

PROCEEDINGS OF SPIE

# ***Fourteenth National Conference on Photonics***

**Yongkang Dong**  
**Hongwei Li**  
*Editors*

**15–17 August 2025**  
**Harbin, China**

*Organized by*

Chinese Optical Society Committee of Fiber Optics and Integrated Optics (China)  
Chinese Optical Society Committee of High-Speed Photography and Photonics (China)  
Chinese Optical Society Committee of Information Optoelectronic Devices Technology (China)

*Sponsored by*

Harbin Institute of Technology (China)  
Xi'an Institute of Optics and Precision Mechanics of CAS (China)  
National Key Laboratory of Laser Space Information (China)  
Heilongjiang Optical Society (China)

*Published by*  
SPIE

**Volume 13986**

Proceedings of SPIE 0277-786X, V. 13986

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourteenth National Conference on Photonics*, edited by Yongkang Dong, Hongwei Li, Proc. of SPIE 13986, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510699182

ISBN: 9781510699199 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## FOURTEENTH NATIONAL CONFERENCE ON PHOTONICS

---

- 13986 02 **Fading-resistant TGD-OFDR utilizing bipolar multiband nonlinear frequency modulated pulse multiplexing** [13986-1]
- 13986 03 **Thermal radiation based on graphene-MIM metasurface** [13986-3]
- 13986 04 **Tilted knife edge-based MTF lens quality detection** [13986-4]
- 13986 05 **A cascaded FBG configuration for dual-point high-temperature measurement** [13986-6]
- 13986 06 **Enhanced fundamental mode stability of VCSEL** [13986-7]
- 13986 07 **Self-compensating wide-range temperature sensing using intracavity cascaded FBGs in a fiber laser** [13986-8]
- 13986 08 **Research on dry etching process parameters for ITZO TFT** [13986-15]
- 13986 09 **Study on the impact of network training methods on the expressive capabilities of optical diffraction neural networks** [13986-16]
- 13986 0A **Regulation of multicolor quantum dot laser emission enabled by 2D metal nanostructures** [13986-17]
- 13986 0B **Demodulation and application of forward stimulated Brillouin scattering signal based on spectrum decoupling** [13986-18]
- 13986 0C **Ultracompact and efficient on-chip diffractive neural networks through physics-constrained dual-optimization** [13986-20]
- 13986 0D **Air layer integration enhances wearable radiative cooling: a synergistic mechanism of spectral-thermal management** [13986-23]
- 13986 0E **Research on the structural behavior of prefabricated steel structure utility tunnels based on high-performance distributed optical fiber sensing technology** [13986-25]
- 13986 0F **Fiber end-face microtip cascaded FPI with Zn@NPC: radon detection and wind speed impact** [13986-26]
- 13986 0G **Laser long-range large-size line spot homogenization based on microlens arrays** [13986-27]

- 13986 OH **2.05 $\mu$ m, all-polarization-maintaining actively mode-locked Ho-doped fiber laser with stable self-starting** [13986-30]
- 13986 OI **Ultra-high-precision fiber optic shaft-rate electric field current transformer for ships** [13986-32]
- 13986 OJ **A high-frequency and high-efficiency ZGP-OPO mid-infrared laser source for DIRCM techniques** [13986-34]
- 13986 OK **High-resolution light field 3D display technology based on optimized divergence angle** [13986-36]
- 13986 OL **Research on discrete noise suppression method for single-photon LiDAR based on voxel filtering and octree structure** [13986-39]
- 13986 OM **Hybrid Poisson model-based adaptive noise suppression for UAV image reconstruction in single-photon LiDAR** [13986-42]
- 13986 ON **A method of FBG demodulation based on polarization measurement technology** [13986-43]
- 13986 OO **Grayscale fabrication of apodized and chirped fiber Bragg gratings with femtosecond laser pulses** [13986-44]
- 13986 OP **Optical fiber cadmium ion detection technology based on MoS<sub>2</sub> modified SNMNS** [13986-47]
- 13986 OQ **A triboelectrically driven luminescent barcode system for self-powered optical identification** [13986-50]
- 13986 OR **A Cd<sup>2+</sup> detection technology based on MFC-IIP-modified SNMNS optical fiber** [13986-53]
- 13986 OS **Research on optimization of optical fiber power profile estimation algorithm based on polarization state weighting** [13986-54]
- 13986 OT **Nonlinear channel equalization based on "physical-data" dual-drive** [13986-55]
- 13986 OU **Research on rapid coal classification method based on ReliefF-SVM using LIBS** [13986-65]
- 13986 OV **A resonator-coupled multimode fiber spectrometer** [13986-66]
- 13986 OW **Semantic-communication-based two-photon fluorescence microscopy intelligent telemedicine platform** [13986-67]
- 13986 OX **Free-space optical reception and beam spot localization based on a grating coupler array and interferometer network** [13986-68]
- 13986 OY **Study on the electron emission characteristics of GaAs photocathodes with circular vacuum channel structures** [13986-71]

