PROCEEDINGS OF SPIE

Optoelectronic Imaging and Multimedia Technology XII

Jinli Suo
Zhenrong Zheng
Editors

13–14 October 2025
Beijing, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations
Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Republic of Korea) • Australian and New Zealand Optical Society • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations
China Association for Science and Technology (CAST) (China)
Department of Information of National Nature Science Foundation, China (NSFC) (China)

Volume 13718

Proceedings of SPIE 0277-786X, V. 13718

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optoelectronic Imaging and Multimedia Technology XII*, edited by Jinli Suo, Zhenrong Zheng, Proc. of SPIE 13718, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510693883
ISBN: 9781510693890 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Symposium Committees*
xi *Conference Committee*

SPECTRAL IMAGING I

13718 02 **Multispectral-to-RGB virtual H&E staining of renal cancer tissue using a dual-branch SwinIR-UNet network** [13718-1]

13718 03 **Multispectral road segmentation with spectral attention network** [13718-2]

13718 05 **Real-time hyperspectral imaging and biochemical sensing via explainable optical AI** [13718-4]

13718 06 **All-weather in sensor near-infrared image recognition and feature extraction based on short-term stimulation and long-term depression mechanisms** [13718-54]

COMPUTATIONAL IMAGING AND RECONSTRUCTION

13718 07 **High-performance integral imaging 3D display and acquisition** [13718-55]

13718 09 **Hyperspectral image reconstruction based on spatial-spectral feature fusion with two-branch networks** [13718-6]

13718 0A **Degraded image simulation and experiment for microlens array scanning imaging system** [13718-7]

13718 0B **Estimation method for the medium point-spread function in imaging with complex environmental characteristics** [13718-8]

13718 0C **Large-dynamic high-accuracy wavefront sensing using deep-learning-assisted phase diversity phase retrieval** [13718-9]

ADVANCED OPTICAL SYSTEMS

13718 0D **Considerations of aberrations in high numerical aperture extreme ultraviolet lithography for computational imaging** [13718-10]

13718 0E **Wide-field-of-view multi-layer light-field 3D display based on eye-tracking and square pyramid** [13718-11]

13718 0F **Hybrid multi-layer compressive light-field near-eye 3D display using focus tunable lenses** [13718-12]

SPECTRAL IMAGING II

13718 0J **A mid-infrared computational spectrometer enabled by a PCMs-based thin-film spectral encoder** [13718-16]

DEEP LEARNING AND TARGET DETECTION

13718 0M **Implicit neural representation via MLPs-KANs fusion with spatial-frequency transforms** [13718-22]

POSTER SESSION

13718 0N **Simulation of star fields and classification of disturbance intensity under aero-thermal radiation effects** [13718-24]

13718 0O **Dynamic star simulator technology for modeling hypersonic aerothermal radiation effects** [13718-25]

13718 0P **A ground-based method for dim satellite detection and tracking via adaptive spatiotemporal filtering and trajectory matching** [13718-26]

13718 0R **Generative adversarial network design based on a dual-path snapshot spectral imaging system** [13718-28]

13718 0S **Sparse-view CT reconstruction with an adaptively fused KAN-CNN network** [13718-29]

13718 0T **Robot-guided multi-view point cloud fusion for accurate 3D reconstruction** [13718-30]

13718 0U **Simultaneous global and local anisotropic gradient priors-based method for single image deraining** [13718-31]

13718 0V **2D medical image segmentation based on spectral-spatial dual-branch Transformer U-net** [13718-32]

13718 0W **Design of a thermally robust transmissive EUV focusing element** [13718-33]

13718 0Y **Information-maximizing optical encoder for parameter optimization in multifocal microscopy** [13718-35]

13718 10 **A full-Stokes polarization imaging method using a polarization-multiplexed multifocal metasurface** [13718-37]

13718 11 **Score-guided adaptive mask optimization for sequential compressive spectral imaging** [13718-38]

13718 13 **Investigation of multispectral image registration for the fusion system: comparison between Depth Anything V2 and Design Calibration Board** [13718-40]

13718 14 **Simulation study of single-photon imaging system based on cross-delay line position-sensitive anode MCPs** [13718-41]

13718 15 **Low-light remote sensing image enhancement via deep Retinex network** [13718-42]

13718 17 **Research on real-time face recognition and tracking model based on embedded platform** [13718-44]

13718 18 **An outdoor scene image prediction algorithm based on multi-environmental element fusion** [13718-45]

13718 19 **Research on LiDAR-camera extrinsic calibration methodology via adaptive multi-stage hybrid optimization** [13718-46]

13718 1A **Enhanced 3DGS based on refraction compensation for novel view synthesis in inhomogeneous media** [13718-47]

13718 1B **HDR video reconstruction from events and LDR frames via spatiotemporal attention and exposure compensation** [13718-48]

13718 1C **Research on pedestrian gaze detection in autonomous driving systems** [13718-49]

13718 1D **Occlusion-robust unsupervised disparity estimation with statistical data priors** [13718-50]

13718 1E **Method for recovering texture of diffuse scene objects** [13718-51]

13718 1F **Adaptive block-rooting image enhancement with learnable fusion for surveillance imaging systems** [13718-52]

13718 1G **Disparity reconstruction from light fields based on implicit neural representation of central view image** [13718-53]
