Volume 13935

Proceedings of SPIE-Optica, 1605-7422, V. 13935

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Diffuse Optical Spectroscopy and Imaging X*, edited by Davide Contini, Yoko Hoshi, Thomas D. O'Sullivan, Proc. of SPIE-Optica 13935, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

CLINICAL AND PRECLINICAL APPLICATIONS OF DIFFUSE OPTICS I

- 13935 02 **Noninvasive evaluation of microvascular impairment in intensive care patients through near-infrared spectroscopy, the multicenter HEMOCOV-19 trial: a spotlight on recruitment center effect on measured biomarkers** [13935-1]
- 13935 03 **Measurement of systolic and diastolic blood pressure with near infrared spectroscopy** [13935-2]
- 13935 04 **Estimation of arterial blood volume using spatially resolved continuous-wave NIRS** [13935-3]
- 13935 05 **Exploratory study on time domain approach for pulse oximetry application** [13935-4]
- 13935 06 **Assessment of lung and peripheral hemodynamics through time domain diffuse optical spectroscopy during forced breathing** [13935-5]

CLINICAL AND PRECLINICAL APPLICATIONS OF DIFFUSE OPTICS II

- 13935 07 **Validation of a simultaneous cerebral blood flow and electrophysiology monitor for language acquisition in six-month old infants** [13935-6]
- 13935 08 **Noninvasive optical assessment of central venous pressure in children with single-ventricle heart defects** [13935-7]
- 13935 09 **Monitoring cerebral vasoreactivity and hemodynamics in patients with intracerebral hemorrhage over time** [13935-8]
- 13935 0A **Diffuse optical spectroscopy to study changes in mammary physiology during pregnancy** [13935-9]
- 13935 0B **Initial non-invasive in vivo assessment of breast density with time resolved diffuse reflectance** [13935-10]

CEREBRAL HEMODYNAMICS AND NEURAL ACTIVITY

- 13935 0C **Impact of severe hypoglycemia on cerebral hemodynamics in very preterm neonates** [13935-11]

- 13935 OD **Intracranial pressure and cerebral blood flow pulse dynamics in patients with idiopathic normal pressure hydrocephalus during Katzman infusion test: a pilot optical monitoring study** [13935-12]
- 13935 OE **Measuring respiration-driven perturbations of intra- and extracerebral hemodynamics during slow breathing: a TD-NIRS study** [13935-13]
- 13935 OF **TD-fNIRS for auditory-inspired speech and music hemodynamic response function** [13935-14]
- 13935 OG **Assessing the brain response to the rotating snake illusion by TD-fNIRS** [13935-15]
- 13935 OH **Mapping brain function underlying motor observation and naturalistic imitation using high-density diffuse optical tomography** [13935-16]

ADVANCES IN INSTRUMENTATION AND TECHNOLOGY I

- 13935 OI **Design and characterization of a fast multichannel time-domain NIRS and DCS device for clinical applications** [13935-17]
- 13935 OJ **PROMETEUS: hybrid TD-NIRS and SCOS instrument for real-time monitoring of brain metabolism in preterm neonates: system architecture and characterization** [13935-18]
- 13935 OK **Characterization and in vivo DCS measurements with compact 1064nm laser** [13935-19]
- 13935 OL **The TinyBrains prototype: a high-density hybrid diffuse optics tomography system with integrated electroencephalography for functional studies in neonates** [13935-20]
- 13935 OM **A compact, self-contained module for fast and noninvasive blood flow monitoring** [13935-21]
- 13935 ON **Exploring a new spectral range for time-domain near infrared spectroscopy** [13935-22]

CLINICAL AND PRECLINICAL APPLICATIONS OF DIFFUSE OPTICS III

- 13935 OO **Liver steatosis evaluation in transplantation: near-infrared diffuse reflectance spectroscopy** [13935-23]
- 13935 OP **Hyperspectral imaging in the visible and short-wave infrared on freshly resected breast cancer specimens** [13935-24]
- 13935 OQ **Thermal denaturation of deoxyhemoglobin: evidence for a previously unreported intermediate state** [13935-25]
- 13935 OR **Monitoring fluid responsiveness using hybrid diffuse optics during passive leg raising maneuver** [13935-26]

- 13935 OS **Differences of time-domain NIRS-derived hemodynamic parameters of the vastus lateralis muscle with age and physical activity** [13935-27]
- 13935 OT **Understanding skeletal muscle's vascular function and health with time-domain near infrared spectroscopy** [13935-28]

INNOVATIVE APPLICATIONS OF DIFFUSE OPTICS

- 13935 OU **Physics-based rendering of biological media** [13935-29]
- 13935 OV **Real-time bioreactor monitoring using differential fluorescence diffuse optical tomography** [13935-30]
- 13935 OW **Influence of the layer structure of leaves on the determination of their scattering and absorption properties** [13935-31]
- 13935 OX **Exploring the optics of chicken eggs using time-domain diffuse optics** [13935-32]
- 13935 OY **Broadband time-domain diffuse optical spectroscopy to measure and monitor snow** [13935-33]

