

PROCEEDINGS OF SPIE

International Conference on Electrical Engineering and Smart Grid (EESG 2025)

**Noor Izzri Abdul Wahab
Pierluigi Siano**
Editors

**19–21 September 2025
Chongqing, China**

Organized by
Chongqing University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13972
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13972

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Electrical Engineering and Smart Grid (EESG 2025)*, edited by Noor Izzri Abdul Wahab, Pierluigi Siano, Proc. of SPIE 13972, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

OPTOELECTRONIC SIMULATION AND MODELING

- 13972 02 **Design and simulation of island integrated energy system based on diversified power generation and efficient energy storage** [13972-191]
- 13972 03 **Stability simulation study of transmission line mounted mechanical devices under wind loads** [13972-182]
- 13972 04 **Numerical simulation of boiler air classification low NO_x combustion in 600MW unit** [13972-23]
- 13972 05 **Research on spatial layered representation technology of railway GIS based on vector files** [13972-178]
- 13972 06 **Study on the effectiveness of engineering geological exploration in coastal areas based on underwater electrical resistivity tomography** [13972-181]
- 13972 07 **Parameter optimization of the transmission system based on an orthogonal test method** [13972-41]
- 13972 08 **Comprehensive study on clean energy optimization and pollutant reduction of crematorium based on secondary combustion technology** [13972-61]
- 13972 09 **Research on the evaluation index system for the effectiveness of China's pilot trading of energy use rights** [13972-171]
- 13972 0A **The impact of geomagnetic variations on medium-energy proton flux at low altitudes** [13972-145]
- 13972 0B **Refrigeration device coupled with phase change cold storage** [13972-14]
- 13972 0C **Advances in the improvement of cold flowability of crude oil via electric treatment: efficacy, influencing factors, and mechanisms** [13972-70]
- 13972 0D **Research on calibration equation of NTC thermistor thermometer in the range of -5~35°C** [13972-15]
- 13972 0E **Study on standard cost determination technology of power grid maintenance operation based on IPSO** [13972-200]

- 13972 OF **Application of cloud computing in extreme load cases analysis for full containment LNG tank** [13972-5]
- 13972 OG **Mortise and tenon construction and integration of 3D high energy density miniaturized zinc ion hybrid supercapacitor** [13972-89]
- 13972 OH **Performance testing and data processing of transformer insulating materials based on the terahertz method** [13972-96]
- 13972 OI **Multiple data sources fusion using means substation equipment operation based on cloud-side collaboration technology** [13972-95]
- 13972 OJ **Study on the emission reduction efficiency of ultra-low emission systems on polycyclic aromatic hydrocarbons in flue gas from coal-fired power plants** [13972-39]
- 13972 OK **Simulation and analysis of ship corrosion electric field in stratified marine environments** [13972-189]
- 13972 OL **Application of reliability-centered maintenance technology for condensate pumps based on multidimensional data fusion** [13972-6]
- 13972 OM **Numerical investigation of wind pressure on a streamlined closed-box girder during vortex-induced vibration** [13972-133]
- 13972 ON **Achieving highly passivated p-type TOPCon structure with iV_{oc} of 735mV and $J_{0,s}$ of 5–7 fA/cm² by tubular PECVD technology** [13972-175]
- 13972 OO **Performance assessment of an advanced electrode architecture for perovskite solar modules** [13972-129]
- 13972 OP **Error evaluation method of voltage transformer in distribution network based on transformer ratio characteristics and graph attention network** [13972-99]
- 13972 OQ **Design and simulation analysis of core robotic arm joints for substation environments** [13972-122]
- 13972 OR **Research on the flow resistance characteristics of plate heat exchangers in pressure isolation stations** [13972-26]
- 13972 OS **Research on the standard system for disassembly of automotive power batteries** [13972-85]
- 13972 OT **Catalyst design and challenges in seawater electrolysis for hydrogen and oxygen evolution reactions** [13972-10]
- 13972 OU **Modeling and simulation analysis of vibration prevention for transmission conductor breeze vibration** [13972-87]
- 13972 OV **Study on the adhesion performance of glaze layer on black glazed glass** [13972-80]
- 13972 OW **A comprehensive understanding of UV-induced degradation of silicon PV modules** [13972-97]

