Volume 13720

Proceedings of SPIE 0277-786X, V. 13720

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Metrology and Inspection for Industrial Applications XII*, edited by Sen Han, Gerd Ehret, Benyong Chen, Proc. of SPIE 13720, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Symposium Committees*
xi *Conference Committee*

OPTICAL METROLOGY METHODS I

13720 04 **Dynamic range expansion algorithms for Shack-Hartmann wavefront sensor in aspheric lens surface quality assessment** [13720-2]

13720 05 **High-precision visual inspection system for the inner walls of small diameter ultra-deep holes** [13720-3]

13720 06 **Temperature compensation prediction of camera imaging parameters based on LSTM** [13720-4]

OPTICAL METROLOGY METHODS II

13720 07 **Uncertainty analysis in optoelectronic and photonic metrology: phase noise, frequency stability, and Brillouin scattering measurements (Invited Paper)** [13720-5]

13720 08 **Real-time processing system design for long-range grating measurement** [13720-6]

13720 09 **Predictive profile construction method for high performance liquid chromatography** [13720-7]

13720 0A **A compact "3+1" heterodyne grating interferometer for nanometric three-dimensional displacement measurement** [13720-8]

OPTICAL METROLOGY METHODS III

13720 0B **Research on measurement techniques for the homogeneity of cylindrical transparent materials** [13720-9]

13720 0C **Advances in the absolute measurement of the transfer function for large-aperture Fizeau interferometers** [13720-11]

13720 0D **Comprehensive error compensation method for coordinate measuring machine based on geometric error model and neural network** [13720-12]

13720 0E **Interferometric measurement of ultra-smooth vacuum chucks for high-precision optical manufacturing** [13720-14]

OPTICAL METROLOGY METHODS IV

13720 0F **Towards absolute optical form measurement for aspheres and freeform surfaces using interferometry (Invited Paper)** [13720-13]

13720 0G **Adaptive Gaussian residual correction for fisheye camera calibration via automatic radial error peak detection** [13720-15]

13720 0H **A 3D measurement method based on chirped interferometry using an optical frequency comb** [13720-16]

13720 0I **A 6DoF spatial pose measurement system based on optical frequency comb frequency-division multiplexing dispersive interference** [13720-17]

OPTICAL METROLOGY METHODS V

13720 0L **Large-scale antenna surface measurement method integrating image processing and laser ranging** [13720-21]

13720 0M **Automation of stitching interferometric measurement of long x-ray mirrors** [13720-22]

OPTICAL METROLOGY METHODS VI

13720 0N **Bi-directional velocity and distance measurements based on a single laser triangulation sensor (Invited Paper)** [13720-23]

13720 0O **Middle atmosphere observations using a tethered balloon-based Rayleigh lidar system** [13720-24]

13720 0P **Study on the influence of pedestrian target reflectance on AEB simulation testing** [13720-25]

OPTICAL METROLOGY APPLICATIONS I

13720 0R **Vibration-resistant phase retrieval algorithm for high-resolution phase shifting interferometry** [13720-27]

13720 0S **1GHz loop antennas-based smart contact lenses (Invited Paper)** [13720-28]

13720 0T **A FPFH-TrICP fusion stitching method for large-range surface topography reconstruction in WLI** [13720-29]

13720 0U **A robust phase demodulation method for grating interferometers with enhanced frequency adaptability and multi-sensor optimization** [13720-30]

OPTICAL METROLOGY APPLICATIONS II

13720 0V **Optical measurement of surface topography and angular distributions for condition monitoring (Invited Paper)** [13720-31]

13720 0X **A hybrid multi-camera calibration method combining shared calibration board and matrix chain multiplication for large-scale structural component measurement** [13720-33]

13720 0Y **Multi-scale shape-dependent anisotropic gradient for industrial optical metrology (Invited Paper)** [13720-34]

13720 0Z **Power profile estimation method based on linear least squares method in long-distance optical fiber link** [13720-36]

POSTER SESSION

13720 11 **Metrological verification of DTKF-based UWB/INS loosely-coupled positioning using high-precision infrared positioning system** [13720-19]

13720 12 **Analysis of corner reflectors for diattenuation and retardance with different types of reflective coatings** [13720-35]

13720 13 **Measurement method and facility for stability of UV-LED** [13720-37]

13720 14 **The method for inspection the characteristics of an optical lens based on a series of interferometric measurements** [13720-38]

13720 15 **A precise and robust object detection method for humanoid soccer robot** [13720-39]

13720 16 **Analysis of grating mosaic errors effect on spectrograph performance and high-accuracy measurement techniques** [13720-40]

13720 17 **Real-time monitoring of 3D printing using optical coherence tomography** [13720-41]

13720 18 **A study on the scattering characteristics of dark-field defect detection on curved optical elements** [13720-42]

13720 19 **A high-precision measurement method for the azimuth angle of the target point in the measurement of large-size antennas** [13720-43]

13720 1A **A motion optimization method for biped robots fusing IMU observation data and total disturbance estimation** [13720-44]

13720 1B **Investigation of optical-to-mechanical energy conversion efficiency in thermoelastic waves induced by laser excitation** [13720-45]

13720 1C **Development of novel inspection method for micro object with MHz-band natural vibration using laser** [13720-46]

13720 1D **Research on high-precision intelligent measurement method for grating microstructure parameters based on diffraction spectrum and deep learning** [13720-47]

13720 1E **A high-precision vision measurement model and method integrating laser ranging information** [13720-48]

13720 1F **Mid-spatial-frequency surface errors measurement of large aperture spatial filter lenses using transmission CGHs** [13720-49]

13720 1G **Transmission wavefront inspection of multi-wavelength extended in near-ultraviolet field** [13720-50]

13720 1H **High-precision prediction method for optical thin-film thickness driven by multi-scale fusion and attention mechanism** [13720-51]

13720 1I **Research on spectral responsivity measurement of extended InGaAs standard photodetector** [13720-52]

13720 1J **Enhancement detection method for weak displacement signal based on monostable stochastic resonance system** [13720-53]

13720 1K **High-precision film thickness detection method based on multi-angle spectroscopy and LSTM** [13720-54]

13720 1M **Calibration method of UVC-LED irradiance meter** [13720-56]

13720 1N **Determination of aerial objects using a multi-camera triangulation method** [13720-57]

13720 1Q **Towards self-powered smart contact lenses: integration of autonomous power sources, microfabricated antennas, and multidisciplinary design constraints** [13720-60]

13720 1R **Bound states in the continuum for tunable high-Q PZT resonators in axion dark matter detection** [13720-61]

13720 1S **Integrated measurement of parallelism between two ultra-smooth optical surfaces** [13720-62]

13720 1T **Research on multi-position methods for absolute testing of spherical surface** [13720-63]