ADVANCES IN INSTRUMENTATION AND TECHNOLOGY II

- 13935 OZ **Time-resolved diffuse optical system with spectral parallelization over a 16-channel SiPM array** [13935-34]
- 13935 IO **A hybrid time-of-flight-resolved parallel interferometric near-infrared spectroscopy (parallel iNIRS) with a fast two-dimensional and a single-channel iNIRS** [13935-35]
- 13935 I1 **Custom SNSPD for hybrid time-domain diffuse optics** [13935-36]
- 13935 I2 **Time-domain diffuse optical tomography with pattern illumination and detection: experimental system** [13935-37]
- 13935 I3 **Broadband noncontact spectroscopy using time-domain diffuse optics** [13935-38]
- 13935 I4 **Robustness of time-domain near-infrared spectroscopy against skin pigmentation differences** [13935-39]

THEORY, ALGORITHMS, AND MODELING I

- 13935 I5 **Finding the perfect NIRS pipeline** [13935-66]
- 13935 I6 **Standardized assessment of fNIRS data quality with NeuroDOT and OXI** [13935-67]

- 13935 17 **Resting-state RGB parcellation: a data-driven approach for intraoperative functional brain mapping** [13935-68]
- 13935 18 **Investigating the potential to estimate volumetric CSF morphology with high-density diffuse optical tomography** [13935-69]
- 13935 19 **Optimizing deep tissue monitoring with diffuse optics: virtual tools for TD-NIRS and TD-SCOS development** [13935-70]
- 13935 1A **Optimization of continuous-wave NIRS devices for placental monitoring: a simulation study** [13935-71]

ADVANCES IN INSTRUMENTATION AND TECHNOLOGY III

- 13935 1B **Standardised testing procedure based on optical phantoms for validation of photonics instrumentation aimed at clinical monitoring of the placenta** [13935-72]
- 13935 1C **Liquid-crystal display-based dynamic phantom for pulse oximetry characterisation** [13935-73]
- 13935 1D **Optical hand phantom with defined optical properties** [13935-74]
- 13935 1E **Diffuse reflectance spectroscopy system radiometrically calibrated for quantitative optical measurements in scattering media** [13935-75]
- 13935 1F **Linking fluorescence spectroscopy and 31P MRS in NADH phantoms** [13935-76]

THEORY, ALGORITHMS, AND MODELING II

- 13935 1G **An adaptive stochastic Gauss-Newton method for optical tomography using the Monte Carlo method** [13935-77]
- 13935 1H **Deep tissue characterization by ultrasound optical tomography hybrid Monte Carlo model** [13935-78]
- 13935 1I **Digital twin for deriving optical properties of turbid media using cubic spline-parameterized phase functions** [13935-79]
- 13935 1J **Enhanced imaging through scattering tissue using NIR multispectral fusion techniques** [13935-80]
- 13935 1K **Enhancing deep inclusion localisation in diffuse optical tomography by time-gated datatypes** [13935-81]
- 13935 1L **NIRFASTerFF: an open-source Python package for efficient photon modeling** [13935-82]

MACHINE LEARNING IN DIFFUSE OPTICS

- 13935 1M **High-accuracy diffuse optical tomography using neural network postprocessing** [13935-83]
- 13935 1N **Diffuse optical tomography using deep learning to marginalize errors due to inaccurate baseline optical parameters in brain imaging** [13935-84]
- 13935 1O **BPU-Net: an efficient end-to-end deep-learning diffuse optical tomography model for structured scan data** [13935-85]
- 13935 1P **Transformer-encoder for real-time DOT scanning** [13935-86]
- 13935 1Q **Noninvasive intracranial pressure estimation from cerebral blood flow dynamics using wavelet-based deep learning** [13935-87]
- 13935 1R **Point-of-care, continuous assessment of multiple biomarkers using long wavelength near infrared spectroscopy for dialysis** [13935-88]
- 13935 1S **Machine learning-enhanced random laser sensing: unveiling scattering anisotropy for optical property characterization** [13935-89]

ADVANCES IN INSTRUMENTATION AND TECHNOLOGY IV

- 13935 1T **A miniature sensor board for smarter near-infrared diffuse optical spectroscopy probes** [13935-90]
- 13935 1U **Optical and ultrasound measurements for artery diameter extraction for blood pressure monitoring** [13935-91]
- 13935 1V **Simulation of an optical microneedle interface for arterial dynamics measurement via photoplethysmography** [13935-92]
- 13935 1W **Determination of depth-dependent dynamic properties of turbid media using frequency-modulated scattering holography** [13935-93]
- 13935 1X **Exploration of polarization speckle metrics to characterize scattering properties of turbid media** [13935-94]
- 13935 1Y **Room-light operation of a three-wavelength spatial frequency domain imaging system using pulsed illumination and an 8-tap CMOS image sensor** [13935-95]

