Volume 13938

Proceedings of SPIE-Optica, 1605-7422, V. 13938

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Opto-acoustic Methods and Applications in Biophotonics VII*, edited by Chulhong Kim, Vasilis Ntziachristos, Proc. of SPIE-Optica 13938, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

CLINICAL IMAGING

- 13938 02 **Automatic quantification of human skin anatomy and microvasculature biomarkers by optoacoustic mesoscopy with machine learning** [13938-1]
- 13938 03 **Towards obtaining reliable spectral biomarkers of breast cancer in multispectral optoacoustic tomography** [13938-2]
- 13938 04 **High-resolution photoacoustic imaging for quantitative severity assessment and treatment monitoring in inflammatory skin diseases using structural and functional biomarkers** [13938-3]
- 13938 05 **Peripheral vascular photoacoustic imaging using a portable laser diode** [13938-4]
- 13938 06 **Multimodal spectral photoacoustic and ultrasound imaging for endarterectomy plaque characterization** [13938-5]

MOLECULAR IMAGING

- 13938 07 **Development and validation of a novel photoacoustic calcium-sensitive probe for functional neuroimaging in mice** [13938-6]
- 13938 08 **Neuromelanin imaging in entire human midbrain organoids using optoacoustic mesoscopy** [13938-7]
- 13938 09 **Calibrated photoacoustic spectroscopy as a new tool for quantitative characterization of imaging contrast agent** [13938-8]
- 13938 0A **A numerical photoacoustic forward model for PA signals generated in fluorophores** [13938-9]
- 13938 0B **Noninvasive precision mapping of skin cancer with automated segmentation assisted photoacoustic imaging** [13938-10]

IMAGE RECONSTRUCTION AND ANALYSIS

- 13938 0C **Skin flattening of raster-scan optoacoustic mesoscopy (RSOM) reconstructions based on polynomial fitting** [13938-11]

- 13938 OD **Comparative analysis of acoustic reconstruction methods for chromophore and oxygenation quantification in limited-view 3D quantitative photoacoustic tomography** [13938-12]
- 13938 OE **Self-supervised sparse-dense optical resolution photoacoustic microscopy** [13938-13]
- 13938 OF **Transformer-based dual SwinUNet with contrastive loss for enhanced photoacoustic imaging** [13938-14]
- 13938 OG **Matricial model-based reconstruction for compressed all-optical photoacoustic imaging** [13938-15]
- 13938 OH **An efficient Gauss-Newton filter based pointwise reconstruction scheme for fully nonlinear pharmacokinetic fluorescence photoacoustic tomography** [13938-16]
- 13938 OI **Automatic real-time quality assessment for optoacoustic mesoscopy data** [13938-17]
- 13938 OJ **Spatiotemporal feature extraction in phonon microscopy using dual attention for cancer cell classification** [13938-18]

MULTIMODAL IMAGING

- 13938 OK **Multimodal opto-ultrasound imaging via transparent ultrasound transducer** [13938-35]
- 13938 OL **Miniaturized ultrasonic transducer-based photoacoustic microscopy: enabling high spatiotemporal imaging and concurrent multimodality imaging** [13938-36]
- 13938 OM **Dual-modal photoacoustic and ultrasound imaging system for functional analysis of vasculature in vivo** [13938-37]
- 13938 ON **Explainable deep learning-based mid-infrared photoacoustic microscopy** [13938-38]

NOVEL ILLUMINATION

- 13938 OO **Parallelized light guiding with ultrasound for improved imaging in scattering media** [13938-39]
- 13938 OP **High-speed 1720nm SRS fiber amplifier for photoacoustic microscopy of lipids** [13938-40]
- 13938 OQ **Optoacoustic mesoscopy based on laser diodes** [13938-41]
- 13938 OR **Photoacoustic generation with a constant intensity beam** [13938-42]
- 13938 OS **Optically generated droplet beams improve optoacoustic imaging of choroid thickness as an Alzheimer's disease biomarker** [13938-43]

DETECTION TECHNOLOGIES

- 13938 OT **Light-sheet photoacoustic imaging with camera-based ultrasound detection** [13938-44]
- 13938 OU **Ultraviolet optical-resolution photoacoustic microscopy of fresh tissue slices using a static ultrasound detector and fast galvo scanning** [13938-45]
- 13938 OV **2D spiral array with single element microlenses for 3D optoacoustic imaging** [13938-46]
- 13938 OW **Wide-field optical-resolution optoacoustic microscopy utilizing a stationary silicon-photonics acoustic detector for reflection and transmission imaging configurations** [13938-47]

QUANTITATIVE IMAGING

- 13938 OX **A solid phantom recipe to mimic optical and acoustic properties of biological tissue** [13938-48]
- 13938 OY **Does medium stiffness affect photoacoustic image intensity? A phantom study** [13938-49]
- 13938 OZ **Realistic PA/US simulations of articular cartilage** [13938-50]
- 13938 IO **Digital superphantoms for in silico thyroid nodule photoacoustics imaging** [13938-51]
- 13938 I1 **Opto-mechanical characterization of the intervertebral disc using photoacoustic imaging** [13938-52]
- 13938 I2 **Quantitative photoacoustic imaging of simulated carotid plaque** [13938-53]
- 13938 I3 **Acoustic background noise in photoacoustic tomography** [13938-54]
- 13938 I4 **Towards quantitative photoacoustic imaging assisted by ultrasound power Doppler** [13938-55]

POST-DEADLINE PAPER SESSION

- 13938 I5 **Setting the stage for intraoperative histological quality guidance in autologous fat treatments via computed optoacoustic microscopy** [13938-56]

POSTER SESSION

- 13938 I6 **Three-beam interference photoacoustic microscopy with enhanced detection view** [13938-19]

- 13938 17 **Photoacoustic fiberscope for oxygenation imaging of freely moving mouse and sepsis-induced brain dysfunction** [13938-20]
- 13938 18 **Parallelized data acquisition using a Fabry-Perot sensor with uniform optical thickness and a camera-based tomograph for photoacoustic imaging** [13938-21]
- 13938 19 **3D printed human skull phantoms for transcranial photoacoustic imaging** [13938-22]
- 13938 1A **Unsupervised learning-based registration method for photoacoustic microscopy image sequences** [13938-23]
- 13938 1B **PATFOM: a universal photoacoustic tomography foundation model for multitask image processing** [13938-24]
- 13938 1C **Estimation of dielectric parameters in quantitative thermoacoustic tomography** [13938-25]
- 13938 1D **Optical waveguide resonance sensor for broadband sensitive ultrasound detection** [13938-26]
- 13938 1E **A deep learning-based speed-of-sound correction model for vascular photoacoustic imaging** [13938-27]
- 13938 1F **Hybrid fluorescence and magnetic resonance imaging (HyfMRI) platform for functional neuroimaging** [13938-28]
- 13938 1G **LED-based photoacoustic detection of nitrous oxide** [13938-29]
- 13938 1H **Potential clinical applications of ultrasound optical tomography: breast tissue characterization and brain imaging** [13938-30]
- 13938 1I **Evaluating image quality metrics for photoacoustic imaging** [13938-31]
- 13938 1J **Optimizing photoacoustic systems for carotid artery imaging** [13938-32]
- 13938 1K **Assessment of thermal diffusivity in a multicomposite tissue-mimicking gel by photothermal tomography** [13938-33]
- 13938 1L **Ultrasound light waveguiding to increase fluorescent signals through biomimicking tissue phantoms** [13938-34]
