PROCEEDINGS OF SPIE

International Workshop on Automation, Control, and Communication Engineering (IWACCE 2025)

Weihua Mou
Editor

8–10 August 2025
Changchun, China

Organized by
College of Communication Engineering, Jilin University (China)
Changchun Guanghua University (China)

Sponsored by
Association for Science and Engineering (China)

Published by
SPIE

Volume 13968

Proceedings of SPIE 0277-786X, V. 13968

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Workshop on Automation, Control, and Communication Engineering (IWACCE 2025)*, edited by Weihua Mou, Proc. of SPIE 13968, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

AUTOMATION CONTROL

13968 02 **Multiphysics modeling enabled automated and optimized control strategy for Antarctic nuclear microgrid** [13968-24]

13968 03 **A symbolic-computation-based passification method for switched polynomial nonlinear systems with time delays** [13968-35]

13968 04 **A fast-dimension-expansion spatial sensitivity function estimation method and device control** [13968-25]

13968 05 **Research and implementation of intelligent standardized management system for experimental equipment** [13968-36]

13968 06 **Design of an intelligent takeaway cabinet** [13968-52]

13968 07 **DSP-based absolute encoder communication and ultrasonic motor speed measurement** [13968-29]

13968 08 **Design and implementation of a missile-borne integrated electronic equipment** [13968-61]

13968 09 **Application of the P-CS algorithm in thermal deformation length measurement of tool systems in high-speed machining centers** [13968-11]

13968 0A **Research on the development of cooperative mission planning technology for unmanned aerial vehicle (UAV) clusters** [13968-63]

13968 0B **Research on surface shot peening technology for 316L stainless steel parts formed by selective laser melting** [13968-68]

13968 0C **An extracting method of line structured light stripe center on the mechanical part surface based on wavelet transform** [13968-4]

13968 0D **Model-free adaptive control for nonlinear time-delay systems using RBF neural network and PSA optimization** [13968-7]

13968 0E **Research on intelligent parameter measurement device for catenary based on autonomous correction algorithm** [13968-23]

13968 0F **Active multiagent SLAM: a unified framework for high-fidelity reconstruction and global consistency** [13968-44]

13968 0G **Structural optimization and frequency split mitigation in miniature traveling wave ultrasonic motors** [13968-38]

13968 0H **Intelligent microgrid operation control strategy in islanded mode** [13968-15]

13968 0I **Design of a performance simulation system for autonomous vehicles based on unity** [13968-14]

INTELLIGENT INFORMATION PROCESSING

13968 0K **LED patch defect detection experiment based on global context dual attention mechanism** [13968-9]

13968 0L **Spectral reflectance reconstruction based on IWOA-BP algorithm** [13968-21]

13968 0M **Sonar-DETR: a forward looking sonar object detection method based on improved RT-DETR** [13968-39]

13968 0N **MegaPlan: MCTS enhanced with LLMs and GNNs for large-scale planning** [13968-59]

13968 0O **A time series anomaly detection method integrating GAN and GRU** [13968-30]

13968 0P **Research on security risks and governance pathways of large-model industry** [13968-71]

13968 0Q **Expression recognition method of SE perception network under joint loss** [13968-41]

13968 0R **MTIM: a novel malicious traffic identification method based on improved residual neural network** [13968-3]

13968 0S **SyCR-SLAM: synergistic cross-modal representation SLAM** [13968-40]

13968 0T **Application of grey relational analysis with machine learning in the quantitative analysis of near-infrared spectra** [13968-1]

13968 0U **Design and implementation of tourism platform in Jilin Province based on Vue.js** [13968-8]

13968 0V **Improved multiscale soft threshold residual network for fire hose flow rate measurement** [13968-16]

13968 0W **Variation characteristics in the seismogenic fault activity of Yushu *M*7.1 earthquake based on thermal infrared remote sensing data** [13968-17]

13968 0X **A model recognition method based on trajectory motion features and ResNet pretrained model** [13968-62]

13968 0Y **Probabilistic electricity price prediction with explainable ensemble lightweight models** [13968-33]

13968 0Z **High-entropy pseudorandom sequence generator based on 4-D hyperchaos and GRU** [13968-31]

13968 10 **Optimization scheme for covert communication in artificial noise assisted RIS-NOMA system** [13968-6]

13968 11 **Research on distributed trace fusion technology based on dual parallel processing** [13968-26]

13968 12 **A dynamic network security management method based on the zero-trust concept** [13968-57]

13968 13 **Research on virtual reality content distribution method based on CDN and FOV** [13968-42]

13968 14 **Research on general testing technology and methods for satellite navigation terminals** [13968-66]

13968 15 **The algorithm for estimating the full velocity vector in a single frame for a distributed target with a complex law of motion** [13968-5]

13968 16 **Security-enhanced design for anti-intercept waveform design based on cryptography S-box component** [13968-49]

13968 17 **Research on QKD network routing algorithm based on key consumption** [13968-19]

13968 18 **A new four-dimensional chaotic system with complex phase portraits and its circuit simulations** [13968-51]

13968 19 **Research on secure transmission of communication voice signals based on hybrid encryption** [13968-58]

13968 1A **A high-concurrency UWB localization engine design based on Taylor algorithm** [13968-28]

13968 1B **High-precision differential LORAN for robust navigation in high-interference environments** [13968-72]

13968 1C **Construction method of secure self-organizing network for cyberspace data protection** [13968-69]

13968 1D **Automatic modulation classification based on ensemble learning** [13968-50]

13968 1E **ECC-enhanced hybrid texture-adaptive LSB steganography for secure image transmission** [13968-60]

13968 1F **Echo recognition and automatic clutter suppression technology applied to unmanned boat navigation radar** [13968-54]

13968 1G **Communication message unloading and resource allocation method for distribution automation** [13968-45]

13968 1H **A new four-dimensional continuous chaotic system and its application in generating pseudorandom binary sequences** [13968-32]