- 13972 0X **Multiresolution representation of distribution network triangular mesh based on incremental learning algorithm of power operation unbalanced big data** [13972-138]
- 13972 0Y **Abnormal production behavior section location algorithm based on SST-SCKF and power big data** [13972-144]
- 13972 0Z **Research and analysis on the replacement of part of the heliostat field with electric molten salt heaters in photovoltaic-solar thermal integrated power stations** [13972-54]
- 13972 10 **Structural design and numerical simulation of gas-liquid separator based on a cyclone separator** [13972-30]
- 13972 11 **Verification of the reliability statistical model for electrical connectors under thermal-vibration coupled stresses** [13972-27]
- 13972 12 **Precision-aware compression algorithm for power data** [13972-105]
- 13972 13 **Hydrogen leakage accident and risk analysis of laboratory hydrogen cylinder cabinet** [13972-79]
- 13972 14 **Current status and prospects of digital twin technology in grid industry in the background of 5G IoT** [13972-56]
- 13972 15 **Simulation and exploration of the propagation law of high-energy arc pressure wave of oil-immersed bushing** [13972-170]
- 13972 16 **Analysis of lightning-resistant performance of 500kV large span tower and optimization of tower head clearance** [13972-137]
- 13972 17 **Fundamental and harmonic fractional power metering method based on triangular self-winding window spectrum characteristics** [13972-150]
- 13972 18 **Feasibility study and evaluation of digitalization of power grid driven by artificial intelligence** [13972-76]
- 13972 19 **Optimization of cage-type infrared heating system design for specialized environmental simulation test chamber** [13972-174]
- 13972 1A **Sustainability assessment of 500kV substations based on ESG indicators** [13972-121]
- 13972 1B **Design and research of fluxgate pressure housing for deep-sea exploration** [13972-128]
- 13972 1C **MSRE-based repeatability assessment of UAV-based ground-airborne frequency-domain electromagnetic system** [13972-164]
- 13972 1D **Physical-virtual simulation system with renewable energy integration** [13972-78]
- 13972 1E **Reassessing the transport mechanism of TOPCon cell's passivating contact structure** [13972-9]

- 13972 1F **Seismic facies analysis method integrating acoustic impedance features and spectral features** [13972-11]
- 13972 1G **Progress in design and process optimization of surge capability improvement of silicon carbide power devices** [13972-32]
- 13972 1H **Prediction method and application of investment completion rate for distribution network projects based on financial expenditure approach** [13972-83]
- 13972 1I **Temperature-pressure coupling study of production tubing column of ultra-deep wells in a western oilfield** [13972-16]
- 13972 1J **Influence of insulation design of high frequency transformer on voltage distribution along the winding** [13972-147]
- 13972 1K **Distribution network loss prediction method based on least squares support vector machine** [13972-168]
- 13972 1L **Modeling and simulation for intrusion detection system of power stability control system in source-grid-load integrated control** [13972-158]
- 13972 1M **Applying transformers to short-term node price forecasting in power systems** [13972-161]
- 13972 1N **Multienergy load forecasting for integrated energy system based on multitask learning and improved LSTM** [13972-35]
- 13972 1O **A method of online prediction based on federated learning using electric data** [13972-155]

POWER SYSTEM CONTROL AND OPTIMIZATION

- 13972 1P **Research on AVC control strategy of transmission and distribution networks based on multiagent collaborative optimization** [13972-125]
- 13972 1Q **Measurement and optimization of contact thermal resistance within motor controller based on thermal simulation** [13972-3]
- 13972 1R **Research on the application and optimization of modern digital supply chains in the power grid material fulfillment supply chain** [13972-126]
- 13972 1S **Research on power quality of grid-connected inverters based on FCS-MPCC control** [13972-160]
- 13972 1T **Automatic control technology for distributed relay protection devices based on one-dimensional dense connection convolutional networks** [13972-113]
- 13972 1U **A multimode coordinated sag control method for hybrid energy storage microgrids based on multiple intelligences** [13972-124]

- 13972 1V **Optimal decision making for green electricity merchants participation in spot market based on bi-level optimization** [13972-43]
- 13972 1W **Control strategy optimization for hybrid air source heat pump and gas boiler heating systems in cold climates** [13972-190]
- 13972 1X **An intelligent control method for DC transformer bus voltage stabilization based on dq transformation algorithm** [13972-117]
- 13972 1Y **Planning method for grid-connected integrated system of sources-grid-loads-energy storage** [13972-8]
- 13972 1Z **Mitigation of PLL-induced negative phase shift effects in grid-following inverters via grid-current feedback control** [13972-71]
- 13972 20 **Based on multiobjective whale optimization algorithm for load shedding control in distributed photovoltaic distribution networks** [13972-20]
- 13972 21 **A defense algorithm for false data injection attacks in power industrial control networks under opportunity constrained planning** [13972-153]

