SPIE

Volume 13728

Proceedings of SPIE 0277-786X, V. 13728

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optifab 2025*, edited by Jessica DeGroot Nelson, Blair L. Unger, Proc. of SPIE 13728, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

AUTOMATED AND ADVANCED SOLUTIONS FOR PRECISION OPTICS MANUFACTURING

- 13728 03 **Full-aperture high-speed deterministic polishing to support fully automated optics fabrication** [13728-2]
- 13728 06 **Automated reference error subtraction in phase-shifting interferometry** [13728-5]
- 13728 07 **Automation in optical manufacturing: handling, processing, and inspection** [13728-6]

ADVANCES IN DIAMOND TURNING AND PRECISION MACHINING FOR LARGE-SCALE AND SPACE OPTICS

- 13728 09 **Development of an improved surface topography model for ultra-precision diamond turning of the GIRMOS image slicer using RSA6061** [13728-8]
- 13728 0A **Recent advances in figure error compensation for FTS machining via time shifted following error** [13728-9]

INNOVATIONS IN ULTRA-PRECISION POLISHING AND SURFACE FINISHING FOR ADVANCED OPTICS

- 13728 0E **Quantifying subsurface damage in glass optics: a comparison of laser-assisted diamond turning and conventional generation** [13728-12]
- 13728 0F **AlumaGem for polishing calcium fluoride** [13728-13]
- 13728 0G **Exploration of slurry types and surface finish in high-speed CNC polishing of spherical optics** [13728-14]
- 13728 0H **Atomic-level super-polishing using only a PMMA plate in water** [13728-15]

ADVANCED METROLOGY AND INSPECTION TECHNIQUES FOR OPTICAL COATINGS AND PRECISION SURFACES

- 13728 0J **Development of a custom spectrophotometer to maximize sensitivity and dynamic range** [13728-17]
- 13728 0K **Round robin study of optical loss measurements of high-reflectivity laser line mirrors** [13728-18]

- 13728 0L **Development of an automated spectroscopic phase measurement system** [13728-19]
- 13728 0M **Efficacy and improvements to international optical coating standards** [13728-20]
- 13728 0N **Automated surface quality inspection with bright and dark field imaging** [13728-21]
- 13728 0O **Multispectral low coherence interferometry for simultaneous material analysis and thickness measurement** [13728-22]
- 13728 0P **Transmitted wavefront metrology of aspheric wavefronts using scanning Fizeau interferometry** [13728-58]
- 13728 0Q **Improving aspheric metrology with computer-generated holograms (CGH) on an automated interferometric workstation** [13728-1]

WORKFORCE DEVELOPMENT AND TRAINING FOR THE FUTURE OF OPTICS

- 13728 0S **Engaging industry partners in optics technician training: Monroe Community College's model for photonics workforce development** [13728-23]

HYBRID MATERIALS, ULTRAFAST LASER PROCESSING, AND ADVANCED METROLOGY FOR PRECISION OPTICS

- 13728 0V **Novel plastics for molding optics: OKP and beyond** [13728-26]
- 13728 0W **Diamond turning of precision glass/polymer hybrid aspheric lenses** [13728-27]
- 13728 0X **Femtosecond laser inscription of 3D gradient-index optics in optical glasses** [13728-28]
- 13728 0Z **Dual-sided surface form and lens centering tolerance characterization using an optical/tactile coordinate measurement machine** [13728-30]

ADVANCED FABRICATION AND FINISHING TECHNIQUES FOR PRECISION AND MICRO-OPTICS

- 13728 10 **Tool-normal precision grinding of tungsten carbide of gullwing aspheric molds for glass molding applications** [13728-31]
- 13728 11 **Fixed abrasive lapping with flexible 3M™ Trizact™ diamond tile** [13728-32]
- 13728 13 **Scalable and precise diffractive optics via grayscale lithography and soft nanoimprinting** [13728-34]

IN-SITU AND ON-MACHINE METROLOGY INNOVATIONS FOR PRECISION OPTICS FABRICATION

- 13728 16 **In-situ metrology for optics fabrication using chromatic confocal sensors: methods and applications** [13728-36]

PRECISION MEASUREMENT AND INTEGRATION APPROACHES FOR COMPLEX OPTICS AND SYSTEMS

- 13728 18 **DFX in action: modular strategies for assembling, servicing, and optimizing complex optical systems** [13728-38]
- 13728 19 **Recent advances in coaxial deflectometry** [13728-39]
- 13728 1A **Optical metrology and fabrication for synchrotron x-ray optics at NSLS-II** [13728-40]
- 13728 1B **Spatial integration method for a heterodyne lateral shearing interferometer for measuring the form and mid-spatial frequency of aspheric surfaces** [13728-41]
- 13728 1C **Dual surface form measurement of optics using a contact profilometer** [13728-42]

INNOVATIVE METROLOGY PLATFORMS AND TECHNIQUES FOR OPTICAL SURFACE CHARACTERIZATION

- 13728 1F **Low-coherence, high-spatial-resolution stitching flatness interferometer system** [13728-45]
- 13728 1G **A new method to measure optical surface radius** [13728-46]

ADVANCED SURFACE FINISHING AND FIGURING TECHNIQUES FOR ULTRA-PRECISION OPTICS

- 13728 1H **Elastic emission machining of ultra-precision surfaces** [13728-47]
- 13728 1I **The Satisloh plasma polisher: optics surface figuring results** [13728-48]
- 13728 1J **High spatial resolution ion beam machining: shaping the future of optics, photonics, and semiconductor manufacturing** [13728-49]
- 13728 1K **Enabling manufacturing of precision freeform glass optics using laser-assisted diamond turning** [13728-50]
- 13728 1L **Enabling optical materials of the future through MRF™ technology** [13728-51]

POSTER SESSION

- 13728 1Q **Surface composition and oxidation state analysis of dielectric multilayers** [13728-60]
- 13728 1R **Study of microstructural, mechanical, and optical properties of RB-SiC materials for space infrared optics** [13728-61]
- 13728 1S **Laser absorption evaluation of single-layer optical coating films using laser calorimetry** [13728-62]
- 13728 1T **Optimization of hot-isostatic pressing of CVD ZnS for enhanced visible-IR transmittance in infrared optical lenses** [13728-63]
