Volume 13966

Proceedings of SPIE 0277-786X, V. 13966

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *8th Optics Young Scientist Summit (OYSS 2025)*, edited by Zhaojun Liu, Guangming Tao, Tian Jiang, Dong Liu, Ye Tian, Lai Wang, Chao Zuo, Proc. of SPIE 13966, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

EIGHTH OPTICS YOUNG SCIENTIST SUMMIT (OYSS 2025)

- 13966 02 **Simulation of in-plane displacement measurement based on conjugated vortex beams interference** [13966-2]
- 13966 03 **Research on high spatial resolution and large strain measurement optical frequency domain reflectometry system** [13966-3]
- 13966 04 **Enhancing the near-infrared sensitivity of silicon-based multipixel photon counters using upconversion fluorescent particles** [13966-4]
- 13966 05 **High-performance naked-eye light field 3D display** [13966-5]
- 13966 06 **Polarization identification and extraction of different cells in tendon tissue** [13966-6]
- 13966 07 **Deep learning-based image registration for lateral scanning optical interferometry** [13966-7]
- 13966 08 **High-precision wavelength interrogation method for phase-shifted fiber Bragg gratings** [13966-8]
- 13966 09 **Low-loss silicon nitride waveguides for visible light** [13966-9]
- 13966 0A **Probing multiphoton upconversion luminescence kinetics in micro/nanocrystals using time-resolved spectroscopy** [13966-10]
- 13966 0B **Robotic wheel polishing process for M-ZnS optical components** [13966-11]
- 13966 0C **Rotational Doppler speed measurement based on Fourier transform** [13966-13]
- 13966 0D **Optimization of thermal field and control algorithms in laser heated pedestal growth systems** [13966-14]
- 13966 0E **Dry etching-assisted femtosecond laser fabrication of silicon-based microlens arrays** [13966-17]
- 13966 0F **Low-background radial-shearing interferometer with 100mm-diameter beamstop-based non-confocal zone-plate twins** [13966-19]
- 13966 0G **Support-domain constraints enabled single-illumination-pattern differential phase contrast microscopy** [13966-20]

- 13966 OH **High-accuracy inverse solution for scanning trajectories of rotating three-element Risley prisms based on particle swarm optimization** [13966-21]
- 13966 OI **Free surface lattice beam shaping method for GM-APD array** [13966-22]
- 13966 OJ **Flexure-based gravity pre-compensation design for transport mirror** [13966-23]
- 13966 OK **Study on thermally induced wavefront distortions in large-aperture Neodymium glass slab laser amplifiers** [13966-24]
- 13966 OL **Modeling and optimization of piezoelectric composite transducers for photoacoustic and ultrasound dual-modality imaging** [13966-27]
- 13966 OM **The application of sliding mode controller based on direct position error in flexible drive system** [13966-29]
- 13966 ON **A dual-speed model for photoacoustic and ultrasound image reconstruction** [13966-31]
- 13966 OO **Study on the microhole drilling process in single-crystal SiC using a 532nm nanosecond laser** [13966-33]
- 13966 OP **Development of an 808nm semiconductor laser based on SiC/Cu composite heat sink packaging** [13966-34]
- 13966 OQ **Development of a low-cost photoacoustic imaging system based on FPGA-synchronized control** [13966-35]
- 13966 OR **Research on target tracking and detection technology based on Gm-APD FPA** [13966-36]
- 13966 OS **Application of a field-programmable gate array-based repetitive controller for optical axis tilt correction system** [13966-39]
- 13966 OT **Photonics-assisted mmW integrated sensing and communication system based on non-orthogonal multiple access** [13966-40]
- 13966 OU **A Laplacian pyramid method for photoacoustic and ultrasonic image fusion** [13966-41]
- 13966 OV **Single-shot multitarget imaging beyond the OME range around the corner through polarization component extraction** [13966-43]
- 13966 OW **A frequency-domain modulation decoupling control method for multibeam precision pointing** [13966-44]
- 13966 OX **Reflective film fabrication technology based on ultrasonic levitation** [13966-45]
- 13966 OY **Research on coding angle self-calibration based on compound eye array** [13966-48]

- 13966 0Z **Optical rogue waves induced during the formation of higher-order dissipative soliton molecules** [13966-50]
- 13966 10 **Motion-resolved 3D imaging based on spatial-temporal speckle projection profilometry** [13966-51]
- 13966 11 **Unsupervised fringe analysis based on regularized phase tracking** [13966-52]
- 13966 12 **Research on the phase modulation capability of pure phase optical addressing spatial light modulator** [13966-53]
- 13966 13 **Study on temperature-dependent performance of PCSEL based on the offset between quantum well gain peak and photonic crystal resonator mode** [13966-54]
- 13966 14 **Research on echo signal processing method based on single-photon detection** [13966-55]
- 13966 15 **Data-end-optimized low-photon non-line-of-sight imaging** [13966-56]
- 13966 16 **Non-contact optical beam deflection technique based on acoustic levitation** [13966-57]
- 13966 17 **Study on thermal effects induced by back-reflected oscillating laser in cascaded active fiber combiners** [13966-58]
- 13966 18 **Single-shot reconstruction of macroscopic object topography based on synthetic wavelength holography** [13966-59]
- 13966 19 **Experimental study on integrated oscillation and beam combining of fiber lasers** [13966-60]
- 13966 1A **High-precision single-photon imaging based on pile-up sequence inversion** [13966-61]
- 13966 1B **Numerical simulation study of non-coaxial problems in free electron lasers** [13966-63]