Part Two

- 13972 22 **Fuzzy stochastic control algorithm for virtual power plant capacity of source-grid-load-storage integration under demand constraints** [13972-116]
- 13972 23 **Research on a complex question-answering system for power knowledge based on LLM and reinforcement learning** [13972-184]
- 13972 24 **Statistical regression: Nash dynamic weighting and CVaR-based robust efficiency evaluation method for vehicle-grid collaborative planning** [13972-92]
- 13972 25 **Production simulation and comprehensive benefit evaluation method for shore power energy routers considering long-term and short-term uncertainties** [13972-93]
- 13972 26 **Research on technological innovation in marketing inspection for the smart grid era** [13972-110]
- 13972 27 **Optimization and scheduling of integrated energy systems considering stepped carbon trading** [13972-187]
- 13972 28 **Research on power improvement control in dual motor hybrid system** [13972-25]
- 13972 29 **Optimization layout method of electric vehicle emergency charging stations based on spatiotemporal coupling demand** [13972-24]
- 13972 2A **Research on motor temperature estimation control in dual motor hybrid system** [13972-17]

- 13972 2B **Research on the pricing decision of thermal power plants under electricity spot market transactions** [13972-166]
- 13972 2C **Energy storage optimization planning algorithm for transmission line safety monitoring** [13972-103]
- 13972 2D **Optimization method for combined cooling, heating, and power integrated energy system based on the NSGA-II-MOPSO algorithm** [13972-31]
- 13972 2E **Active power reserve control for PV generation based on grid-forming inverters** [13972-82]
- 13972 2F **Research on key technologies for demand review of power grid project feasibility studies based on large language models** [13972-192]
- 13972 2G **Decision optimization of nuclear power unit maintenance scheduling based on fault entropy and gradient-based optimization algorithm** [13972-102]
- 13972 2H **Construction of battery energy storage optimization configuration model of optical storage microgrid based on state of charge** [13972-101]
- 13972 2I **Research on key technologies of intelligent distribution network live working rescue device** [13972-28]
- 13972 2J **Grid-integrated multienergy optimal dispatch incorporating ramp capability utilization** [13972-112]
- 13972 2K **Nonlinear error correction algorithm for dynamic DC power metering module based on priority** [13972-123]
- 13972 2L **Research on the motor control during uphill condition in dual motor hybrid system** [13972-12]
- 13972 2M **Research on second level response model of independent energy storage system on power grid side based on multitime scale collaborative optimization** [13972-100]
- 13972 2N **Multienergy coupled energy base model based on distributionally robust optimization of Wasserstein distance** [13972-179]
- 13972 2O **Optimal dispatch of low carbon energy base considering carbon capture and combined thermal and power** [13972-188]
- 13972 2P **Control strategy for permanent magnet synchronous motors based on an improved extended Kalman filter** [13972-29]
- 13972 2Q **Analysis of intelligent distribution network optimization scheduling strategies** [13972-63]
- 13972 2R **Method and control requirements for cyclic current-based anti-icing and de-icing of bundled conductors** [13972-169]

POWER EQUIPMENT SENSING AND MONITORING

- 13972 2S **Construction scheme of three-dimensional realistic main and auxiliary monitoring system for substation** [13972-67]
- 13972 2T **Fracture behavior of straight reinforced concrete pole in distribution line under icing conditions** [13972-88]
- 13972 2U **Short-term wind farm power over-limit state recognition based on meteorological variables and LSTM algorithm** [13972-108]
- 13972 2V **LSTM-attention hybrid model voltage over-limit recognition method for photovoltaic high penetration distribution network** [13972-120]
- 13972 2W **Research on real-time monitoring and predictive maintenance of photovoltaic construction projects based on AI** [13972-193]
- 13972 2X **Fault diagnosis method for on-load tap changers based on 1D-CNN** [13972-199]
- 13972 2Y **Development and application of an IoT-based high-stability electric energy metering platform** [13972-180]
- 13972 2Z **Comprehensive evaluation algorithm for biodiversity and vulnerability of alpine meadows under the influence of power transmission and transformation projects** [13972-115]
- 13972 30 **Detection and control system for the pyrolysis and incineration of waste tributyl phosphate (TBP) and kerosene** [13972-91]
- 13972 31 **Intelligent monitoring and optimization of rural distribution networks based on AI and IoT** [13972-127]
- 13972 32 **Design of industrial air conditioning demister plater based on ceramic honeycomb structure** [13972-84]
- 13972 33 **DQN-RXN organic reaction prediction algorithm based on reinforcement learning** [13972-2]
- 13972 34 **A method for identifying the resilience of small-disturbance damage of multiple current sensors in power operation based on big data and BPNN** [13972-139]
- 13972 35 **Research and application of intelligent operation and maintenance system for distributed photovoltaic power station** [13972-202]
- 13972 36 **Fault prediction and preventive maintenance strategy of new energy power station based on deep learning** [13972-201]
- 13972 37 **State perception and fault prediction of smart distribution systems based on IoT and edge computing** [13972-4]
- 13972 38 **Integrated defense framework of urban distribution network considering typhoon disasters** [13972-143]

