

PROCEEDINGS OF SPIE

Nano-optoelectronics and Micro/Nano-photonics XI

**Zhiping Zhou
Kazumi Wada
Shaoliang Yu**
Editors

**13–15 October 2025
Beijing, China**

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Republic of Korea) • Australian and New Zealand Optical Society • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations

Volume 13723

Proceedings of SPIE 0277-786X, V. 13723

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nano-optoelectronics and Micro/Nano-photonics XI*, edited by Zhiping Zhou, Kazumi Wada, Shaoliang Yu, Proc. of SPIE 13723, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Symposium Committees*
- ix *Conference Committee*

NANOPHOTONICS AND MATERIALS I

- 13723 04 **Research on high-saturation wide-gamut structural color modulation in all-dielectric metasurface** [13723-3]

NANOPHOTONICS AND MATERIALS II

- 13723 08 **Dielectric metasurface-enabled single-shot full-Stokes near-infrared polarimetry** [13723-7]

TOPOLOGICAL PHOTONICS AND PHOTONIC CRYSTALS

- 13723 0D **Enhancing the chiroptical response of displaced overlapping perovskite metamaterials via compositional asymmetry** [13723-40]

OPTICAL MANIPULATION AND MICRO/NANO OPTICS I

- 13723 0G **Microfluidic-based preparation of optical Janus rotors with varied component ratios** [13723-16]
- 13723 0I **Inverse design of optical devices for generating photonic hooks based on physics-informed neural networks** [13723-18]

OPTICAL MANIPULATION AND MICRO/NANO OPTICS II

- 13723 0K **Scattering characteristics of a perfect electromagnetic conductor (PEMC) cylinder in a lossy dielectric medium** [13723-20]
- 13723 0L **Bessel beam scattering by an infinitely long elliptical cylinder based on the method of lines** [13723-21]

PHOTONIC DEVICES AND INTEGRATION II

- 13723 0T **Dynamic modulation and recent advancements in tunable terahertz metasurfaces** [13723-29]

POSTER SESSION

- 13723 0V **Terahertz transmission modulator using photonic crystal with electrically tunable graphene particle array** [13723-31]
- 13723 0Y **Experimental confirmation of the generation of strong magnetic fields in a dielectric sphere with a high refractive index** [13723-34]
- 13723 0Z **Inverse design of cloaking for cylinder with arbitrary cross section based on physics-informed neural networks** [13723-35]
- 13723 10 **Metasurface-assisted generation and manipulation of vectorial optical fields** [13723-36]
