus freeform lens for direction-dependent beam shaping** [13716-23]

13716 0P **Tailoring freeform optics design for extended light source** [13716-24]

13716 0Q **Freeform light control for prescribed wavefronts and irradiances** [13716-25]

**NOVEL DISPLAY TECHNIQUES**

13716 0R **Direct-view retinal projection near-eye display for augmented reality (Invited Paper)** [13716-26]

13716 0S **Addressing color fidelity challenges in holographic displays (Invited Paper)** [13716-27]

13716 0T **Extended depth-of-field stereo imaging method based on high-speed dual cameras with liquid lenses** [13716-28]

13716 0U **Real-time rock-paper-scissors interaction via vision-based recognition and retroreflective midair display** [13716-29]

13716 0V **Novel design and intelligent orthogonal surface optimization of ultrawide-field infrared panoramic imaging system** [13716-30]

**POSTER SESSION**

13716 0W **Generation of orthogonally-polarized dual-wavelength non-reciprocal beams by a bilayer grating** [13716-31]

13716 0X **Curriculum learning strategy for two-frame random phase-shifting interferometry** [13716-32]

13716 0Y **Automatic measurement method of the field-of-view angle and optical axis alignment accuracy of LiDAR** [13716-33]

13716 0Z **Design of multi-object-distance imaging system using hybrid Moiré metalenses and refractive lenses** [13716-34]

13716 10 **Design of a lightweight mid-wave infrared panoramic imaging system** [13716-35]

13716 11 **Real-time minimalist optical system based on a re-parameterization network** [13716-36]

13716 12 **DUV-compatible multifocal metalens design via two-stage adjoint optimization achieving EBL-level efficiency** [13716-37]

13716 13 **Hybrid optimization algorithm for Ronchi lateral shearing interferometry** [13716-38]

13716 14 **Effectiveness evaluation method for the ground satellite station with laser communication capability** [13716-39]

13716 15 **Optimization analysis of star sensor imaging performance based on hybrid imaging system** [13716-40]

13716 16 **Targeted filtering algorithm for batwing effect in white-light microscopic interferometry** [13716-41]

13716 17 **Dynamic star map simulation and deep-learning-based centroiding for star sensors** [13716-42]

13716 18 **Design of progressive addition lenses for myopia control** [13716-43]

13716 19 **The search method for the optimal initial structure of the freeform-prism AR optical system based on ray tracing techniques and global optimization** [13716-44]

13716 1A **Research on imaging and spectral performance of multichannel scene projector for machine vision system test** [13716-45]

13716 1B **Multiple-folding-geometry freeform reflective afocal systems design enabled by deep-learning-based neural network** [13716-46]

13716 1C **Comparative analysis of phase tilted interferometry algorithms in point diffraction interferometer** [13716-47]

13716 1D **Design of a wideband zoom panoramic system with a double-layer diffractive optical element** [13716-48]

13716 1E **Analyzing noise arising from finite source size in double-Ronchi interferometry** [13716-49]

13716 1F **Bringing PMMA freeform optics fabrication to the desktop: a low-cost system based on cold atmospheric plasma etching** [13716-50]

13716 1G **Design and calibration of filter radiometer for spectral radiance measurement** [13716-51]

13716 1H **Extreme ultraviolet lithography projection system design based on third-order aberration theory** [13716-52]

13716 1J **Research on optical detection methods for miniature droplet lens** [13716-55]

13716 1K **Calculation of the entrance pupil contour for image synthesis using the backward ray-tracing method** [13716-56]

13716 1N **A stepwise variable-release implementation method for deformable mirrors** [13716-59]
