

PROCEEDINGS OF SPIE

***International Conference on
Electronics, Electrical, and
Information Engineering
(ICEEIE 2025)***

Xilong Qu
Jianqi Li
Bin Hu
Editors

19–21 September 2025
Changsha, China

Organized by
Changsha Normal University (China)
Hunan University of Arts and Science (China)
Hunan University of Technology (China)
Hunan Institute of Information Technology (China)

SPIE

Volume 14003
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14003

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Electronics, Electrical, and Information Engineering (ICEEIE 2025)*, edited by Xilong Qu, Jianqi Li, Bin Hu, Proc. of SPIE 14003, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

Part One

COMMUNICATION ENGINEERING

- 14003 02 **Optimal design of optoelectronic combination of optical communication system combined with artificial neural network** [14003-2]
- 14003 03 **Intelligent manufacturing human-computer collaboration system based on brain-computer interface (BCI)** [14003-109]
- 14003 04 **Research on UAV wireless optical communication links** [14003-65]
- 14003 05 **Design of indoor robot positioning and tracking system based on multi-sensor fusion** [14003-119]
- 14003 06 **Internal defect identification of epoxy potting materials based on multimodal data fusion** [14003-99]
- 14003 07 **Advances in pest monitoring research based on acoustic technology** [14003-130]
- 14003 08 **Application of Beidou satellite positioning and multi-sensor fusion in UAV power inspection** [14003-132]
- 14003 09 **Performance evaluation of 5G cellular network positioning: analysis of non-ideal characteristics and error sources** [14003-9]
- 14003 0A **Research on perception and mapping technology based on millimeter-wave signals** [14003-10]
- 14003 0B **Research and simulation analysis of vulnerability perception of intelligent reflective surfaces** [14003-11]
- 14003 0C **Research on temperature sensing alarm system based on non-contact electric field coupling energy harvesting** [14003-28]
- 14003 0D **Research on the security of converged communication system in the field of power transformation and distribution based on SM2 national secret transmission algorithm** [14003-133]
- 14003 0E **Research on a call security attack detection technology based on deep learning** [14003-80]

- 14003 OF **Attention-enhanced deep learning algorithm for call platform traffic prediction** [14003-81]
- 14003 OG **A multi-jammer cooperative jamming effectiveness evaluation methodology for networked radar systems** [14003-103]
- 14003 OH **Alarm management and analysis application for power grid automation systems based on cloud-edge integration** [14003-61]
- 14003 OI **Intelligent warehouse system design and implementation** [14003-64]
- 14003 OJ **Echo cancellation algorithms for tele-communication system** [14003-8]
- 14003 OK **Exploration of efficient video compression paths based on substation video surveillance systems** [14003-139]
- 14003 OL **Design of integrated testing platform for ship platform monitoring system based on scene driven** [14003-73]
- 14003 OM **An approach to traffic perturbation operation generation based on packet feature inversion** [14003-158]
- 14003 ON **Fault prediction technology of data center based on voiceprint recognition** [14003-163]

ELECTRICAL ENGINEERING

- 14003 OO **Characterization and inference of power transformer operation status based on causal events** [14003-71]
- 14003 OP **Design and circuit implementation of a CMOS process ultra-wideband low-noise amplifiers** [14003-51]
- 14003 OQ **Research on the evaluation method of abnormal discharge energy level of switchgear based on chromaticity features** [14003-121]
- 14003 OR **High-resolution inversion method of electric field distribution based on EL effect** [14003-58]
- 14003 OS **Optical signal characteristics analysis of gas insulated partial discharge** [14003-104]
- 14003 OT **Improved methods for foreign object detection in transmission lines based on YOLOv5 algorithm** [14003-62]
- 14003 OU **Hidden fault detection of digital relay protection device based on integrated decision tree** [14003-108]
- 14003 OV **Research on key technologies for operation monitoring of power grid-oriented dispatching and control systems** [14003-135]

