**Volume 13939**

Proceedings of SPIE-Optica, 1605-7422, V. 13939

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Coherence Imaging Techniques and Imaging in Scattering Media VI*, edited by Marinko V. Sarunic, Benjamin J. Vakoc, Yoshiaki Yasuno, Proc. of SPIE-Optica 13939, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

ix Conference Committee

## OCULAR IMAGING

---

- 13939 02 **Transmission interference microscopy of the in vivo anterior human eye** [13939-1]
- 13939 03 **Bandwidth-efficient signal acquisition for 21mm FOV retinal OCTA** [13939-2]
- 13939 04 **Oblique illumination holographic OCT for improving resolution, reducing speckles, and objectively correcting aberrations** [13939-3]
- 13939 05 **Optical signal discontinuity zones of the crystalline lens in the accommodating eye** [13939-4]
- 13939 06 **Towards assessment of retinal morphological changes via instrument-integrated OCT in endo-photocoagulation in a porcine eye model** [13939-5]

## OPTORETINOGRAPHY

---

- 13939 07 **Depth-resolved temporal photoreceptors' transfer function measured with photopic flicker optoretinography (f-ORG)** [13939-6]
- 13939 08 **Progress on clinical optoretinography using dualspectrometer OCT in healthy eyes and eyes with birdshot chorioretinopathy** [13939-7]
- 13939 09 **Progress in measurements and interpretation of ORGs acquired using full field swept-source optical coherence tomography (FF-SS-OCT) systems** [13939-8]
- 13939 0A **OCT split-spectrum amplitude-decorrelation optoretinography in age-related macular degeneration** [13939-9]
- 13939 0B **Influence of color blindness on intensity-based optoretinograms recorded with adaptive optics scanning laser ophthalmoscope** [13939-10]

## DYNAMIC OCT

---

- 13939 0C **Investigating dOCT signal origins and bringing a new contrast to fluorescence imaging** [13939-11]
- 13939 0D **Comprehensive imaging of in vitro intratissue activity by quantitative and multidynamics optical coherence tomography** [13939-12]
- 13939 0E **Non-equidistant temporal scanning in dynamic MHz-OCT for higher speed** [13939-13]

- 13939 OF **Structural and metabolic imaging of cancer spheroids by Zero-NA full-field optical coherence microscope with computational augmentations** [13939-14]
- 13939 OG **Noninvasive, label-free imaging of trophoblast organoids with dynamic optical coherence microscopy** [13939-15]

---

#### OCT APPLICATIONS

- 13939 OH **Multi-MHz-OCT endoscopic imaging with an automated pullback mechanism** [13939-16]
- 13939 OI **OCT-based three-dimensional multiparametric imaging of the cerebral microcirculation** [13939-17]
- 13939 OJ **Ultrafast two-dimensional vibration vector measurements based on optical coherence tomography** [13939-18]
- 13939 OK **Depth-extended ex vivo ocular tissue imaging using spatial phase-resolved optical coherence microscopy** [13939-19]
- 13939 OL **Development of multiview optical coherence tomography (OCT) with a registration algorithm combining refractive index correction for tooth imaging** [13939-20]
- 13939 OM **Optical coherence tomography and elastography of fresh human prostate** [13939-21]

---

#### FULL FIELD OCT

- 13939 ON **Multidepth high-resolution quantitative analysis of the retinal nerve fiber layer with full-field OCT** [13939-25]
- 13939 OO **Rolling-phase dynamic full-field optical coherence tomography applications: enhancing cellular imaging in dense biological structures** [13939-26]
- 13939 OP **Quantitative dynamic OCT for cell viability measurement** [13939-27]
- 13939 OQ **In vivo megahertz dynamic optical coherence tomography of human skin** [13939-28]
- 13939 OR **Intravolume axial positioning of individual en-face images in off-axis full-field time-domain optical coherence tomography** [13939-29]

---

#### AI AND IMAGE ANALYSIS

- 13939 OS **Theoretical framework for maximum correctable defocus in optical coherence tomography** [13939-30]
- 13939 OT **Acceleration of amplitude-spectral dynamic optical coherence tomography acquisition by using deep learning** [13939-31]

- 13939 0U **An accelerated T-matrix method for simulating the focusing of light in tissue using arbitrary wavefronts** [13939-32]
- 13939 0V **Progress on digital wavefront correction and spatiotemporal optical coherence tomography for retinal imaging** [13939-33]
- 13939 0W **Progress on deep reinforcement learning for real-time defocus and axial motion correction for OCT** [13939-34]

