SPIE

Volume 14005

Proceedings of SPIE 0277-786X, V. 14005

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Image Processing, Object Detection, and Tracking (IPODT 2025)*, edited by Yang Zhao, Bao Feng, Lingxia Liao, Proc. of SPIE 14005, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OBJECT DETECTION ALGORITHMS

- 14005 02 **Improved YOLOv8n obstacle detection algorithm for blind areas** [14005-16]
- 14005 03 **MSCA-ASOD multiscale context-aware network with adaptive similarity optimization for tiny object detection** [14005-73]
- 14005 04 **RM-YOLO: a dense crowd detection algorithm** [14005-38]
- 14005 05 **Lightweight YOLO with attention for PCB component detection** [14005-18]
- 14005 06 **UAVSOD-YOLOv8: dense small target detection model for UAV aerial images** [14005-75]
- 14005 07 **Feasibility analysis of planar decoy targets** [14005-12]
- 14005 08 **Optimization of YOLOv8: Light-YOLOv8n model with structural redesign and channel attention integration** [14005-26]
- 14005 09 **An enhanced YOLOv8-based approach for accurate insulator defect detection in power inspection** [14005-69]
- 14005 0A **Research on YOLOv7 multiscale detection optimization and early warning algorithm for complex scenes** [14005-92]
- 14005 0B **YOLO-Mix: real-time tobacco detection with efficientViT and residual attention** [14005-39]
- 14005 0C **Research on target detection of grazing sheep in complex pastoral environments based on improved lightweight BiCA-RA-YOLOv8 model with multidimensional cameras** [14005-84]
- 14005 0D **Research on improved YOLOv8 for steel surface defect detection** [14005-10]
- 14005 0E **A geological key target detection algorithm in complex multisource satellite images** [14005-32]
- 14005 0F **YOLOv8-CSW: a concrete crack detection method** [14005-30]
- 14005 0G **Deep learning-enabled forest fire detection: Yolov8 optimization via multiscale feature alignment and false alarm suppression** [14005-88]

- 14005 OH **Research on road crack detection based on PDD-YOLO** [14005-43]
- 14005 OI **Mist-Aware YOLO: an aircraft skin damage detection method for rain-fog conditions** [14005-80]
- 14005 OJ **GU-HRNet: a lightweight multiperson pose estimation network for mobile terminals** [14005-25]
- 14005 OK **Research on real-time blind-spot worker detection for hoisting operation safety** [14005-40]
- 14005 OL **Research on fuzz fabric damage detection method based on point cloud data** [14005-36]
- 14005 OM **Research on infrared small/weak target detection algorithm based on deep learning** [14005-58]
- 14005 ON **Bridge crack detection method based on UAV imaging and CNNs** [14005-90]

IMAGE PROCESSING TECHNIQUES

- 14005 OO **Matrix applications in graphics processing, data analysis, and scientific computing** [14005-14]
- 14005 OP **Dual-branch encoding with deformable decoding for abdominal medical image segmentation** [14005-62]
- 14005 OQ **MSSMU-Net: multiscale supervised Mamba-UNet for image tampering detection** [14005-60]
- 14005 OR **A preliminary study on wavelet-augmented diffusion posterior sampling for sparse-view CT reconstruction** [14005-28]
- 14005 OS **Multiscale edge fusion-based geodesic adaptive active contour model for pituitary tumor segmentation** [14005-11]
- 14005 OT **Image dehazing based on depth fusion and agent attention mechanism** [14005-9]
- 14005 OU **Enhancing noisy label learning with local consistency regularization** [14005-33]
- 14005 OV **A survey on image restoration methods based on denoising diffusion probabilistic models series models** [14005-53]
- 14005 OW **Medical image segmentation using attention-gated residual U-Net architecture** [14005-6]
- 14005 OX **A precise document image rectification method based on lightglue and affine transformation** [14005-22]
- 14005 OY **Morphology analysis of removed stem sliver based on image method and optimization of cut tobacco recycling process** [14005-67]

- 14005 0Z **Research on deep learning segmentation methods for MRI brain tumor image** [14005-37]
- 14005 10 **A multimodal image fusion method based on low rank tensor regularization** [14005-45]
- 14005 11 **Image denoising algorithm based on the combination of BEMD and Wiener filtering**
[14005-54]
- 14005 12 **Vision-based deformation and cracking analysis of cement stone** [14005-63]
- 14005 13 **Image segmentation algorithm based on improved TransFuse** [14005-64]
- 14005 14 **Deep learning-based recognition of young bud leaves in Liubao tea** [14005-74]
- 14005 15 **KAN neural network-based visual assessment of milled surface texture without physical contact** [14005-56]

TRACKING AND MONITORING SYSTEMS

- 14005 16 **A study on the application of multivehicle object detection methods based on DL in intelligent transportation** [14005-19]
- 14005 17 **Industrialization application research of autonomous UAV in centralized monitoring and patrol inspection of oilfield** [14005-31]
- 14005 18 **Visual and cognitive after effects of virtual reality of first-person view drone** [14005-3]
- 14005 19 **A dynamic search Siamese network for infrared target tracking** [14005-23]
- 14005 1A **Real-time UAV photogrammetry for deformation monitoring in deep foundation pits**
[14005-86]
- 14005 1B **Research on the reliability of multitarget collaborative operation system for unmanned road inspection vehicles** [14005-79]
- 14005 1C **Exploration of monitoring methods for new construction disturbance points using drone aerial imagery** [14005-55]
- 14005 1D **Industrial human-machine collaborative monitoring system integrating the Internet of Things and artificial intelligence** [14005-81]
- 14005 1E **Design and implementation of intelligent analysis system for visual inspection of oil and gas pipeline based on Internet of Things** [14005-70]
- 14005 1F **Research and design of industrial automatic inspection UAV based on improved target detection algorithm** [14005-83]

- 14005 1G **A comparative study of multi-moving target tracking algorithms in complex scenarios**
[14005-51]
- 14005 1H **End-to-end elderly fall detection with shallow multiscale feature fusion and regression
contrastive decoupling** [14005-57]
- 14005 1I **Enhancing robustness in classroom behavior detection based on an improved YOLO11
algorithm** [14005-41]
- 14005 1J **Research on the positioning method of self-locking extension ladder for steel pipe tower
based on image recognition** [14005-52]
- 14005 1K **Research on optical systems based on artificial intelligence and cloud computing**
[14005-44]
- 14005 1L **Floc detection and tracking based on improved YOLOv11n and DeepSORT** [14005-15]
- 14005 1M **A tracking and analyzing system for animal behavioral experiments based on YOLOv11**
[14005-35]
- 14005 1N **InspectAR: a cloud-driven system for real-time object detection and interactive inspection
on AR glasses** [14005-7]
- 14005 1O **A fast tracking and detection algorithm for multitarget in satellite images** [14005-91]
