Volume 13977

Proceedings of SPIE 0277-786X, V. 13977

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventh International Conference on Information Technology and Computer Communications (ITCC 2025)*, edited by Chaofeng Zhang, Proc. of SPIE 13977, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

INTELLIGENT INFORMATION SYSTEMS AND ADVANCED COMPUTING

- 13977 02 **Digital twin for real-time forest fire monitoring and response** [13977-3]
- 13977 03 **Smart manufacturing for snacks: integrating SMED, predictive maintenance, line balancing, IoT, and machine learning to improve efficiency** [13977-4]
- 13977 04 **Kubernetes-based multi-tenant platform as a service** [13977-9]
- 13977 05 **Interactive virtual tree pruning 3D simulation based on WebGL** [13977-10]

FUTURE COMMUNICATION SYSTEMS AND IOT APPLICATION TECHNOLOGIES

- 13977 06 **Integrating machine learning and IoT for real-time wildlife tracking and crowd sourcing** [13977-6]
- 13977 07 **ZKP-based authentication for secure D2D salvage transmission in 5G/6G networks** [13977-2]
- 13977 08 **Noise injection and artificial interference at the physical layer for enhanced privacy in IoB (Internet of Behaviour) networks** [13977-1]

MEDICAL DATA ANALYSIS AND DISEASE PREDICTION

- 13977 09 **An integrated data-driven approach for chronic kidney disease of unknown etiology (CKDu) risk profiling and prediction in Sri Lanka** [13977-7]

ADVANCED ELECTRONIC AND MEASUREMENT TECHNOLOGIES

- 13977 0A **A measurement of the lighting illumination and uniformity level at self-service laundry** [13977-8]
- 13977 0B **Multilayer transparent film thickness measurement method based on spectral confocal** [13977-11]
