

PROCEEDINGS OF SPIE

Fifth International Conference on Intelligent Traffic Systems and Smart City (ITSSC 2025)

**Xiaoqiang Zhang
Zhifei Zhang
Jianping Pan**
Editors

**22–24 August 2025
Chongqing, China**

Organized by
Chongqing University (China)
Chongqing Jiaotong University (China)

Published by
SPIE

Volume 13792

Proceedings of SPIE 0277-786X, V. 13792

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Intelligent Traffic Systems and Smart City (ITS-SC 2025)*, edited by Xiaoqiang Zhang, Zhifei Zhang, Jianping Pan, Proc. of SPIE 13792, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- xiii *Introduction*

TRAFFIC MONITORING AND COMPUTER VISION

- 13792 02 **Research on repair methods of missing traffic flow data based on spatial-temporal adaptation** [13792-86]
- 13792 03 **FTS-DNet: fine-grained structural temporal-spatio feature dual-stream network for micro-expression recognition research** [13792-76]
- 13792 04 **Train distance measurement system based on wheel-rail vibration and acoustic signal analysis and its application** [13792-105]
- 13792 05 **Intelligent UAV inspection method and practice for reservoir bridges in cold and arid regions** [13792-128]
- 13792 06 **Research on automated technical condition assessment of rural roads pavements based on cost analysis** [13792-21]
- 13792 07 **Light-YOLO: a lightweight multiscale feature fusion network for real-time UAV image detection** [13792-81]
- 13792 08 **Research on shield tunneling status assessment based on convolutional neural networks and data mining** [13792-82]
- 13792 09 **Evaluation and optimization of YOLO algorithms for multitype vehicle detection** [13792-126]
- 13792 0A **KeyTRL: key-segment representation learning for spatio-temporal trajectories** [13792-8]
- 13792 0B **A spatio-temporal aware hierarchical graph attention model for computing trajectory similarity** [13792-26]
- 13792 0C **MatchTrajCL: contrastive trajectory similarity learning based on trajectory matching networks** [13792-104]
- 13792 0D **Time-frequency analysis of the seismic response of subsea tunnels using a random vibration model combined with a wavelet transform algorithm** [13792-42]
- 13792 0E **Intelligent signal control scheme for pedestrian crossing on urban roads: optimization strategy based on deep learning and dynamic thresholds** [13792-3]
- 13792 0F **Neural network model for short-term passenger flow prediction during major holidays in urban transit based on SPARK** [13792-60]

- 13792 OG **Improved fuzzy C-means clustering-based traffic state identification** [13792-89]
- 13792 OH **Research on pavement crack detection technology based on deep learning** [13792-137]
- 13792 OI **Research on the integration and optimization of the PV-storage-DC-flexibility system in highway tunnel applications** [13792-90]
- 13792 OJ **Detection method for abnormal behavior of rail transit passengers based on an improved linearly deformable convolutional LSTM network** [13792-50]
- 13792 OK **Based on Kolmogorov-Arnold network for multivariate spatio-temporal non-stationary traffic flow prediction** [13792-118]
- 13792 OL **Effects of time pressure on physiological and visual characteristics of novice drivers: a driving simulator study** [13792-119]
- 13792 OM **Proactive-reactive collaborative fault-tolerant scheduling mechanism based on graph reinforcement learning in smart transportation scenarios** [13792-77]
- 13792 ON **Vehicle trajectory prediction based on spatiotemporal interaction graph networks** [13792-32]
- 13792 OO **Multiexpert dual-channel framework for robust urban traffic forecasting** [13792-40]
- 13792 OP **Human-vehicle trajectory similarity matching based on multisource data** [13792-113]
- 13792 OQ **Obstacle detection for urban rail transit based on D-S data fusion of millimeter-wave radar and vision** [13792-109]
- 13792 OR **Research on perception methods of real-time traffic emergency in campus scenes via YOLO network with camera-LiDAR data fusion** [13792-122]
- 13792 OS **YOLOv11n-DS: a vehicle detection algorithm based on deformable attention and small object optimization** [13792-112]
- 13792 OT **A review of graph neural networks in traffic forecasting** [13792-47]
- 13792 OU **Deep learning-based channel estimation for IEEE 802.11p in high-mobility scenarios** [13792-65]
- 13792 OV **Deep learning-based path optimization for heavy cargo transportation** [13792-18]
- 13792 OW **Infrared object detection for autonomous driving based on YOLOv8 with data augmentation** [13792-69]
- 13792 OX **A survey on urban traffic signal control using deep reinforcement learning** [13792-92]

