

PROCEEDINGS OF SPIE

***International Conference on
Advanced Algorithms and
Image Processing Technologies
(IC-AAIP 2025)***

**Lu Leng
Hu Zhu**
Editors

**9–10 August 2025
Shenyang, China**

Organized by
Harbin Engineering University (China)

Sponsored by
Nanjing University of Posts and Telecommunications (China)
Beihang University (China)
University of Shanghai for Science and Technology (China)

SPIE

Volume 13933

Proceedings of SPIE 0277-786X, V. 13933

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Advanced Algorithms and Image Processing Technologies (IC-AAIP 2025)*, edited by Lu Leng, Hu Zhu, Proc. of SPIE 13933, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

INTERNATIONAL CONFERENCE ON ADVANCED ALGORITHMS AND IMAGE PROCESSING TECHNOLOGIES (IC-AAIP 2025)

- 13933 02 **High-resolution image signal processing (ISP) technology based on stitching** [13933-1]
- 13933 03 **Image recognition method based on improved artificial intelligence classification model** [13933-2]
- 13933 04 **Water resources security evaluation using extended Fourier magnitude test algorithm considering influencing factors** [13933-3]
- 13933 05 **English translation method based on graph neural network and structured multimodal graph** [13933-6]
- 13933 06 **Image defect detection based on lightweight multifeature deep neural network model** [13933-7]
- 13933 07 **Optimisation of building energy efficiency based on numerical model and Stacking model** [13933-9]
- 13933 08 **Communications privacy security based on elliptic curve cryptography algorithm research** [13933-10]
- 13933 09 **Crop disease detection for greenhouses: a lightweight solution combining ResNet and Inception** [13933-11]
- 13933 0A **Cutting optimisation model based on DBO-BP and NSGA-II** [13933-12]
- 13933 0B **Design of intelligent command decision support system based on time series data analysis** [13933-13]
- 13933 0C **Image super resolution reconstruction technology based on hybrid attention mechanism and convolutional neural network** [13933-14]
- 13933 0D **Optimization of reservoir rock scan images based on multiscale fusion super-resolution reconstruction algorithm** [13933-15]
- 13933 0E **Human motion posture estimation based on hybrid attention mechanism and poselet-guided feature enhancement module** [13933-17]
- 13933 0F **Integrated design of tray production workshop based on SLP and improved genetic algorithm** [13933-18]

- 13933 OG **Optimization of the dynamic characteristics of safety valves for high flow hydraulic supports and analysis of the effect of spring stiffness on performance** [13933-19]
- 13933 OH **Landfill leachate emission prediction system based on data-driven technology** [13933-20]
- 13933 OI **Study of nonlinear system control under improved neural network with genetic algorithm** [13933-21]
- 13933 OJ **Autonomous driving route planning based on improved APF** [13933-22]
- 13933 OK **GAT network method for reservoir injection-production connectivity identification and regulation optimization** [13933-23]
- 13933 OL **Digital core modeling and stress sensitivity analysis based on image processing** [13933-24]
- 13933 OM **Improved support vector machine modeling for reservoir dynamic monitoring and warning** [13933-25]
- 13933 ON **Lithology identification of well logging fine-grained sedimentary rocks based on Transformer and improved XGBoost** [13933-26]
- 13933 OO **Adjustment mechanism and optimization strategy for high water-cut wells based on numerical simulation** [13933-27]
- 13933 OP **Oil single well productivity prediction method based on optimized CNN-LSTM** [13933-28]
- 13933 OQ **Research on reservoir dynamic monitoring and early warning based on particle swarm-improved support vector machine** [13933-29]
- 13933 OR **Research on damage identification, assessment, and location optimization for formation testing pipelines based on IPSO-BP** [13933-30]
- 13933 OS **Study on the optimal model of IPSO-based measures for reservoir development and management in fault zones** [13933-31]
- 13933 OT **Dynamic prediction of daily oil production of wells based on water flooding characteristic curve and improved LSTM network** [13933-32]
- 13933 OU **Research on water injection optimization for oilfield water flooding development based on monitoring data and deep learning** [13933-33]
- 13933 OV **A dynamic prediction model of oilfield water content based on Q-learning reinforcement learning** [13933-34]
- 13933 OW **An optimization method for oilfield water flooding development based on PICNN** [13933-35]
- 13933 OX **Research on improving polymer oil displacement efficiency based on Grey Wolf Optimization algorithm** [13933-36]

