

PROCEEDINGS OF SPIE

***International Conference on
Wireless, Optical Communication,
and Information Engineering
(WOCIE 2025)***

Yang Yue
Editor

8–10 August 2025
Sydney, Australia

Organized by
Xi'an Jiaotong University (China)

Sponsored by
Monash University (Australia)
Melbourne School of Engineering (Australia)

SPIE

Volume 13973

Proceedings of SPIE 0277-786X, V. 13973

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Wireless, Optical Communication, and Information Engineering (WOCIE 2025)*, edited by Yang Yue, Proc. of SPIE 13973, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTERNATIONAL CONFERENCE ON WIRELESS, OPTICAL COMMUNICATION, AND INFORMATION ENGINEERING (WOCIE 2025)

- 13973 02 **Selection and application of new conductors in the capacity expansion and renovation of high-voltage lines** [13973-13]
- 13973 03 **Graph neural network modeling for language evolution data and tracing the historical language relationships** [13973-5]
- 13973 04 **Research on deep fake detection technology of multimedia information based on deep learning** [13973-2]
- 13973 05 **Research on deep fake detection method based on multifeature knowledge distillation** [13973-3]
- 13973 06 **Joint evaluation method for network slicing performance of 5G power virtual private network based on edge computing** [13973-14]
- 13973 07 **Quantitative evaluation and optimization method for distributed service collaboration performance of 5G power virtual private network** [13973-15]
- 13973 08 **The cooperative enhancement technology of 5G air interface dual transmission and selective reception and MIMO in industrial internet** [13973-20]
- 13973 09 **Neurobiological study on the relationship between biological growth environment and psychological resilience** [13973-10]
- 13973 0A **Dynamic routing optimization algorithm and cost analysis in shipping logistics network** [13973-1]
- 13973 0B **Strategies of power network fault diagnosis and restoration dispatching based on machine learning** [13973-11]
- 13973 0C **Power system state estimation and fault diagnosis based on big data** [13973-12]
- 13973 0D **Embedded microgrid EMS fault recognition algorithm based on deep learning** [13973-7]
- 13973 0E **Analysis of main-distribution-microgrid integration and development of intelligent decision algorithm of collaborative control** [13973-9]
- 13973 0F **Research on power system dispatching automation technology and algorithm for new energy access** [13973-4]

- 13973 0G **Application of rapid chromatic dispersion measurement technology of fiber using asymmetric Sagnac interferometer in intelligent optical fiber sensing** [13973-27]
- 13973 0H **IoT sensor network and adaptive Kalman filtering-based dynamic monitoring technology for vegetation microenvironment in Fushun city ecological restoration area** [13973-16]
- 13973 0I **Research on heterogeneous environment security of distribution network based on distributed collaborative monitoring model** [13973-28]
- 13973 0J **Research on real-time accounting method of industrial enterprises' carbon emissions based on edge computing of the Internet of Things** [13973-25]
- 13973 0K **Research on GAN-driven intelligent design system for dynamic posters** [13973-26]
- 13973 0L **A method for identifying mathematical formula relationships and semantic modeling in universities based on graph neural networks** [13973-29]
- 13973 0M **Satellite network dynamic perception and link control for power communication scenarios** [13973-30]
- 13973 0N **Intelligent annotation technology and system implementation for English and American literature based on multimodal deep semantic analysis** [13973-24]
- 13973 0O **Automatic generation and optimization model of aging indoor layout based on generative adversarial networks** [13973-23]
- 13973 0P **Design of end-to-end control algorithm for autonomous driving based on deep learning** [13973-22]
- 13973 0Q **High-precision safety monitoring technology for crane operation in substation based on YOLO model and stereo vision** [13973-31]
- 13973 0R **Research on target recognition and distance estimation algorithm of transmission line tree obstacles and components based on binocular vision** [13973-33]
- 13973 0S **Research on dynamic measurement technology of transmission line and tree clearance based on image matching and stereo reconstruction** [13973-32]
- 13973 0T **Research on dynamic allocation strategy of network security resource pool based on deep reinforcement learning** [13973-18]
- 13973 0U **Dynamic partitioning and deep learning scheduling algorithm of elastic resource pool for cloud-network-security integration** [13973-19]
- 13973 0V **Research on decision support of university personnel management system based on cluster analysis** [13973-17]

- 13973 0W **Predicting Olympic medals and analyzing the great coach effect based on multioutput regression [13973-34]**
- 13973 0X **Optimization of lead screw transmission efficiency and adaptive anti-disturbance position control of electromechanical brake actuator [13973-21]**
