

57th ANNUAL LASER DAMAGE SYMPOSIUM
Proceedings

SPIE. LASER
DAMAGE

LASER-INDUCED DAMAGE IN OPTICAL MATERIALS 2025

20–23 October 2025
Rochester, New York, United States

Editors

Christopher Wren Carr, Carmen S. Menoni,
Michael D. Thomas, Marco Jupé

Sponsored by

SPIE

Cosponsored by

Edmund Optics Inc. (United States)
Kaufman & Robinson, Inc. (United States)
Optimax Systems, Inc. (United States)

Cooperating Organizations

Spica Technologies, Inc. (United States)

Founding Organizers

Arthur H. Guenther and Alexander J. Glass

SPIE

Proceedings of SPIE 0277-786X, V. 13729

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser-Induced Damage in Optical Materials 2025*, edited by Christopher W. Carr, Carmen S. Menoni, Michael D. Thomas, Marco Jupé, Proc. of SPIE 13729, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FUNDAMENTAL MECHANISMS II

- 13729 02 **LIDT from the nano- to the femtosecond regime: a closer look at the relationship between LIDT, refractive index, and absorption** [13729-12]

SURFACES, MIRRORS, AND CONTAMINATION I

- 13729 03 **Quantum nanolaminate RISED designs for high-energy optical coatings** [13729-49]
- 13729 04 **Development and production of high energy laser coatings for meter class optics** [13729-19]

MINI SYMPOSIUM ON BEAM SHAPING II

- 13729 05 **Kilowatt average power handling of liquid crystal on silicon spatial light modulators** [13729-35]

MEASUREMENTS AND MATERIALS II

- 13729 06 **On real-scale LIDT testing for high power, high repetition rate CO₂ lasers for EUV lithography** [13729-40]

POSTER SESSION - MONDAY

- 13729 07 **Fabrication of high efficiency polarization-independent multilayer dielectric gratings by nano-imprint lithography and reactive ion beam etching** [13729-50]
- 13729 08 **Optical damage threshold in thin-film lithium niobate for high power applications** [13729-52]
- 13729 09 **Modelling and experimental analysis of MHz UV laser beam degradation due to laser induced contamination** [13729-53]

13729 0A **The influence of steel particle contamination on the nanosecond LIDT of high- and antireflective optics** [13729-54]

13729 0B **Scaling of femtosecond supercontinuum generation above the ablation threshold in fused silica** [13729-55]

POSTER SESSION - TUESDAY

13729 0C **Development of a large aperture testing capability at Orion** [13729-64]

13729 0D **Comparison of a novel LIDT measurement routine with classical S-on-1 testing for low defect density optics in the nanosecond pulse regime** [13729-70]

13729 0E **In-situ dielectric coating damage diagnostics for high-power excimer laser optics** [13729-76]

13729 0F **Uniqueness of the Go/No-Go laser damage standard** [13729-80]

DIGITAL POSTER SESSION

13729 0G **Fiducial-free rho-of-phi measurements by surrogate registration and repeatable mounting scheme** [13729-66]