- 13933 0Y **Prediction of post-fracturing steady-state flow time using a Dense-LSTM model** [13933-37]
- 13933 0Z **An airborne Lidar point cloud data alignment method based on improved ICP algorithm** [13933-38]
- 13933 10 **A study on weak signal recognition of public opinion in the new era of British mainstream media based on sentence-transformer and improved Autoformer** [13933-39]
- 13933 11 **Design of passive address random access algorithm for low complexity coupling architecture for massive 6G access** [13933-40]
- 13933 12 **LeNet-5 neural network traffic sign recognition for automotive assisted driving** [13933-41]
- 13933 13 **Urban railway vehicle obstacle detection considering improved Mask R-CNN model** [13933-42]
- 13933 14 **Building facade design based on deep learning image automatic generation technology** [13933-43]
- 13933 15 **Lightweight edge image recognition methods for visual intelligent Internet of Things** [13933-44]
- 13933 16 **Electricity data mining and load forecasting techniques based on Grey Wolf Optimizer-gated recurrent unit-temporal convolutional network modeling** [13933-45]
- 13933 17 **Research on intelligent planning model of power system infrastructure based on improved ICS algorithm** [13933-46]
- 13933 18 **Research on pathfinding navigation in virtual reality museums based on improved A-Star algorithm** [13933-47]
- 13933 19 **Real-time photoelectric image processing by FPGA based on modified a-mean filtering** [13933-48]
- 13933 1A **Remote sensing image information extraction method based on MST-Unet for water body information** [13933-49]
- 13933 1B **A transformer-void convolutional model for mathematical character recognition** [13933-50]
- 13933 1C **A line loss anomaly detection model incorporating improved K-means and iForest** [13933-51]
- 13933 1D **Privacy protection of information system based on hyper chaotic encryption algorithm** [13933-52]
- 13933 1E **Microscopic white blood cell image processing and classification optimization by integrating pattern recognition and deep learning** [13933-53]
- 13933 1F **Learner portrait construction based on multimodal heterogeneous data perception** [13933-54]

- 13933 1G **Elastic overload control method for microservice-based cloud servers under traffic surges** [13933-55]
- 13933 1H **Optimization design of cable network layout based on simulated annealing algorithm** [13933-56]
- 13933 1J **Research on text detection and recognition of tourist traffic signs based on improved DBNet model** [13933-58]
- 13933 1K **Cross-geographic traffic scheduling in an off-site multilive architecture for cloud environments with disaster recovery consistency in mind** [13933-59]
- 13933 1L **Optimized control of casting deformation based on casting system and process parameters** [13933-60]
- 13933 1M **Acoustic signal fault detection of chemical equipment combined with neural networks** [13933-61]
- 13933 1N **Safe operation of urban water supply network based on FCM fuzzy clustering algorithm** [13933-62]
- 13933 1O **Secure isolation of power data network slices based on lightweight edge detection model** [13933-63]
- 13933 1P **High-precision prediction of new energy battery health state based on CNN-SENet-GRU hybrid model** [13933-64]
- 13933 1Q **Research on disordered grasping method of automotive workpiece based on point cloud segmentation and ICP algorithm** [13933-65]
- 13933 1R **Binary function variable name recovery and semantic analysis based on improved transformer modeling** [13933-66]
- 13933 1S **A study of collaborative data classification in electricity-carbon market based on improved firefly algorithm** [13933-67]
- 13933 1T **Research on power terminal access authentication and trust evaluation based on SM9 identity cryptographic algorithm and Transformer** [13933-68]
- 13933 1U **Extraction and optimization of long-term dispatching rules for water-wind-solar integrated system based on improved CNN-LSTM** [13933-69]
- 13933 1V **Performance analysis of seismic response estimation for building structures based on improved DSVM model** [13933-70]
- 13933 1W **Pavement crack detection method based on adaptive bilateral filtering with attention mechanism** [13933-71]
- 13933 1X **Reliability analysis of airborne software all digital system based on edge computing** [13933-72]

- 13933 1Y **Traffic scheduling integrating Q-learning and adaptive heuristic algorithms** [13933-73]
- 13933 1Z **Construction and optimization of an intelligent recommendation algorithm platform based on big data measurement** [13933-74]
- 13933 20 **Landslide disaster early warning model taking into account residual networks and clustering methods** [13933-75]
- 13933 21 **Surface roughness prediction study for abrasive flow machining based on improved PSO-BP neural network** [13933-76]
- 13933 22 **Production scheduling model of prefabricated components of prefabricated building in interference environment** [13933-77]
- 13933 23 **Scheduling optimization of machine parts production based on improved BFO algorithm** [13933-78]
- 13933 24 **Multisource fault data fusion for power dispatch based on BIRCH clustering algorithm** [13933-79]
- 13933 25 **Power load scheduling method of distributed microgrid based on fuzzy neural network** [13933-80]
- 13933 26 **Machine learning-based data anomaly detection method for power dispatch automation system** [13933-81]
- 13933 27 **Fault detection of a new grounded round steel connection device based on improved YOLOv7 algorithm** [13933-82]
- 13933 28 **HIDN: hierarchical iterative decomposition network for long-term series forecasting** [13933-83]
- 13933 29 **Optimisation of cross-regional interconnected grid scheduling based on DTMDP model and migration reinforcement learning** [13933-84]
- 13933 2A **Fusion association rules to intrusion detection algorithm of LAN security control research** [13933-85]
- 13933 2B **Research on surveying geographic information extraction system based on multimodal large model** [13933-86]
- 13933 2C **Engineering project risk measurement based on BP neural network** [13933-87]
- 13933 2D **Optimization of bridge crack detection and intelligent maintenance technology based on GRFB-PSPNet** [13933-88]
- 13933 2E **Study of power grid operation mode derivation based on Monte Carlo sampling method** [13933-89]
- 13933 2F **Research on information customer service text matching model based on unsupervised learning and bundle search algorithm** [13933-90]

- 13933 2G **Research on electric locomotive control of rail transit based on double closed loop control algorithm** [13933-91]
- 13933 2H **Matrix decomposition and MLP fusion optimization research for personalized tourism recommendation** [13933-94]
- 13933 2I **Tourist attraction traffic prediction method based on multisource data fusion and multistrategy MPA optimization** [13933-95]
