PROCEEDINGS OF SPIE

International Conference on Signal Processing and Neural Network Applications (SPNNA 2025)

Cheng Wang
Dezhi Wei
Editors

26–28 September 2025
Xiamen, China

Organized by
Huaqiao University (China)
Jimei University (China)

Published by
SPIE

Volume 13970

Proceedings of SPIE 0277-786X, V. 13970

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Signal Processing and Neural Network Applications (SPNNA 2025)*, edited by Cheng Wang, Dezhi Wei, Proc. of SPIE 13970, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*
vii *Introduction*

SIGNAL, IMAGE AND NEURAL PROCESSING

13970 02 **Deep learning-based detection and segmentation of micro-embolic signals in contrast-enhanced transcranial Doppler** [13970-35]

13970 03 **Dual-wavelength parallel interference digital holography based on polarization wave splitting** [13970-20]

13970 04 **A rapid and high-precision satellite signal acquisition method based on sinc function fitting correction** [13970-36]

13970 05 **S*: TSP path planning for UAV-based wildfire rescue via density-clustering-enhanced genetic algorithm** [13970-38]

13970 06 **Surface defect detection of arc weld seams based on YOLOv8n with integrated convolutional gated linear units** [13970-31]

13970 07 **Research on lung cancer screening based on neural networks and sensor arrays** [13970-42]

13970 08 **Blind source separation for satellite communication anti-interference: a FastICA-based front-end solution with dual-channel hardware prototype** [13970-15]

13970 09 **Dual-stream selective attention network for efficient super-resolution** [13970-9]

13970 0A **Self-supervised contrastive learning with multi-instance attention for Raman spectrum-based cancer classification** [13970-37]

13970 0B **Discrete manufacturing flexible transition: research on digital twin of high-end equipment and intelligent algorithm closed-loop system** [13970-8]

13970 0C **DiffGAN3DRecon: diffusion adversarial generative network for 3D face reconstruction** [13970-12]

13970 0D **Research on heart sound classification algorithm fusing bispectral features and enhanced residual neural network** [13970-13]

13970 0E **Research on low illumination image enhancement algorithm based on convolutional neural network** [13970-24]

13970 0F **Research on radar signal recognition based on deep learning** [13970-29]

13970 0G **A dual-view contrastive learning model with gated graph convolutions for drug–target binding affinity prediction** [13970-5]

13970 0H **Semantic and structure integrated biological heterogeneous graph contrastive learning model for long noncoding RNA: disease association prediction** [13970-27]

13970 0I **An algorithm for book recommendation system based on improved NCF model** [13970-2]

13970 0J **Ship target classification from underwater acoustics with parallel dilated convolution and attention** [13970-33]

13970 0K **Exploratory application of neural networks in movie style transfer** [13970-22]

13970 0L **Reconstruction analysis of the technical route for role consistency of Google nano banana model** [13970-25]

13970 0M **Graph neural network-based approach for accounting information fraud detection** [13970-39]

13970 0N **RRPN-AM: a ship hull number detection model based on rotating region proposal networks and attention mechanisms** [13970-32]

13970 0O **A Swin-Transformer enhanced LLM framework for medical visual question answering** [13970-7]

13970 0P **High-precision ranging for LFMCW radar based on the Quinn-CZT algorithm** [13970-3]

13970 0Q **Reversible data hiding in encrypted images based on an attention-enhanced CNN and enhanced linear predictors** [13970-16]

13970 0R **High-gain transimpedance amplifier design for high-responsivity photodetector microcurrent detection** [13970-18]

13970 0S **Online identification of leakage current signals for drop-type lightning rods using singular spectrum analysis** [13970-43]

13970 0T **Research on a non-invasive blood pressure prediction method based on deep learning and multifeature fusion of PPG signal** [13970-26]

13970 0U **Vegetable recognition system based on deep learning convolutional neural network** [13970-17]

13970 0V **A large multitask model for joint text recognition and analysis of medical documents** [13970-30]

13970 0W **Adaptive ensemble of multistream graph convolutional networks for skeleton-based action recognition** [13970-41]

13970 0X **Breast cancer detection method based on dual-mechanism federated learning** [13970-23]
