PROCEEDINGS OF SPIE

International Conference on Machine Learning, Neural Networks, and Computer Software (MLNNCS 2025)

Sergei Gorlatch
Editor

15–17 August 2025
Hong Kong, China

Organized by
Universitaet Muenster (Germany)

Supported by
Hong Kong Chu Hai College (Hong Kong, China)
University of Évora (Portugal)
University of Groningen (Netherlands)

Published by
SPIE

Volume 13940

Proceedings of SPIE 0277-786X, V. 13940

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Machine Learning, Neural Networks, and Computer Software (MLNNCS 2025)*, edited by Sergei Gorlatch, Proc. of SPIE 13940, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

OPTICAL SENSORS AND THE INTERNET OF THINGS

13940 02 **Design of lightweight intelligent evaluation algorithm for abnormal traffic detection in 5G power virtual private network** [13940-30]

13940 03 **Fault identification of high-resistance ground in distribution lines based on SVM** [13940-22]

13940 04 **Application of Co-Pt binary alloy anode catalyst optimized by computer simulation design in direct borohydride fuel cells** [13940-8]

13940 05 **Strengthening methods for power grid frequency control based on rapid kinetic energy extraction and boundary analysis** [13940-10]

13940 06 **Prediction of lateral friction distribution of large-diameter PHC pipe piles based on FEM-AI coupling technology** [13940-48]

13940 07 **Research on 3D reconstruction of binocular vision and intelligent evaluation method of target distance for power operation safety** [13940-15]

13940 08 **Research on autonomous path planning and obstacle avoidance control algorithm of working robot for low voltage distribution environment** [13940-13]

13940 09 **Research on TQM model of enterprise based on enterprise big data** [13940-4]

13940 0A **Design of computer-aided test scheduling system based on local data management of XD71S device** [13940-31]

13940 0B **Research on multiple transaction consistency models and conflict resolution methods for active-active architecture of trusted computing** [13940-70]

13940 0C **Research on the reliability and scalability technology of the distributed storage system of trusted computing under the active-active architecture** [13940-58]

13940 0D **Multiobjective short-term dispatch for wind-solar-thermal systems employing adaptive gene-recombination PSO** [13940-54]

13940 0E **Fine-grained sentiment analysis of catering reviews based on ELECTRA-DPCNN model** [13940-59]

13940 0F **Study on error correction mechanism of ultrashort term load forecasting in electricity market considering flexible load response** [13940-37]

13940 0G **Modeling the nonlinear impact of meteorological factors on wind energy resources in complex terrain** [13940-44]

13940 0H **Cascading failures and recovery strategies in complex networks** [13940-75]

13940 0I **Research on business data prediction and analysis method based on parallel computing support vector machine** [13940-26]

13940 0J **Digital monitoring of environmental risks in power transmission and transformation engineering based on sensor networks and deep learning** [13940-78]

13940 0K **An intelligent prediction model for supply chain risk in the automotive manufacturing industry based on adaptive SVR** [13940-55]

13940 0L **A comparative study on S&P 500 index return forecasting based on ARIMA, GARCH, LSTM, and their hybrid models** [13940-82]

13940 0M **MS-DBNet: a heterogeneous temporal convolutional network for robust subject-specific cross-session motor imagery decoding** [13940-66]

13940 0N **An optimization strategy for long-tailed data distribution based on data augmentation and inverse class-frequency reweighting** [13940-76]

MACHINE LEARNING AND OPTICAL NEURAL NETWORKS

13940 0O **Construction and implementation of intelligent management platform for public training base based on digital twin technology** [13940-2]

13940 0P **Research on the construction of intelligent oral training system based on reinforcement learning and the optimization method of speech feedback** [13940-7]

13940 0Q **Design and implementation of a new business teaching platform based on multiagent collaborative modeling scenarios+projects** [13940-9]

13940 0R **Multimodal deepfake identification and detection** [13940-28]

13940 0S **Research on mathematical learning path optimization and intelligent diagnosis algorithm for large-scale learning behavior data** [13940-51]

13940 0T **Evaluation of functional training effectiveness based on deep learning** [13940-19]

13940 0U **A random forest-based study of abnormal usage pattern recognition in office space** [13940-12]

13940 0V **Mechanical fault diagnosis based on machine learning** [13940-16]

13940 0W **Research on algorithm optimization and implementation of college entrepreneurship intelligent recommendation system integrating reinforcement learning** [13940-52]

13940 0X **The application of reinforcement learning algorithm in dynamic regulation of cooling capacity of precision air conditioning in data centers** [13940-32]

13940 0Y **Real-time fault warning and condition monitoring technology of diesel generator parallel system based on edge computing** [13940-33]

13940 0Z **Analysis and optimization strategy of vocational college students' employment quality based on data mining** [13940-17]

13940 11 **Dynamic evaluation model of night tourism experience in Yangshuo West Street based on multisource heterogeneous data fusion: combining deep learning and edge computing architecture** [13940-46]

13940 12 **Application of sentiment analysis based on machine learning in tea drinking to relieve anxiety** [13940-29]

