

PROCEEDINGS OF SPIE

***International Conference on
Optical Engineering, Sensing,
and Instruments (OESI 2025)***

Weiyong Yu
Keyu Xia
Editors

18–20 August 2025
Changsha, China

Organized by
Hunan Association for Robots and Artificial Intelligence (China)

Published by
SPIE

Volume 14007

Proceedings of SPIE 0277-786X, V. 14007

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optical Engineering, Sensing, and Instruments (OESI 2025)*, edited by Weiyong Yu, Keyu Xia, Proc. of SPIE 14007, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

INSTRUMENTS

- 14007 02 **1550nm high-speed distributed feedback laser on a high-thermal-conductivity SiC substrate** [14007-27]
- 14007 03 **Research on cavity temperature simulation and system design based on cavity ring-down spectroscopy** [14007-25]
- 14007 04 **Preparation of external stress and strain sensors for boiler heating surface tubes in power plants** [14007-11]
- 14007 05 **Miniaturized Michelson interferometric fiber optic accelerometer with high-sensitivity for low-frequency vibration detection** [14007-6]
- 14007 06 **Study on the effects of total ionizing dose and neutron irradiation on the performance of semiconductor lasers** [14007-15]
- 14007 07 **Reliability of GaN BUCK drivers for optical loads: R_{on} /ESR degradation monitoring based on waveform inversion** [14007-31]
- 14007 08 **Total ionizing dose effect and displacement damage of visible light CCD devices** [14007-32]
- 14007 09 **Research on multicomponent detection technology of CO and CO₂ by cavity ring-down spectroscopy** [14007-3]

OPTICAL ENGINEERING

- 14007 0A **Design method for spaceborne dual-band common-aperture catadioptric optical system** [14007-17]
- 14007 0B **Simulation and correction of lateral color and dispersion effects on image-based overlay** [14007-30]
- 14007 0C **Research on the installation and alignment technology of off-axis reflective parallel light tubes** [14007-14]
- 14007 0D **Optical applications, fluctuation analysis and solutions in tool presettlers** [14007-26]
- 14007 0E **Spectral performance optimization in Gd-based BEUV sources via cavity-confined targets: parametric study on cavity geometry** [14007-19]

14007 OF **Design method of ultra-wide-angle car fisheye lens based on distortion theory** [14007-13]

SENSING

- 14007 OG **Radiometric calibration of liquid crystal tunable filter-based hyperspectral camera** [14007-21]
- 14007 OH **The remaining life method of liquid particle counting sensors based on the two-stage Wiener degradation process** [14007-8]
- 14007 OI **Research on temperature drift compensation correction algorithm for VOx uncooled infrared detector** [14007-16]
- 14007 OJ **Continual learning-based open-set ISAR vehicle target recognition** [14007-2]
- 14007 OK **Multipolar analysis of the second harmonic scattering of metallic nanoparticles with ligand exchange** [14007-29]
- 14007 OL **A preliminary study of a novel turntable-free alignment system based on continuous zoom and dual-mode measurement** [14007-20]
- 14007 OM **Automobile parts assembly based on 3D structured light camera: hand-eye calibration and precise feature extraction of point clouds** [14007-4]
- 14007 ON **Target type and laser strike point identification method based on YOLO** [14007-12]
- 14007 OO **LS2F: a low-light infrared and visible image fusion method based on superpixel synergy** [14007-10]
- 14007 OP **A low-cost autofocus method based on an astigmatic light source** [14007-18]
- 14007 OQ **Application of flexible strain sensors to large strain measurement in solid rocket motor grain under variable temperature conditions** [14007-28]
