

PROCEEDINGS OF SPIE

# ***Fifth International Conference on Optics and Communication Technology (ICOCT 2025)***

**Junhe Zhou  
Yang Zhao**  
*Editors*

**19–21 September 2025  
Huai'an, China**

*Organized by*  
Jiangsu Instrument and Control Society (China)  
Weihai Key Laboratory of Photoacoustic Testing and Sensing Technology (China)  
Nanjing University of Posts and Telecommunications (China)

*Published by*  
SPIE

**Volume 13995**

Proceedings of SPIE 0277-786X, V. 13995

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Optics and Communication Technology (ICOCT 2025)*, edited by Junhe Zhou, Yang Zhao, Proc. of SPIE 13995, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICAL AND COMMUNICATION TECHNOLOGIES

---

- 13995 02 **Chaos induced by optical cavity loss in optomechanical system** [13995-2]
- 13995 03 **Analysis and simulation study on ground target localization accuracy based on multipoint ranging** [13995-16]
- 13995 04 **Liquid crystal bifocal metalens based on a sectorized structure** [13995-43]
- 13995 05 **The design of a hexagonal metasurface absorber** [13995-12]
- 13995 06 **Dual-channel holography based on deep learning for metasurface** [13995-1]
- 13995 07 **Strain-regulated light polarization in AlGaIn quantum well** [13995-10]
- 13995 08 **Effect of sputtering pressure on structural and optical properties of Cu<sub>2</sub>Se thin films** [13995-38]
- 13995 09 **Microfluidic chip integrated surface plasmon resonance for optical biosensing** [13995-3]
- 13995 0A **A multilevel error suppression and ambiguity enhancement for GNSS-RTK positioning** [13995-33]
- 13995 0B **Static weight AMF pooling architecture: a low-cost solution for mitigating IoT traffic bursts and reducing latency in 5G core networks** [13995-6]
- 13995 0C **Heterodyne detection of flexural acoustic waves in an anti-resonant hollow-core fiber-based acousto-optic mode converter** [13995-23]
- 13995 0D **Optimize the Si<sub>3</sub>N<sub>4</sub> passivation film of GaAs photoconductive semiconductor switch** [13995-4]
- 13995 0E **Feature enhancement method based on attention mechanism and discrete wavelet transform for Gaofen-2 imagery scene classification** [13995-41]
- 13995 0F **Research and simulation analysis of deep space optical communication** [13995-29]
- 13995 0G **Inverse design and band gap prediction of photonic crystal point defect microcavities based on deep learning** [13995-5]

- 13995 OH **Research on detection algorithm of magnetic metal-organic framework based on surface-enhanced Raman spectroscopy** [13995-19]
- 13995 OI **Monolithic integration of magneto-optical thin films on silicon via localized laser annealing** [13995-36]
- 13995 OJ **Selection method for valid segments in monopulse radar angle measurement under active jamming** [13995-17]
- 13995 OK **Fabrication of large-area deflective holographic diffusion films based on optoelectronic micro-nano processing** [13995-20]
- 13995 OL **Research on the spectral model of light saturation point of *Liriodendron chinense*** [13995-18]
- 13995 OM **DOA estimation based on deep residual network** [13995-7]
- 13995 ON **Design and implementation of a drip speed and liquid level control system based on STM32** [13995-34]
- 13995 OO **Research on efficient compression method of multisource heterogeneous data based on deep sea** [13995-28]
- 13995 OP **Attraction-repulsion transition of Casimir force in one-dimensional dissipative cavity based on reflectivity regulation** [13995-39]
- 13995 OQ **Generation of rectangular and sawtooth waveforms with ultra-wideband using sampled fiber grating and femtosecond laser** [13995-8]
- 13995 OR **Compensation of laser source frequency drift in  $\Phi$ -OTDR system using dual-pulse detection and EEMD** [13995-13]
- 13995 OS **A vanadium dioxide-based bifunctional metasurface for infrared polarization manipulation** [13995-35]