- 13792 0Y **Research on risk identification and assessment for unmanned aerial vehicle maritime transportation** [13792-10]
- 13792 0Z **A digital twin prototype for 3D structural health monitoring and simulation-based diagnosis of urban bridges** [13792-1]
- 13792 10 **Hybrid XGBoost-DNN model for automated freight allocation in smart logistics networks** [13792-96]
- 13792 11 **Integrated display system design for cross-system fault-video linkage in EMU on-board TCMS and PIS networks based on hierarchical architecture** [13792-108]
- 13792 12 **Reclassification and pattern mining of multicomponent system deficiencies: a case study of port state control data on ships** [13792-129]
- 13792 13 **Overview of dynamic hazard perception methods based on multimodal semantic segmentation and VSLAM coordinated optimization** [13792-102]

OPTICAL PERCEPTION FOR AUTONOMOUS VEHICLES

- 13792 14 **Autonomous path control of unmanned vehicles based on Kalman filter fusion prediction model** [13792-72]
- 13792 15 **Cruise ship collision avoidance path planning based on PDQN algorithm** [13792-24]
- 13792 16 **Data-guided reinforcement learning for intelligent driving decision-making** [13792-121]
- 13792 17 **Research on city-level IoT sensing integration and operation system** [13792-46]
- 13792 18 **A parking space safety allocation mechanism based on standardized difficulty modeling and neighborhood conflict avoidance** [13792-68]
- 13792 19 **Development of a digital twin-based remote control system for crawler cranes** [13792-94]
- 13792 1A **Research on mobile edge computing offloading strategy based on improved dual-population sea horse whale optimization algorithm** [13792-133]
- 13792 1B **Formation control of new energy vehicles based on a hybrid multistrategy improved grey wolf optimization algorithm in sustainable transportation environments** [13792-101]
- 13792 1C **An improved ant colony optimization algorithm for urban transit network optimization** [13792-59]
- 13792 1D **Modeling and simulation of heterogeneous traffic flow on two-lane road: a modified lane-changing model** [13792-17]
- 13792 1E **Integrated scheduling and path planning of heterogeneous urban UAV fleets under energy and airspace constraints** [13792-91]

- 13792 1F **Inland waterway vessel auxiliary collision avoidance system** [13792-134]
- 13792 1G **Energy management strategy for extended-range electric vehicles based on adaptive ECMS with PI control** [13792-55]
- 13792 1H **A greedy heuristic for truck-and-drone arc routing problem** [13792-99]
- 13792 1I **Route planning system for mountainous logistics with UAV based on improved algorithm** [13792-114]
- 13792 1J **Research on UAV 3D path planning algorithms in mountainous area medical dispatch systems** [13792-107]
- 13792 1K **Research on wireless network time synchronization technology for vehicle-road collaboration** [13792-110]
- 13792 1L **Research on business-driven adaptive heterogeneous communication mechanism for vehicle-road-cloud** [13792-117]
- 13792 1M **Autonomous vehicles planning based on Internet of Things and artificial intelligence for urban intelligent transportation systems** [13792-78]
- 13792 1N **Analysis and synthesis of cooperative adaptive cruise control for connected vehicles based on XGSPON** [13792-88]
- 13792 1O **Efficient last-mile delivery in smart cities: a Q-learning enhanced memetic algorithm for single-vehicle multidrones coordination** [13792-80]
- 13792 1P **A study on vehicle stability control strategy based on MPC for fully steer-by-wire distributed steering systems** [13792-30]
- 13792 1Q **Intelligent motorcycle posture control and complex path tracking using multilayer PID regulation and vision processing techniques** [13792-67]
- 13792 1R **Lane-changing control method for vehicle platoons based on estimation of HVs driving styles under road condition variations in mixed traffic scenarios on expressways** [13792-33]
- 13792 1S **Research on multimodal transportation network design for emergency supplies based on system reliability** [13792-16]
- 13792 1T **Temporal instability analysis of factors affecting crash injury severity at signalized intersections using random parameters model with heterogeneity in means** [13792-93]
- 13792 1U **Research of the impact of autonomous vehicles on urban traffic resource allocation based on TEI** [13792-58]
- 13792 1V **Optimal delay-constrained multitask allocation scheduling for AR, VR, and spatial computing in smart city via MEC with simulation** [13792-98]

- 13792 1W **Integrating digital twin technology with BIM for real-time monitoring and risk prediction in subway construction** [13792-132]
- 13792 1X **SC-MAPP: a path planning method for autonomous mobile robots oriented to smart cities** [13792-62]
- 13792 1Y **Low-end smart community face access control system** [13792-56]
- 13792 1Z **Research and design of brake pressure test system for urban rail vehicles** [13792-22]
- 13792 20 **TCCFormer: a hybrid deep learning framework leveraging TCN and Crossformer for marine diesel engine condition monitoring** [13792-5]
- 13792 21 **Research on high-speed rail transfer intelligent recommendation system based on Python** [13792-139]
- 13792 22 **Research on bus route optimization based on big data analysis of mobile phone signaling** [13792-120]
- 13792 23 **Research on coverage evaluation of intelligent vehicle scenarios** [13792-7]
- 13792 24 **A remote driving system communication method based on UDP/MQTT double-channel flexible gradient switching mechanism** [13792-35]
- 13792 25 **PSO-LSTM intelligent identification method for the distribution capacity bottleneck of urban rail transit** [13792-41]