13940 13 **Reinforcement learning-driven adaptive teaching engine for building equipment digital twin** [13940-24]

13940 14 **Research on dynamic performance tuning of trusted computing systems based on eBPF and reinforcement learning** [13940-53]

13940 15 **Design of optimization algorithms for collaborative perception in connected autonomous vehicles** [13940-57]

13940 16 **Design of an edge computing otological disease diagnosis system based on deep learning and LLM** [13940-71]

13940 17 **Urban power grid zonal load forecasting based on spatio-temporal graph convolutional network (ST-GCN)** [13940-38]

13940 18 **Modeling and analysis of cluster energy spectrum data supported by graph convolutional neural network models** [13940-43]

13940 19 **A deep learning-based model for predicting soil erosion and landslide risk in pumped storage projects** [13940-61]

13940 1A **Application of deep learning in dynamic modeling of user interests in digital media** [13940-63]

13940 1B **Reinforcement learning-based LLM dialogue active learning strategy** [13940-67]

13940 1C **Color emotion analysis of streetscape images: application of convolutional neural networks in urban vitality assessment** [13940-69]

ARTIFICIAL INTELLIGENCE

13940 1D **Research on flow forecast of free trade zone trade based on LSTM-GRU** [13940-3]

13940 1E **Research on the construction of an intelligent platform system for innovation and entrepreneurship education integrating AI technology** [13940-35]

13940 1F **Design of multimodal generation model and semantic driven reconstruction method for intangible cultural heritage text language data** [13940-39]

13940 1G **Research on the construction and system integration implementation of a refined human resources management model for state-owned enterprises** [13940-40]

13940 1H **Research on behavior recognition and intelligent analysis model of multisource heterogeneous data** [13940-41]

13940 1I **Mining and analysis of students' behavior patterns based on big data** [13940-34]

13940 1J **Intelligent programming tutor: a programming pedagogy platform with algorithm visualization and GNN-based adaptive reasoning** [13940-42]

13940 1K **Research on the architecture and verification of a trusted carbon footprint verification system for cross-border supply chains facing carbon tariff policies** [13940-47]

13940 1L **Research on the application of AI illustration based on deep learning in digital art design** [13940-49]

13940 1M **Research on personalized teaching model of ideological and political course assisted by artificial intelligence** [13940-11]

13940 1N **Color texture feature fusion algorithm and system implementation for style recognition of traditional Chinese painting images** [13940-36]

13940 1O **The application of artificial intelligence technology in Japanese language education and its impact on learning effectiveness** [13940-14]

13940 1P **Fusion technology of finite element model and artificial intelligence for strength analysis of locomotive structure** [13940-20]

13940 1Q **Optimization of indoor space layout in new rural buildings based on multiobjective genetic algorithm** [13940-21]

13940 1R **Digital reconstruction and application of multiaxis machining course in secondary vocational schools based on virtual simulation platform** [13940-5]

13940 1S **Research on the course innovation of dance teaching for college students under the background of artificial intelligence** [13940-6]

13940 1T **Build an international trade risk assessment model based on big data** [13940-18]

13940 1U **Research on privacy-preserving distributed data mining methods** [13940-23]

13940 1V **A Fourier-accelerated PIDE framework for jump-diffusion option pricing and risk metrics** [13940-79]

13940 1W **Efficient and smooth obstacle avoidance path planning for mobile robots based on bidirectional A*-DWA fusion algorithm** [13940-56]

13940 1X **Prediction and path optimization of students' learning outcomes in bilingual classrooms based on the XGBoost algorithm** [13940-60]

13940 1Y **Application of large language models in multimodal medical data fusion diagnosis** [13940-74]

13940 1Z **Research on high-precision 3D reconstruction algorithm for distribution network based on the fusion of three-source laser and panoramic images** [13940-45]

13940 20 **The application of deep learning studies in cancer diagnosis** [13940-72]

13940 21 **Comparison and improvement of algorithms for cancer prediction based on deep learning** [13940-77]

13940 22 **Research on demand responsive transit scheduling optimization based on genetic algorithm** [13940-27]

13940 23 **Research on graph session commodity recommendation method based on large language model** [13940-25]

13940 24 **Space-air-ground collaborative geological disaster resilience assessment algorithm and system implementation integrating multisource heterogeneous data** [13940-50]

13940 25 **Research on asynchronous parallel computing technology of brain-inspired chips based on LIF neuron model** [13940-62]

13940 26 **Research on optimization of human resource allocation in high-tech manufacturing industry based on big data analysis** [13940-64]

13940 27 **Application of multisource heterogeneous data fusion algorithm in social management decision-making** [13940-65]

13940 28 **An improved YOLOv11 framework for robust helmet detection with focus on small-scale target detection** [13940-73]

13940 29 **Research on asset pricing model in the new energy industry: a quantitative innovation path based on BERT feature extraction and SFT** [13940-80]

13940 2A **Pathways and practices of AI-driven digital transformation in the manufacturing industry** [13940-81]

13940 2B **Research on the application of college English intelligent assessment system based on iTEST platform** [13940-68]