---

#### OCT METHODS

- 13939 0X **Choroidal vascular disease on-chip modeling and assessment with optical coherence tomography** [13939-35]
- 13939 0Y **Advancing the STOC-T system: optimizing illumination conditions for minimized cross-talk noise and enhanced SNR** [13939-36]
- 13939 0Z **Minimally invasive common-path OCT system for neurosurgery applications** [13939-37]
- 13939 10 **Speckle reduction through angular compounding in robotically assisted MHz-OCT** [13939-38]
- 13939 11 **Progress on multicontrast imaging of mouse retina** [13939-39]

---

#### CONTRAST: ELASTOGRAPHY AND PS

- 13939 12 **Three-dimensional imaging of mechanical contrast in human breast using dynamic optical coherence tomography** [13939-40]
- 13939 13 **New understanding of phase-sensitive optical coherence tomography displacement measurement** [13939-41]
- 13939 14 **Estimation and comparison of brainstem fiber orientation via diffusion MRI tractography and polarization sensitive OCT** [13939-42]
- 13939 15 **Polarization-sensitive optical coherence tomography with single input for imaging the polarization state within various samples** [13939-43]
- 13939 16 **Setup of a polarization sensitive ultra-high-resolution visible-light OCT** [13939-44]

---

#### NEW TECHNOLOGY I

- 13939 17 **Modelling confocal and offset detection paths of an AOSLO to guide contrast optimization** [13939-60]
- 13939 18 **Holoscopic microendoscopy** [13939-61]

- 13939 19 **3D printed encapsulated microlens for endoscopic optical coherence tomography** [13939-62]
- 13939 1A **Hand-held fibre optic 2D scanner with single 1D actuation for structural imaging and fluorescence quantification** [13939-63]

---

#### NEW TECHNOLOGY II

- 13939 1B **Phase-code mode-locked laser at 1060nm for circular-ranging optical coherence tomography** [13939-64]
- 13939 1C **Stretched-pulse active mode-locking comb swept laser without Fabry-Pérot etalon for subsampled optical coherence tomography** [13939-65]
- 13939 1D **High-speed, long-range SS-OCT imaging based on HCG-VCSEL and real-time calibration framework** [13939-66]
- 13939 1E **Megahertz FDML laser with on-the-fly adjustable sweep rate between 835kHz and 13.4MHz** [13939-67]
- 13939 1F **Lifting constraints on multi-kHz raster-line scanning frequency matching in multi-MHz swept-source OCT imaging systems** [13939-68]
- 13939 1G **Dual-laser full-field Fourier-domain optical coherence tomography for improving axial resolution** [13939-69]

---

#### POST-DEADLINE PAPER SESSION

- 13939 1H **High-resolution dynamic full-field optical coherence microscopy for deep tissue cellular imaging** [13939-70]

---

#### MONDAY POSTER SESSION

- 13939 1I **Operator-free optical coherence tomography with automated alignment and artifact detection** [13939-22]

---

#### TUESDAY POSTER SESSION

- 13939 1J **Background noise and PSF characterization for high-reflecting sample in PS-SS-OCT using the movement of mirror on reference arm** [13939-23]
- 13939 1K **Particle size distribution and scattering properties of Intralipid 20%** [13939-24]

## WEDNESDAY POSTER SESSION

---

- 13939 1L **Progress on the development of zebrafish optoretinography system to observe light-evoked response of retina** [13939-45]
- 13939 1M **Novel technique of phase stabilisation in swept-source OCT** [13939-46]
- 13939 1N **Ex vivo measurements of eardrum vibrations using optical coherence tomography** [13939-47]
- 13939 1O **Accurate measurements of the axial positions of high-reflective layers in spectral domain interferometry** [13939-48]
- 13939 1P **Image quality enhancement on OCTA retina images using a deep neural network** [13939-49]
- 13939 1Q **Stripe-like raster scanning for large-area OCT imaging** [13939-50]
- 13939 1R **Wavelength segmentation-based phase analysis for enhanced axial measurement range in full-field optical coherence microscopy** [13939-51]
- 13939 1S **Stability-enhanced phase measurement through optical coherence microscopy with a stretched-pulse mode-locked laser** [13939-52]
- 13939 1T **Adaptive DBSCAN for OCT retinal layer segmentation applications** [13939-53]
- 13939 1U **Efforts in adapting a Raspberry Pi to full-field optical coherence tomography** [13939-54]
- 13939 1V **Enhancement of retinal OCT scans using EDSR model with an SSIM-based loss function** [13939-55]
- 13939 1W **Understanding dynamic structures in breast cancer spheroid by full-field and point-scanning dynamic optical coherence tomography** [13939-56]
- 13939 1X **Impact of defocus on OCT signal strength: surface model versus particle model** [13939-57]
- 13939 1Y **Eye-Screen: a compact line-field spectral-domain optical coherence microscopy design for diabetic peripheral neuropathy screening** [13939-58]
- 13939 1Z **Detecting the optical sweeping direction of a fast swept source without an optical spectrum analyser** [13939-59]