VISION-DRIVEN MOBILITY MODELING

- 13792 26 **Research on information distribution control technology of different terminals based on generalized information service** [13792-136]
- 13792 27 **Research on heterogeneous resource management method based on service-oriented encapsulation** [13792-115]
- 13792 28 **Optimization techniques in smart logistics: a comprehensive study on machine learning and IoT applications** [13792-123]
- 13792 29 **Exploration of the construction site environmental management model through the lens of new quality productivity** [13792-106]
- 13792 2A **DGMSTA: dynamic gated multigraph spatial-temporal attention network for traffic flow forecasting** [13792-9]
- 13792 2B **Optimal opening length of median transition sections of expressway reconstruction and expansion based on multidimensional evaluation indicators** [13792-75]
- 13792 2C **The influence of government intervention on the tripartite evolutionary game system of road-rail intermodal transport** [13792-54]

- 13792 2D **An adaptive large neighborhood search algorithm based on multitree genetic programming for solving vehicle routing problems with unmanned aerial vehicles** [13792-19]
- 13792 2E **Capacity analysis and evaluation indicators study of train diagrams in busy high-speed railways** [13792-103]
- 13792 2F **Research on water quality monitoring model based on PCA reconstruction: autoencoder model** [13792-125]
- 13792 2G **Research on collaborative subway + drone low-altitude logistics distribution mode** [13792-36]
- 13792 2H **Airspace traffic complexity assessment based on adaptive metric learning** [13792-48]
- 13792 2I **A hyperbolic metric learning-based model for air traffic complexity assessment** [13792-95]
- 13792 2J **Modeling and simulation study of the impact of on-street parking behavior on road traffic flow based on metacellular automata** [13792-97]
- 13792 2K **Study on the evolution of port and waterway traffic safety risks and network vulnerability** [13792-45]
- 13792 2L **An intelligent bus scheduling method based on multiobjective optimization** [13792-85]
- 13792 2M **Dangerous chemical transportation monitoring platform based on multisensor** [13792-138]
- 13792 2N **Computational modeling of vehicle-pedestrian conflicts at unsignalized crosswalks** [13792-11]
- 13792 2O **Optimization of energy-efficient path planning for autonomous vehicles in scenarios characterized by continuously varying curvature** [13792-71]
- 13792 2P **Research on digital key evaluation system of intelligent connected vehicles based on user's real scenario** [13792-70]
- 13792 2Q **BRT scheduling method based on passenger flow analysis** [13792-43]
- 13792 2R **Study on the non-linear mechanism of new quality productivity on smart city construction under the perspective of intelligent transportation enablement** [13792-38]
- 13792 2S **Optimization of electric bus fleet size and schedule considering charging requirements in a single line** [13792-74]
- 13792 2T **Improvement of temperature control system for airflow drying machine** [13792-23]
- 13792 2U **Path tracking control of search and rescue unmanned surface vehicle based on fuzzy PID** [13792-73]

- 13792 2V **Dynamic assessment and layered output of ship under-keel clearance based on the S-129 mechanism: a case study of the North Channel in the Yangtze River Estuary** [13792-131]
- 13792 2W **Research on dynamic danger perception method of VSLAM based on multimodal semantic segmentation** [13792-79]
- 13792 2X **Research on lane-level digital coordinate system based on satellite positioning** [13792-52]
- 13792 2Y **An evaluation method for green operation of airport flight area based on multidimensional gradient optimization** [13792-28]
- 13792 2Z **A novel framework for oil tank truck recognition: integrating SVM-RFE and prototypical networks** [13792-29]
- 13792 30 **Improved deep reinforcement learning based on ship collision avoidance method** [13792-100]
- 13792 31 **Edge computing-driven 5G vehicular network communication resource allocation and interference management** [13792-87]
- 13792 32 **Optimization of lightweight multitarget tracking algorithm based on sparse attention and dynamic pruning** [13792-116]
- 13792 33 **An autonomous driving system for campus scenarios based on scene reconstruction and driving pattern** [13792-135]
- 13792 34 **A review of vision-based traffic surveillance** [13792-111]
- 13792 35 **Expressway traffic flow prediction method based on dual-layer GRU improved model** [13792-83]