- 14003 0W **Rule-based representation and knowledge fusion model for power grid operation**
[14003-20]
- 14003 0X **Performance analysis and application of domestic PLCs in electrical automation control systems** [14003-36]
- 14003 0Y **Simulation analysis of photovoltaic power generation system based on MATLAB/Simulink model** [14003-100]
- 14003 0Z **Research on the application of fuzzy logic control in robot vision feedback system**
[14003-122]
- 14003 10 **Design of music playing circuit based on Verilog HDL** [14003-89]
- 14003 11 **Investigation of frequency coupling suppression and control method of doubly-fed wind power system under weak grid condition** [14003-52]
- 14003 12 **Analysis of dynamic reactive power compensation device to enhance transient voltage safety in renewable energy systems** [14003-53]
- 14003 13 **Research on detection and diagnosis of switchgear handcart contact engagement status based on multimodal perception** [14003-27]
- 14003 14 **Data fusion and analysis model for multi-dimensional state assessment of lines for smart grids** [14003-161]
- 14003 15 **Enhanced detection transformer for object detection in complex substation environments**
[14003-98]
- 14003 16 **Adaptive learning mechanism of multi-agent deep reinforcement learning for intelligent O&M in substations** [14003-144]
- 14003 17 **Design and implementation of visual servo system for mobile robots in virtual reality environment** [14003-123]
- 14003 18 **Research on the application of deep learning combined with computer vision technology in abnormal behavior recognition in building intelligent security monitoring** [14003-118]
- 14003 19 **Interpretation and test results analysis of DC charging pile control and guidance circuit standard for electric vehicles** [14003-95]
- 14003 1A **Finite element analysis of a follow-up transformer based on ANSYS** [14003-76]
- 14003 1B **Stator-less core axial flux permanent magnet synchronous motor permanent magnet structure optimization** [14003-85]
- 14003 1C **Optimization design of electromagnetic characteristics of brushless DC hollow cup motor based on ANSYS** [14003-83]
- 14003 1D **Power regulation and power quality optimization of distributed photovoltaic power generation based on edge computing** [14003-159]

- 14003 1E **Maintenance and overhaul of traction converter of power centralized multiple unit**
[14003-41]
- 14003 1F **Modeling and simulation of directional constant voltage output in dual transmitters MCR-WPT system** [14003-47]
- 14003 1G **Simulation study on the stability of PID control system with different stiffness** [14003-43]
- 14003 1H **A knowledge representation learning based inference method for aircraft fault causes**
[14003-147]
- 14003 1I **Calculation of ground backup requirements for aero-engine based on statistical analysis**
[14003-148]
- 14003 1J **Application of transformer abnormal fault prediction and diagnosis system based on deep learning algorithm** [14003-102]
- 14003 1K **Design of power load abnormal fault prediction and diagnosis system based on deep learning algorithm** [14003-105]
- 14003 1L **Optimization design of data center cooling system combining evaporative condensation technology and fluorine pump** [14003-164]
- 14003 1M **Research on optimization and application of intelligent manufacturing system based on robots** [14003-141]
- 14003 1N **Establishment of information services for online transportation platforms based on user experience mapping in the context of digital intelligence** [14003-154]
- 14003 1O **Airworthiness trajectory tracking control for nonlinear UAV** [14003-77]
- 14003 1P **Distributed machine learning algorithm optimization in edge computing environment**
[14003-156]
- 14003 1Q **Fault analysis method for power equipment based on multimodal large model** [14003-32]

Part Two

- 14003 1R **Non-contact broadband RF partial discharge detection and localization technology**
[14003-21]
- 14003 1S **Research on panoramic dynamic topology computing technology for large-scale distribution networks based on real-time state perception** [14003-19]

ELECTRONICS

- 14003 1T **Real-time quality inspection system for agricultural products integrating PLC and machine vision** [14003-142]

- 14003 1U **Design and optimization of an agricultural sorting system based on PLC and machine vision** [14003-140]
- 14003 1V **Research and application of multi-robot obstacle avoidance and navigation based on deep environmental understanding and behavior imitation** [14003-114]
- 14003 1W **Drone motor twisted wire cutting wire finning equipment innovative design** [14003-127]
- 14003 1X **Navigation control strategy for autonomous mobile robots based on neural networks and imitation learning** [14003-117]
- 14003 1Y **Intelligent and efficient solar street lamp design based on Sklearn linear regression algorithm for crowd flow prediction and time-sharing control** [14003-3]
- 14003 1Z **Analysis and research on filtering stability of closed-loop feedback system of DC converter for portable electronic equipment** [14003-59]
- 14003 20 **Design of self balancing car control system** [14003-96]
- 14003 21 **Research on power system relay protection based on improved non-dominated sorting genetic algorithm** [14003-106]
- 14003 22 **Enhancing the weighted round-robin scheduling algorithm in Huawei network devices** [14003-125]
- 14003 23 **Natural contamination determination method of power system external insulation based on dynamic conductivity and the Avrami model** [14003-91]
- 14003 24 **Design and implementation of holding torque test system for SADA** [14003-33]
- 14003 25 **Research on intelligent tracking and automatic return to the nest technology of power inspection drones** [14003-131]
- 14003 26 **Design of full-coverage path planning and obstacle avoidance algorithm for autonomous cleaning vehicles** [14003-12]
- 14003 27 **Design and research of an interlocking buckle cable joint** [14003-6]
- 14003 28 **Design of a wire bonding machine control system based on bus-type controller** [14003-82]
- 14003 29 **Design of CNC adjustable switching power supply** [14003-97]
- 14003 2A **Rational design of layered oxide cathodes for sodium-ion batteries guided by first-principles calculations** [14003-55]
- 14003 2B **Design of a CMOS-integrated broadband low-distortion mixer** [14003-136]