THEORY, ALGORITHMS, AND MODELING III

- 13935 1Z **A new method to optimize measurement conditions for fluorescence spectroscopy systems for intraoperative glioma delineation** [13935-96]
- 13935 20 **Simulated near infrared database for fluorescence diffuse optical tomography** [13935-97]

- 13935 21 **Symbolic Monte Carlo for quantifying fluorescent biomarkers in neurosurgical intraoperative imaging** [13935-98]
- 13935 22 **Sparse-view Cherenkov imaging reconstruction algorithm via Markov projection dynamic prior** [13935-99]
- 13935 23 **Time-domain Raman forward solver in a two-layer diffusive medium** [13935-100]
- 13935 24 **Time-domain diffuse optical tomography with pattern illumination and detection: modeling and simulation** [13935-101]

THEORY, ALGORITHMS, AND MODELING IV

- 13935 25 **Heuristic model for photon propagation in two-layer turbid media** [13935-102]
- 13935 26 **Real-time multispectral diffuse optical tomography for hemodynamic imaging using the SENSOR algorithm** [13935-103]
- 13935 27 **Algorithm for deriving absolute blood flow from reduced speckle contrast data** [13935-104]
- 13935 28 **Optical properties of two-layered turbid media obtained via a homogenous model using an analytical solution to the radiative transfer equation** [13935-105]
- 13935 29 **Model development for (imaging) single fiber reflectance spectroscopy** [13935-106]
- 13935 2A **Numerical study on time-domain functional near-infrared optical tomography with regularization minimizing entropy** [13935-107]

POSTER SESSION

- 13935 2B **Enhancing characterization of chemical and morphological changes in tissue with a hybrid Raman and partial wave spectroscopy system** [13935-40]
- 13935 2C **Optimized reconstruction framework in fluorescence diffuse optical tomography using radiative transfer equation** [13935-41]
- 13935 2D **Simulation study on spatial distribution of diffuse reflectance detected near the slit illuminated area in skin** [13935-42]
- 13935 2E **Investigation on differentiation of skin spectral reflectance for simple estimation of change in oxygen saturation** [13935-43]
- 13935 2F **Cloud-based automated system for NIRS data processing** [13935-44]

- 13935 2G **Optimal wavelength selection for laparoscopic multispectral imaging to visualize tissue oxygenation** [13935-45]
- 13935 2H **Fluorescence imaging of fast moving samples** [13935-46]
- 13935 2I **NIR and SWIR continuous wave diffuse optical tomography from a wearable device setup** [13935-47]
- 13935 2J **Tracking microbial activity using laser speckle analysis** [13935-48]
- 13935 2K **Combining scalp coupling index with coefficient of variation to determine fNIRS signal quality in 3D printed optode holders** [13935-49]
- 13935 2L **A liquid phantom for validating hyperspectral imaging in brain tumour resection** [13935-50]
- 13935 2M **Asymmetric self-calibrating method for accurate cerebral oximetry** [13935-51]
- 13935 2N **Full vibrational spectroscopy for simultaneous mechanical, structural, and chemical analysis** [13935-52]
- 13935 2O **Quantifying Raman photon generation depth via diffusion modeling** [13935-53]
- 13935 2P **Glucose measurement in a turbid medium using DRS technique at 940nm** [13935-54]
- 13935 2Q **Determining the optical properties of scattering media using a cluster of advanced devices** [13935-55]
- 13935 2R **Monte Carlo simulation of spectral reflectance images of human skin with embedded lesions** [13935-56]
- 13935 2S **Development of a parallel, multiwavelength, multichannel, multidistance, time-resolved near infrared spectrometer** [13935-57]
- 13935 2T **Assessment of muscle optical properties by double distance TD NIRS measurements: a simulation and in vivo study** [13935-58]
- 13935 2U **Analytical sensitivity factor equations for attenuation and moments in near-infrared spectroscopy** [13935-59]
- 13935 2V **Advancing neuroscience diagnostics: a hyperspectral imaging system for real-time biochemical insights into brain tissue** [13935-60]
- 13935 2W **A data management plan for open data, readable and reusable by humans and AI** [13935-61]
- 13935 2X **FetalSenseM: a multiwavelength near-infrared spectroscopy device for in vivo oxygenation and metabolism measurements** [13935-62]

- 13935 2Y **Effect of tissue thickness on background interference in confocal Raman spectroscopy of fixed human histological skin slides** [13935-63]
- 13935 2Z **Can we accurately retrieve oxyhaemoglobin concentration at 1064nm with TD-NIRS?: a Monte Carlo simulation study** [13935-64]
- 13935 30 **End-to-end diffuse optical tomography for functional brain activation** [13935-65]