- 13972 39 **Analysis of cavitation and flow-induced vibration of the ruptured needle valve in a hydropower station** [13972-52]
- 13972 3A **Research on the prediction method of operating transformer error under multifactor interference condition** [13972-131]
- 13972 3B **Flood risk assessment of Beijing power grid for 23·7 rainstorm coupled with historical floods** [13972-90]
- 13972 3C **Method for identifying anomalies of short-term electricity characteristics under Kalman fusion of large power model data** [13972-118]
- 13972 3D **Robust mobile energy storage configuration for distribution networks with renewable energy uncertainty** [13972-34]
- 13972 3E **Research and application of intelligent monitoring system for transmission lines with deep learning integration** [13972-114]
- 13972 3F **Research on DGA power transformer fault diagnosis based on AdaBoost-IAE-LSSVM** [13972-33]
- 13972 3G **Anomaly detection method for high-voltage users' electricity consumption data based on multisource Data D-S evidence fusion algorithm** [13972-140]
- 13972 3H **Research on operation and maintenance system for hydropower stations based on digital twin** [13972-135]
- 13972 3I **Automated scoring system for virtual simulation operations based on computer vision** [13972-157]
- 13972 3J **Research on fault maintenance method of a mechanical electric system based on machine learning and knowledge graph** [13972-142]
- 13972 3K **Research on partial discharge signal recognition and trend prediction based on deep learning and digital twin technology** [13972-119]
- 13972 3L **Analysis of pressure cook test failure of 1200V silicon carbide diodes** [13972-37]
- 13972 3M **A method for risk identification in electric power supply chain based on Q-learning with stochastic configuration network** [13972-173]
- 13972 3N **Modeling method of multicondition output characteristics of photovoltaic modules based on nonlinear identification** [13972-165]
- 13972 3O **Analysis of synthetic electric fields at environmentally sensitive points under the influence of wind speed** [13972-186]
- 13972 3P **Research on multiparameter detection of moisture defect development process of 110kV oil-paper bushings** [13972-167]

- 13972 3Q **Research on intelligent power grid metering and management system based on multimodal data fusion** [13972-111]
- 13972 3R **Wideband oscillation source location and propagation feature analysis for hybrid AC/DC power systems via convolutional neural network** [13972-38]
- 13972 3S **Fault characterization and protection method of flexible DC distribution line** [13972-149]
- 13972 3T **Research on power AI inference service architecture and applications under cloud-edge-end collaboration** [13972-104]
- 13972 3U **Collaborative design and practice of integrating permanent and temporary facilities in pumped storage power stations from a life-cycle perspective** [13972-40]
- 13972 3V **The analysis of the new electric power system under the low-carbon transition** [13972-64]
- 13972 3W **Research on heat dissipation of air coolers for converter transformers under high altitude conditions** [13972-48]
- 13972 3X **Transformer infrared and visible defects recognition based on semantic segmentation edge computing** [13972-152]
- 13972 3Y **Analysis of the spectral characteristics and influencing factors of Rydberg atom EIT** [13972-22]
- 13972 3Z **Research on electromagnetic interference and countermeasures in quantum measurement of low-frequency electric fields** [13972-81]
- 13972 40 **Fault analysis and importance research of electric vehicle drive motor** [13972-60]
- 13972 41 **Development of a dual-pulse test platform for engineering field use of fully controlled power devices** [13972-74]
- 13972 42 **Construction and application of an intelligent algorithm-based power grid self-diagnosis system** [13972-176]
