**Volume 13725**

Proceedings of SPIE 0277-786X, V. 13725

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum and Nonlinear Optics XIII*, edited by Qiongyi He, Dai-Sik Kim, Chunhua Dong, Proc. of SPIE 13725, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510694026

ISBN: 9781510694033 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- v *Symposium Committees*
- ix *Conference Committee*

---

## QUANTUM AND NONLINEAR OPTICS V

---

- 13725 0K **High-power and broadly tunable near-infrared picosecond OPO with noncritical phase-matched LBO** [13725-20]
- 13725 0L **Linear and nonlinear propagation of Laguerre-Gaussian modes in graded-index multimode fiber** [13725-21]

---

## QUANTUM AND NONLINEAR OPTICS VIII

---

- 13725 0W **Self-trapping of counterpropagating optical beams in PT-symmetric periodic structures with modulated Kerr nonlinearity** [13725-32]
- 13725 0X **Study of 4.79 $\mu$ m optical parametric oscillator based on a periodically pole MgO: PPLN crystal** [13725-33]

---

## POSTER SESSION

---

- 13725 10 **High-repetition-rate high-average-power mid-infrared optical parametric oscillator based on BaGa<sub>4</sub>Se<sub>7</sub> crystal** [13725-36]
- 13725 12 **Engineering phase singularity dynamics of spatiotemporal optical vortices during second harmonic generation** [13725-38]
- 13725 13 **Soliton dynamics of mode-locked fiber laser considering reverse saturable absorption effect** [13725-39]
- 13725 15 **Improved long-term stability of pulsed CPT atomic clocks using a modified combined error signal method** [13725-42]
- 13725 17 **Instantaneous luminescence of negatively charged NV-center in diamond pumped by a femtosecond laser pulse** [13725-44]
- 13725 18 **Coherent perfect absorption induced entanglement in anti-parity-time symmetric three-waveguide system** [13725-45]
- 13725 19 **Research on bit encoding training methods for end-to-end models in optical fiber communication** [13725-46]

- 13725 1A **Physical interpretation of collisionless transmission and nonlocal time in light-atom excitation** [13725-47]
- 13725 1B **Coherence evolution of supercontinuum generation under multiwavelength pumping in all-normal-dispersion fibers** [13725-48]
- 13725 1C **All-fiber photon pair source based on dual-layer high-index silica glass spiral waveguides** [13725-49]
- 13725 1D **Spectral contraction of supercontinuum generation under multipulse pumped supercontinuum generation with normal dispersion** [13725-50]
