PROCEEDINGS OF SPIE

Third International Conference on Optical Communication and Optical Information Processing (OCOIP 2025)

Weiqing Gao
Yang Yue
You Wang
Editors

1–3 August 2025
Hefei, China

Organized by
School of Physics, Hefei University of Technology (China)

Published by
SPIE

Volume 13998

Proceedings of SPIE 0277-786X, V. 13998

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Third International Conference on Optical Communication and Optical Information Processing (OCOIP 2025)*, edited by Weiqing Gao, Yang Yue, You Wang, Proc. of SPIE 13998, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

THIRD INTERNATIONAL CONFERENCE ON OPTICAL COMMUNICATION AND OPTICAL INFORMATION PROCESSING (OCOIP 2025)

13998 02 **Multiplexing method of multiple Bessel Gaussian beams in turbulence** [13998-15]

13998 03 **All-fiber transmission of 1kW continuous-wave lasing in the anti-resonant hollow-core fibers with small mode field diameter of 14 μm** [13998-14]

13998 04 **Design of high-speed reconfigurable multitriggered optical chaotic D-latches and D-flip-flops under clock synchronization based on chaotic laser dynamics** [13998-25]

13998 05 **Hardness recognition of fiber Bragg grating tactile sensors based on neural networks** [13998-29]

13998 06 **Quantitative measurement of low-frequency vibrations based on phase-sensitive optical time-domain reflectometry** [13998-1]

13998 07 **Miniaturized dual-fiber microbubble spectrometer** [13998-7]

13998 08 **Research on terahertz graphene metamaterial devices based on plasmon-induced transparency** [13998-17]

13998 09 **Design of a laser Doppler probe based on multicore fiber and GRIN lens** [13998-6]

13998 0A **Dynamic response analysis of EIT effect based on Rydberg atoms** [13998-10]

13998 0B **Temperature immune two-mode Mach-Zehnder interferometer based on ring core fibre for liquid refractive index sensing** [13998-3]

13998 0C **Modeling and simulation for synchronous single-photon lidar with dead time effects compensation based on parameter estimation** [13998-12]

13998 0D **Design of an intelligent spaceborne remote sensing system for fire spot monitoring** [13998-27]

13998 0E **Intelligent image processing for laser glare interference** [13998-30]

13998 0F **The design and analysis of the endoscopic hyperspectral imaging system with acousto-optic tunable filter** [13998-13]

13998 0G **Non-contact film thickness measurement based on time-domain optical coherence tomography** [13998-5]

13998 0H **Double trident layer spot-size converter with ridge waveguide for thin-film lithium niobate waveguide devices** [13998-23]

13998 0I **Analysis of influencing factors on Dirac-cone band structures in dual-band valley topological photonic crystals** [13998-11]

13998 0J **High-speed x-ray communication system using ultrafast laser-modulated x-ray source and scintillator detector** [13998-20]

13998 0K **All-fiber broadband orthogonally polarized time-energy entangled photon source** [13998-4]

13998 0L **An optimized clock synchronization for PTP-unaware network** [13998-9]

13998 0M **Quantum interference of correlated photons generated by cascaded second-order nonlinearity** [13998-2]

13998 0N **Secure and efficient UAV-assisted vehicle authentication scheme based on quantum key** [13998-19]

13998 0O **Full-spectrum NFDM system based on four-dimensional modulation** [13998-26]

13998 0P **Addressable FSO system using a 2-D broadband optical receiver based on a microlens fiber array and self-developed multichannel photodetector array modules** [13998-22]
