**Volume 13936**

Proceedings of SPIE-Optica, 1605-7422, V. 13936

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Systems for Mechanical and Biophysical Investigation*, edited by Brendan F. Kennedy, Giuliano Scarcelli, Proc. of SPIE-Optica 13936, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OPTICAL COHERENCE ELASTOGRAPHY

---

- 13936 02 **Rapid volumetric strain imaging using full-field swept-source optical coherence elastography** [13936-1]
- 13936 03 **Visualization of breast cancer using multiparametric optical coherence elastography** [13936-2]
- 13936 04 **Optical coherence elastography of excised human prostate** [13936-3]
- 13936 05 **The development of anatomical breast tissue-mimicking phantoms for optical coherence elastography** [13936-4]
- 13936 06 **Towards combined Raman spectroscopy and polarisation-sensitive optical coherence tomography for integrated biochemical and biomechanical testing of cartilage** [13936-5]

---

## BRILLOUIN MICROSCOPY AND ACOUSTICAL METHODS

---

- 13936 07 **BIPD-assisted Brillouin microscopy reveals altered bone biomechanics in osteopetrosis** [13936-6]
- 13936 08 **Biomechanics of glioblastoma tissue: insights from in vitro models using Brillouin and Raman spectroscopy** [13936-7]
- 13936 09 **Investigation of the microscopic and molecular processes underlying the corneal cross-linking therapy** [13936-8]
- 13936 0A **Ultrafast pathogen identification in sepsis diagnosis using an optomechanical sensor assisted by artificial intelligence** [13936-9]
- 13936 0B **Study on the pump and probe beam overlap in stimulated Brillouin scattering microscopy** [13936-10]
- 13936 0C **Angle and polarization dependence of spontaneous Brillouin scattering** [13936-11]

---

#### NOVEL METHODS AND APPLICATIONS

---

- 13936 OD **Sensing biological forces with deformable microlasers** [13936-12]
- 13936 OE **Kilohertz fluorescence imaging flow cytometry** [13936-13]
- 13936 OF **Compact hybrid near-infrared and speckle contrast optical spectroscopy device**  
[13936-14]
- 13936 OG **Optical microrheology of blood clots** [13936-15]
- 13936 OH **Self-supervised scattering pattern classification of peripheral blood stream cells** [13936-16]
- 13936 OI **Spectroscopic motion imaging of particle adhesion to cells using optically computed phase microscopy** [13936-17]
- 13936 OJ **Surface roughness effects on surface acoustic wave detection in pump-probe microscopy**  
[13936-18]

---

#### POST-DEADLINE PAPER SESSION

---

- 13936 OK **Broadband microrheology of a single chromosome: exploring the role of the chromosome periphery** [13936-24]

---

#### POSTER SESSION

---

- 13936 OL **Femtosecond bioprinting of cellular spheroids** [13936-19]
- 13936 OM **Adapting the optomechanical characteristics of intervertebral discs for photoacoustic probing** [13936-20]
- 13936 ON **High fluorescence of phytochromes does not require chromophore protonation** [13936-21]
- 13936 OO **The fluorescence yield of red pH sensitive proteins is mainly determined by stability and internal water contact of the chromophore** [13936-22]
- 13936 OP **Fluorescence lifetime tomography** [13936-23]
