Volume 13969

Proceedings of SPIE 0277-786X, V. 13969

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Advances in Computer Science, Information Technology, and Communications (CSITC 2025)*, edited by Yong Yue, Ickho Song, Jixin Ma, Proc. of SPIE 13969, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MACHINE LEARNING

- 13969 02 **Research on object pose estimation algorithm based on machine learning** [13969-46]
- 13969 03 **Research on adaptive parking space recognition algorithm based on improved YOLO** [13969-25]
- 13969 04 **Multiteacher knowledge distillation for spoof speech detection** [13969-35]
- 13969 05 **Application research on visual recognition of thermochromic materials based on multimodel fusion** [13969-20]
- 13969 06 **Towards cross-modal facial emotion recognition with rPPG and 3D facial depth** [13969-32]
- 13969 07 **CLIP-PLoRA: prompt learning and local refinement for aerial person reidentification** [13969-33]
- 13969 08 **Vision meets language: a novel residual learning framework with LLM blocks for robust representations** [13969-36]
- 13969 09 **X-ray knife detection and risk assessment system empowered by multimodal large language model** [13969-4]
- 13969 0A **Efficient identification of tobacco worm cocoons using transfer learning and lightweight YOLOv5n: an empirical analysis for industrial automation** [13969-6]
- 13969 0B **GLST-GCN: global-local spatiotemporal graph convolutional network for gait emotion recognition** [13969-38]

INFORMATION SYSTEMS AND APPLICATIONS

- 13969 0C **UE PMI-driven smart beamforming weight optimization for 5G base stations** [13969-14]
- 13969 0D **Research on indoor positioning method based on improved UKF multisensor fusion** [13969-11]
- 13969 0E **Research on multimodal target tracking system based on forest environment** [13969-19]
- 13969 0F **Innovative practices in smart production and warehouse management for dairy digital transformation** [13969-3]

- 13969 OG **Research on two-dimensional angle estimation algorithm for coprime arrays based on matrix reconstruction** [13969-29]
- 13969 OH **Neural distortion minimization for private information retrieval from multiple access channels with continuous messages** [13969-2]
- 13969 OI **Heterogeneous computing resource scheduling based on user demand strategy** [13969-40]
- 13969 OJ **Hierarchical scheduling strategy for ground-based observation resources under multiple constraints** [13969-1]
- 13969 OK **Visual analysis of fault arc research based on CiteSpace** [13969-9]
- 13969 OL **Research on lightning nowcasting method based on R2U-GAN fusion of multisource spatiotemporal information** [13969-28]

COMPUTING TECHNOLOGY AND PERFORMANCE

- 13969 OM **Performance evaluation of the STBC-OFDM MIMO systems in correlated Rayleigh channels using singular value decomposition** [13969-13]
- 13969 ON **Image dehazing based on multifeature fusion and dynamic optimization technology** [13969-22]
- 13969 OO **Collaborative task offloading strategy for edge computing in small cell networks** [13969-12]
- 13969 OP **Research on logistics delivery path optimization in LBS environment based on improved artificial crowd search algorithm** [13969-41]
- 13969 OQ **A microservices approach to scenario-based integration of smart mobility digital twins** [13969-34]
- 13969 OR **SAME: stability-aware MIMO-enhanced maximum weight matching** [13969-21]
- 13969 OS **Autoscaling method for computing power scheduling resource pool in cloud environment** [13969-45]
- 13969 OT **VT-Former: dual-stream transformer with cross and adaptive sparse attention for bearing fault diagnosis** [13969-39]
- 13969 OU **A method for 3D human body reconstruction and acupoint localization based on SMPLify-M** [13969-7]
- 13969 OV **Lightweight feature extraction and dual-stream assisted method for remote sensing super-resolution** [13969-8]