- 14003 2C **Battery health status prediction based on LSTM and LightGBM models** [14003-86]
- 14003 2D **Environmental perception system for unmanned surface vessel based on multi-source information fusion** [14003-63]
- 14003 2E **Research on control system of material defective sorting station based on PLC** [14003-44]

IMAGE PROCESSING

- 14003 2F **Research on watermark embedding algorithm based on depth-separable convolution and channel attention** [14003-74]
- 14003 2G **Research on deep fragile watermarking algorithm for medical images** [14003-72]
- 14003 2H **Research on game object segmentation method based on SAM** [14003-75]
- 14003 2I **Research on automatic insulator effective area extraction model based on U-Net neural network** [14003-93]
- 14003 2J **Data enhancement method based on generative adversarial network algorithm in image generation** [14003-49]
- 14003 2K **Image content analysis and personalized recommendation algorithm for packaging design of Guangdong agricultural cultural and creative products** [14003-128]
- 14003 2L **Analysis of the action mechanism of digital technology development on visual communication design effectiveness** [14003-145]
- 14003 2M **Research on the application of digital image processing in the integration of landscape imagery and cultural and creative design** [14003-129]
- 14003 2N **Research on style classification of Guangdong agricultural cultural and creative products based on SVM and image feature extraction** [14003-110]
- 14003 2O **Reduce material loss by optimizing FDM 3D printing support parameters** [14003-40]
- 14003 2P **Research on accurate visual communication algorithm for dim and small target images in virtual reality scenes** [14003-126]
- 14003 2Q **Optimization study of deep learning algorithms in image recognition based on the flipped classroom approach** [14003-150]
- 14003 2R **Application of deep neural networks in cultural heritage image recognition** [14003-151]
- 14003 2S **A zero-shot visual perception method for water targets** [14003-67]

- 14003 2T **Application of image data mining technology in predicting consumer purchase behavior** [14003-138]
- 14003 2U **Design optimization of intelligent visual communication by integrating deep learning algorithm and user behavior model** [14003-152]

INFORMATION ENGINEERING

- 14003 2V **Application and optimization of Internet of Things technology in rural logistics distribution network** [14003-107]
- 14003 2W **Research on intelligent response technology to customer demands based on user portraits** [14003-79]
- 14003 2X **Construction of network security knowledge graph in colleges and universities for unstructured data** [14003-1]
- 14003 2Y **Intelligent method of analyzing electric big data for improving commercial environment** [14003-16]
- 14003 2Z **Prediction method of electricity consumption with time segmented considering the influence of typical user characteristics** [14003-17]
- 14003 30 **Research on core algorithms for deep learning-based high-risk AI early warning and prediction technology in power fields** [14003-112]
- 14003 31 **Research on IoT-based AI early warning and pre-judgment technology for high-risk power field** [14003-113]
- 14003 32 **Real-time multi-modal monitoring and anomaly detection in green electricity markets using visual intelligence** [14003-7]
- 14003 33 **Research and application of key intelligent monitoring technologies supporting the digitalization of centralized control operations** [14003-134]
- 14003 34 **Dynamic optimization of transmission network resources based on SDN/NFV** [14003-160]
- 14003 35 **Prediction method of electricity load curve considering industry segmentation characteristics** [14003-18]
- 14003 36 **LLM-based CNL rule generation and disaster-chain assembly for fire hazards** [14003-69]
- 14003 37 **A user preference prediction model based on multimodal data fusion for Xiaohongshu information matching** [14003-92]
- 14003 38 **Detection and optimization of short video information splitting using graph neural networks** [14003-94]

- 14003 39 **Strategies of lightweight and optimization for multi task visual models based on RISC-V architecture** [14003-153]
- 14003 3A **Big data-driven design and analysis of lighting systems in premium office settings** [14003-146]
- 14003 3B **Automatic GIM data audit based on large language models** [14003-68]
- 14003 3C **Exploring intelligent identification and sorting lines for used and waste mobile phones** [14003-162]
- 14003 3D **Design of terminal unified identity authentication service model** [14003-149]
- 14003 3E **A fast solution method for complex algorithms in high order tensor networks** [14003-14]
- 14003 3F **Construction of a data management platform for urban secondary water supply systems based on cloud computing** [14003-157]
- 14003 3G **Monitoring and management of prefabricated building construction process based on BIM and Internet of Things** [14003-155]
- 14003 3H **Design and implementation of digital twin components for power supply service command resource collaboration** [14003-15]
