**Volume 13719**

Proceedings of SPIE 0277-786X, V. 13719

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Holography, Diffractive Optics, and Applications XV*, edited by Changhe Zhou, Ting-Chung Poon, Liangcai Cao, Hiroshi Yoshikawa, Proc. of SPIE 13719, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510693906

ISBN: 9781510693913 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- vii *Symposium Committees*
- xi *Conference Committee*

---

## COMPUTATIONAL IMAGING

---

- 13719 03 **Embracing uncertainties in computational imaging (Invited Paper)** [13719-2]
- 13719 05 **Realization of spatial differentiations using acousto-optic modulators: a review (Invited Paper)** [13719-4]

---

## HOLOGRAPHY I

---

- 13719 08 **Holographic video display using liquid crystal panel for 3D printer (Invited Paper)** [13719-7]
- 13719 09 **Phase-controlled tiled holography for accurate speckle sampling and upscaled reconstructions** [13719-8]
- 13719 0A **AI promotes holographic phase recovery** [13719-10]

---

## OPTICAL DATA STORAGE

---

- 13719 0C **Research on low-pass filter size based on double phase holographic storage** [13719-12]

---

## HOLOGRAPHY II

---

- 13719 0D **Phase imaging under off-the-shelf confocal microscopy (Invited Paper)** [13719-85]
- 13719 0E **Holographic strategies for scale-robust 3D face recognition: from Mellin-domain encoding to hybrid optical correlation (Invited Paper)** [13719-13]
- 13719 0G **Synthetic aperture holography for high-resolution patterning** [13719-15]
- 13719 0H **Holographic modal wavefront sensing for adaptive correction of turbulence-induced aberrations in vortex beam** [13719-16]

---

#### MANIPULATION OF OPTICAL FIELD

---

- 13719 OJ **A scalable spatially multiplexed optoelectronic Ising accelerator for large-scale 0-1 Knapsack problems solving (Invited Paper)** [13719-20]
- 13719 OL **Improved phase space sampling analysis for the discrete Bai distribution function** [13719-22]

---

#### MICROSCOPY

---

- 13719 OM **Evaluating GAN-based lens-less digital in-line holographic microscope for common pollen classification (Invited Paper)** [13719-23]

---

#### MEASUREMENT I

---

- 13719 OS **The physical optics method for light scattering by atmospheric dust and ice particles for LIDAR applications (Invited Paper)** [13719-29]
- 13719 OU **Coherence of the bending magnet source at the metrology beamline of NSRL** [13719-31]
- 13719 OV **Research on diffractive wavefront measurement of 2D gratings** [13719-32]

---

#### HOLOGRAPHY III

---

- 13719 OW **Chiral liquid crystals for photonic components (Invited Paper)** [13719-33]
- 13719 OY **Autostereoscopic display of optical scanning holograms (Invited Paper)** [13719-35]
- 13719 OZ **Zero-order removal in on-axis holographic projection using filter-based optimization** [13719-36]

---

#### LASER FABRICATION

---

- 13719 12 **Simulation-based analysis of SAMP-induced morphological defects on the diffraction efficiency of interference lithography masks** [13719-39]
- 13719 13 **Topology-optimized microchannel active cooling for high-power diffraction gratings** [13719-40]
- 13719 14 **Simulation study of holographic lithography for standing wave suppression based on spatial polarization modulation** [13719-41]

---

## OPTICAL COMPUTING AND NEURAL NETWORK

---

- 13719 15 **Deep-learning-driven 3D hologram generation (Invited Paper)** [13719-42]
- 13719 17 **Holotomography in optics and x-ray: advancing 3D imaging with refractive index and dielectric tensor reconstructions (Invited Paper)** [13719-44]
- 13719 1B **Improved spectral filtering of broadband diffractive neural network by loss function engineering** [13719-48]

---

## DIGITAL HOLOGRAPHY

---

- 13719 1D **A location and detection method for shallow layer diseases of murals based on time inversion: digital holography collaboration** [13719-50]
- 13719 1E **Complex-wavelet normalised cross-correlation: a perceptually motivated loss for computer generated holography** [13719-51]
- 13719 1F **High-quality phase-only computer-generated holograms based on the HAPP-Net method** [13719-52]
- 13719 1G **Fluorescence polarimetry for microplastics identification** [13719-53]

---

## META-OPTICS

---

- 13719 1J **CMOS-compatible supercell gratings serving as optical diodes and polarization beam splitters** [13719-56]
- 13719 1L **Coherent lensless diffraction imaging via multicore fiber for label-efficient microplastics characteristic discrimination** [13719-58]

---

## MEASUREMENT II

---

- 13719 1M **A novel subdivision method for enhancing laser interferometer measurement accuracy using holographic light field period** [13719-59]
- 13719 1N **Robust recursive least squares demodulation for one-dimensional reflective dual-grating encoder displacement measurement** [13719-60]
- 13719 1O **Design of a displacement measurement system for acoustic waveguide materials based on reflective off-axis digital holography** [13719-61]
- 13719 1P **Measurement of 2D grating period using pseudo-phase-stepping interferometry** [13719-62]

---

#### DIFFRACTIVE OPTICS I

---

- 13719 1S **Femtosecond laser two-photon 3D structure processing based on computational holography** [13719-65]
- 13719 1T **Effective grating prediction based on the attention mechanism** [13719-70]

---

#### DIFFRACTIVE OPTICS II

---

- 13719 1X **A 1×2 beam splitter grating with 90° phase delay at wavelength 1550nm** [13719-71]
- 13719 1Y **Fabrication of photoresist gratings using dual-beam exposure with substrate rotation control** [13719-72]
- 13719 1Z **Propagation characteristics of two-dimensional picometer comb** [13719-73]
- 13719 20 **Evaluation of two-dimensional grating period based on double least squares iteration** [13719-74]
- 13719 21 **Non-contact defect detection system for large-size gratings based on high-precision displacement stage** [13719-75]
- 13719 22 **Wet cleaning process of large-size diffraction gratings** [13719-76]

---

#### POSTER SESSION

---

- 13719 23 **Decomposing the discrete Bai distribution function for efficient computation** [13719-77]
- 13719 24 **Blind ptychography via implicit neural representation** [13719-78]
- 13719 25 **Fully-complex hologram recognition using neural networks** [13719-79]
- 13719 26 **Local calibration of phase-only spatial light modulators using digital holography** [13719-80]
- 13719 27 **Fabrication of high-precision metrological gratings with fringe-stabilized interference lithography** [13719-81]
- 13719 28 **Phase unwrapping in digital holographic interferometry via convolutional and Fourier neural networks** [13719-82]
- 13719 29 **Phase-shifting-free method for resolution enhancement in off-axis structured illumination DHM via high-frequency component isolation** [13719-83]
- 13719 2B **Wide-bandwidth reflective volume Bragg gratings for grouped filtering** [13719-87]