- 13986 0Z **Narrow-linewidth all-solid-state Nd:YVO<sub>4</sub> single-frequency laser with electro-optic frequency modulation based on PIN-PMN-PT crystal** [13986-72]
- 13986 10 **Dynamics of periodic pulsation and snakelike creep of pure-quartic solitons in ultrafast fiber lasers** [13986-77]
- 13986 11 **A novel method for frequency responses measurement of photodetectors based on wavelength-to-time mapping** [13986-79]
- 13986 12 **TEM-EDS studies on Si diffusion behavior in heteroepitaxial AlN polarity inversion structures on Si substrates** [13986-82]
- 13986 13 **Polarization beam splitter and mode demultiplexer based on dual-layer SiN-Si waveguides** [13986-88]
- 13986 14 **Tunable all-fiber supercontinuum light source for laser scanning imaging** [13986-91]
- 13986 15 **Hierarchical task offloading protection approaches in cloud-edge data-center elastic optical networks** [13986-92]
- 13986 16 **OAM-assisted rotational Doppler velocimetry at 1.5 $\mu$ m wavelength through atmospheric turbulence** [13986-93]
- 13986 17 **Rapid and multipoint FMCW based on widely-swept and narrow-linewidth silicon-integrated laser** [13986-94]
- 13986 18 **Rotational Doppler detection with Gaussian light mode emitter** [13986-95]
- 13986 19 **Multichannel distributed gas sensing in open-path environments using frequency-modulated continuous-wave interferometry** [13986-96]
- 13986 1A **Simulation of electron gain in tapered micropore microchannel plates with different tapered angles** [13986-97]
- 13986 1B **Quasi-distributed and high-sensitivity hydrogen sensing based on OFDR and fiber-tip FP microcavities** [13986-98]
- 13986 1C **Large-scale strain measurement for OFDR via permanent-scatterer-based distance repositioning** [13986-99]
- 13986 1D **Study on testing technology of EFP explosion field** [13986-102]
- 13986 1E **A phase correction technique for spatial light modulators based on Mach-Zehnder interferometry** [13986-103]
- 13986 1F **Design and implementation of an OTDR simulation teaching software for vocational education** [13986-105]

- 13986 1G **Liquid-level measurement based on phase-sensitive optical fiber distributed sensor**  
[13986-110]
- 13986 1H **Pointing prediction during the tracking process in free-space optical communication**  
[13986-111]
- 13986 1I **Simulation study on the transmission characteristics of Laguerre-Gaussian beams with different orders in smoke channels** [13986-113]
- 13986 1J **Chiral sensing with vector light fields in complex chiral media** [13986-114]
- 13986 1K **Theoretical and experimental analysis on spectral characteristics and environmental conditions for optimizing the transmission efficiency of fiber lasers** [13986-115]
- 13986 1L **Forward stimulated Brillouin scattering with tunable frequency-temperature sensitivity**  
[13986-117]
