

PROCEEDINGS OF SPIE

International Conference on Sustainable Technology and Management (ICSTM 2025)

Xilong Qu
Jack Wu Chun Ho
Bin Hu
Editors

16–17 August 2025
Zhuhai, China

Organized by
Zhuhai Research Institute, Hubei University (China)
Changsha Normal University (China)

Sponsored by
Guangdong University of Science and Technology (China)
City University of Macau (Macau, China)
Hong Kong Sustainable Society (China)
Little Yellow Flower Education Foundation (China)
Ocean Park Conservation Foundation Hong Kong (China)
The Hang Seng University of Hong Kong (China)

Published by
SPIE

Volume 13988

Proceedings of SPIE 0277-786X, V. 13988

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Sustainable Technology and Management (ICSTM 2025)*, edited by Xilong Qu, Jack Wu Chun Ho, Bin Hu, Proc. of SPIE 13988, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SUSTAINABLE ENERGY

- 13988 02 **Research on methods for improving the quality of distributed new energy power supply based on T-type three-level inverter** [13988-6]
- 13988 03 **Network integration of hydrogen infrastructure for domestic aviation in China: a multi-hub optimization framework** [13988-8]
- 13988 04 **Global hydrogen atlas: a high-resolution geospatial methodology for levelized cost optimization of hydrogen microgrids** [13988-9]
- 13988 05 **Research on energy efficiency optimization and intelligent control of automotive fuel cell system based on reinforcement learning algorithm** [13988-23]
- 13988 06 **Flexibility value assessment of the flexicell concept for the UK power system under coordinated control** [13988-26]
- 13988 07 **Research on the optimisation of green power trading in distributed systems based on reinforcement learning** [13988-32]
- 13988 08 **Research on implementation and the significance of design of integrated coordination system of source network, load and storage** [13988-33]
- 13988 09 **Multi-objective deep reinforcement learning scheduling model for optimization of electric hydrogen system operation** [13988-36]
- 13988 0A **Research on the feasibility and identification method of patent pool construction in the field of new energy vehicle charging** [13988-40]
- 13988 0B **Energy consumption prediction and control algorithm design for industrial decarbonization** [13988-49]
- 13988 0C **Research and implementation of energy storage safety prevention and control system** [13988-54]

SUSTAINABLE DEVELOPMENT

- 13988 0D **Empirically examining governance as a moderator: a comparative environmental degradation study of 23 countries** [13988-1]

- 13988 OE **Driving factors and implementation strategies for electronic enterprises in the Guangdong-Hong Kong-Macao Greater Bay Area to implement green supply chains under the dual carbon conditions** [13988-5]
- 13988 OF **A Python-based network model for supply chain carbon footprint analysis** [13988-13]
- 13988 OG **Advancements in remote sensing for water quality monitoring: introducing the multiscale convolutional network** [13988-14]
- 13988 OH **Comparison of the Bi-GRU and ARIMA models for sewage flow forecasting** [13988-22]
- 13988 OI **Leveraging AI and data analytics for sustainable education management in health and life sciences: a data-driven framework** [13988-29]
- 13988 OJ **Utilizing deep learning to enhance the bidding strategy of two-way carbon emission trading in a low-carbon economy** [13988-37]
- 13988 OK **Research on the application of green manufacturing processes in the machining of automobile parts under the background of carbon peaking and carbon neutrality** [13988-48]
- 13988 OL **Spatial and temporal variability of ocean carbon sinks: a new perspective on the application of big data** [13988-50]
- 13988 OM **Research on digital landscape design of green ecological gardens for smart cities** [13988-51]

GREEN MANUFACTURING

- 13988 ON **Design of packaging design data sharing platform in the Internet environment** [13988-24]
- 13988 OO **Application performance and carbon emission evaluation of low-carbon concrete materials in super-high-rise buildings** [13988-34]
- 13988 OP **Study on structural stability and ecological durability of high-performance composite facade materials for green buildings** [13988-35]
- 13988 OQ **Research on the application of green residential decoration design based on BIM under the background of big data** [13988-38]
- 13988 OR **Research on the comprehensive evaluation method of green ecological residential decoration design based on LEED evaluation system and BIM** [13988-39]
- 13988 OS **Research on green manufacturing scheduling optimization based on improved genetic algorithm** [13988-41]
- 13988 OT **The value and application of green manufacturing technology in electric motor production** [13988-42]

- 13988 0U **Building green material selection system based on big data** [13988-44]
- 13988 0V **Optimization of building green design based on BIM technology** [13988-45]
- 13988 0W **Research on energy-saving and emission-reduction technologies for new energy vehicles based on the concept of green manufacturing** [13988-47]
- 13988 0X **Research on intelligent control optimization mechanism and path of cooling source system for low-carbon operation** [13988-52]
- 13988 0Y **Design of inland river green intelligent transport fleet based on ship-electricity separation and rudder angle following strategy** [13988-57]
- 13988 0Z **Simulation-driven demand prediction for high-cost repairable life-limited parts in aviation** [13988-60]

GREEN CIRCULAR ECONOMY AND MANAGEMENT

- 13988 10 **Toward a circular economy workforce: rethinking labor flexibility in exponential organizations** [13988-3]
- 13988 11 **Risk prediction and control model of intelligent digital supply chain based on big data analysis** [13988-11]
- 13988 12 **Data fusion control technology of manufacturing industry in Dongguan under the background of digital** [13988-18]
- 13988 13 **Research on green circular economy model optimization and intelligent decision system based on big data analysis** [13988-20]
- 13988 14 **Research on the construction and optimization of intelligent evaluation model of green circular economy based on multisource data fusion** [13988-25]
- 13988 15 **Research on financing efficiency of new energy vehicle enterprises: taking BYD as an example** [13988-30]
- 13988 16 **An empirical study on the influence of enterprise green investment decision on financial efficiency under the guidance of ESG** [13988-43]
- 13988 17 **Research on the impact of AI internal controls on ESG evaluation and corporate accounting information quality: a perspective of sustainable development** [13988-55]
