

PROCEEDINGS OF SPIE

Ninth International Workshop on Advanced Patterning Solutions (IWAPS 2025)

Yayi Wei
Tianchun Ye
Editors

14–15 October 2025
Shenzhen, China

Organized by
Shenzhen Semiconductor and Integrated Circuit Industry Alliance (China)
Institute of Microelectronics of Chinese Academy of Sciences (China)

Sponsored by
China Integrated Circuit Innovation Alliance (China)
The Chinese Optical Society (China)
Institute of Microelectronics of Chinese Academy of Sciences (China)
Shenzhen Semiconductor and Integrated Circuit Industry Alliance (China)
Nanjing Chengxin Integrated Circuit Technology Research Institute Co., Ltd. (China)

SPIE

Volume 13991

Proceedings of SPIE 0277-786X, V. 13991

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ninth International Workshop on Advanced Patterning Solutions (IWAPS 2025)*, edited by Yayi Wei, Tianchun Ye, Proc. of SPIE 13991, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

NINTH INTERNATIONAL WORKSHOP ON ADVANCED PATTERNING SOLUTIONS (IWAPS 2025)

- 13991 02 **Smart RBAF: hierarchical main pattern definition for advanced-node lithography enhancement** [13991-1]
- 13991 03 **Full-field contour-based PWA enables precision depth-of-focus characterization at advanced-node** [13991-2]
- 13991 04 **Wavefront fitting of different obscuration shapes in anamorphic extreme ultraviolet lithography projection objective** [13991-3]
- 13991 05 **A feasible approach to understand acid diffusion in DUV resist using open frame exposure** [13991-4]
- 13991 06 **Negative-tone imaging (NTI) process and material technology for ArF immersion and EUV lithography** [13991-8]
- 13991 07 **A comprehensive intra-CD uniformity control through optimizing pattern loading effect correction by AI-trained model** [13991-9]
- 13991 08 **A composite model for LELE process** [13991-10]
- 13991 09 **A co-optimization flow to expanding PWQ through HSF and model-based loading effect for DRAM LELE metal layer** [13991-11]
- 13991 0A **Investigation of high-selectivity etching in zirconium-based MOR photoresists for nano-fabrication** [13991-12]
- 13991 0B **X-ray critical dimension metrology with optimal experimental design using the Fisher information** [13991-15]
- 13991 0C **Design of an anamorphic extreme ultraviolet lithography projection objective adopted high order XY polynomial freeform surfaces** [13991-16]
- 13991 0D **Printing towards the resolution limit of DUV immersion lithography** [13991-18]
- 13991 0E **High-fidelity curvilinear SRAF method adopting distance-versus-angle-signature** [13991-20]
- 13991 0F **A moving-average-filter-based dynamic decoupling control for wafer stage motion systems** [13991-21]

- 13991 OG **Parametric curvilinear OPC using B-splines data format** [13991-22]
- 13991 OH **An effective methodology to accelerate early stage of OPC development by use of TV eXpert and CPG** [13991-23]
- 13991 OI **Enhancing full-chip OPC consistency with hash-based encoding** [13991-25]
- 13991 OJ **D-CAF: data-driven CPU allocation framework for efficient OPC workloads** [13991-26]
- 13991 OK **3D resist profile simulation for compact modeling considering z-diffusion** [13991-28]
- 13991 OL **Molecular feature influence on ArF photoresist polymer dissolution behavior** [13991-29]
- 13991 OM **A low-memory-consumption lithography imaging model based on the Runge-Kutta Iterative Solution (RKIS) method** [13991-30]
- 13991 ON **Acid diffusion detection in chemically amplified photoresists** [13991-32]
- 13991 OO **Development of high-performance NTD developers via HSP-assisted HTE** [13991-33]
- 13991 OP **Application and advantage of RAFT polymerization in high-resolution lithography formulation** [13991-34]
- 13991 OQ **Thin film metrology techniques: x-ray diffraction and x-ray reflectivity** [13991-36]
- 13991 OR **Innovative topographic mark generation and process optimization for enhancing overlay mark signal in 3D structures** [13991-38]
- 13991 OS **Enhancing lithographic resolution for via and metal layers in advanced semiconductor manufacturing: NTD-based multipatterning strategies** [13991-42]
- 13991 OT **An open KLayout-Python-based framework for automated AIM overlay mark generation** [13991-44]
- 13991 OU **AI assisted etch models** [13991-45]
- 13991 OV **An effective mask optimization method using deep reinforcement learning** [13991-46]
- 13991 OW **Machine learning and artificial intelligence in semiconductor metrology and inspection for smart manufacturing** [13991-47]
- 13991 OX **Etch-rate-tunable ArF immersion BARC to improve advanced lithography technology** [13991-48]
- 13991 OY **Fraunhofer diffraction by rectangular patterns on mask: a generic diffraction formula for modeling perspective** [13991-52]

- 13991 0Z **Enhancing ILT modeling efficiency: symmetry-averaged gauge processing and kernel DDM for RMS and runtime optimization** [13991-53]
- 13991 10 **AIMS® AutoAnalysis: a catalyst for improved mask yield in high volume manufacturing** [13991-59]
- 13991 11 **Large-scale VLSI mask optimization: a survey** [13991-61]
- 13991 12 **Fast simulation of directed self-assembly for contact hole multiplication with an optimized compact model** [13991-64]
- 13991 13 **Phase-space-driven ILT with swin transformers: a generative AI framework for sub-wavelength mask optimization** [13991-65]
- 13991 14 **SVD-based layout representation for lithographic hotspot detection** [13991-66]
- 13991 15 **Study of SMO for high-NA EUV lithography via Sub-3nm nodes** [13991-67]
- 13991 16 **A swing curve fitting algorithm based on physics-informed neural networks** [13991-69]
- 13991 17 **Synalib: A fast OCD engine with parametric process flow modeling for high-throughput semiconductor metrology** [13991-73]
- 13991 18 **A process-parameter-driven cross-attention convolutional autoencoder for high-precision critical dimension prediction** [13991-74]
- 13991 19 **Coating defect localization via patch-guided generative adversarial networks** [13991-76]
- 13991 1A **High-speed versatile pattern generator for high-resolution electron-beam lithography** [13991-79]
- 13991 1B **From metrology to control: a comprehensive overlay solution for IC manufacturing and packaging challenges** [13991-80]
- 13991 1C **Measurement methods for curvilinear patterns and application in lithography process development for silicon photonics** [13991-82]
- 13991 1D **Real-time Shack-Hartmann wavefront processor with FPGA acceleration** [13991-83]
