SPIE

**Volume 14014**

Proceedings of SPIE 0277-786X, V. 14014

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Materials for Optics and Photonics: Chemistry and Engineering Perspectives (AMOP 2025)*, edited by Sherzod Korabayev, Eduard I. Zenkevich, Ibrahim Avgin, Nosirjon Sharibaev, Proc. of SPIE 14014, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510699847

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## **ADVANCED MATERIALS FOR OPTICS AND PHOTONICS: CHEMISTRY AND ENGINEERING PERSPECTIVES (AMOP 2025)**

---

- 14014 02 **Technology of growing and researching synthetic piezoelectric quartz** [14014-2]
- 14014 03 **Adaptive video compression and transmission algorithms for smart surveillance in IOT networks** [14014-3]
- 14014 04 **Synthesis and study of the dynamic distribution of KPbBr<sub>3</sub> nanocrystals** [14014-4]
- 14014 05 **Thiol-modified CdS quantum dots: synthesis and photocatalytic properties** [14014-6]
- 14014 06 **The effect of heavy metals in water on the optical properties of silk** [14014-9]
- 14014 07 **Fast preparation of optical sensor for sulfur dioxide detection using the sol-gel route** [14014-11]
- 14014 08 **Synthesis and spectral analysis of heteroleptic Co(II) complex** [14014-12]
- 14014 09 **Models of entropy encoding of television images in video information systems** [14014-13]
- 14014 0A **AI-based models for geometric modeling of kidney function over optical networks** [14014-14]
- 14014 0B **Combine method and algorithms of object detection in video transmission over optical network** [14014-15]
- 14014 0C **Quantum chemical study of the photocatalytic activity Fe<sub>3</sub>O<sub>4</sub>/SiO<sub>2</sub>-trimesic acid-melamine supramolecular system** [14014-16]
- 14014 0D **Elemental composition, spectral characteristics, and quantum chemical insights into SRTiO<sub>3</sub> perovskite** [14014-17]
- 14014 0E **Study of photocatalytic activity of ZnO synthesised by various methods** [14014-18]
- 14014 0F **Synthesis of complexes from metal cations and 1,3,5-tris-(beta oxoethyl) hexahydrox-s-triazine and evaluation of their photocatalytic properties** [14014-19]
- 14014 0G **Quantum chemical investigation of the photocatalytic activity of TiO<sub>2</sub> nanoclusters with different structures** [14014-20]

- 14014 OH **Quantum chemical study of the photocatalytically active Mo-quercein complex** [14014-21]
- 14014 OI **Improving the performance of neural network models for use on devices with limited computing resources for household item recognition** [14014-22]
- 14014 OJ **Photoelectric characteristics of TiO<sub>2</sub>-based on thin-film solar elements with Ruthenium (II) compounds** [14014-23]
- 14014 OK **Optical and infrared characterization of recycled polyethyleneterephthalate for sustainable photonic applications** [14014-24]
- 14014 OL **Study of geometric and energetic properties of small silver metal clusters using molecular dynamics method** [14014-25]
- 14014 OM **Short-term microwave irradiation effect on specific contact resistance in metal-gap ohmic contacts** [14014-26]
- 14014 ON **Influence of preliminary deformation of substrates on the deformation characteristics of (BiSb)<sub>2</sub>Te<sub>3</sub> films** [14014-27]
- 14014 OO **Synthesis of magnetic nanomaterial CoFe<sub>2</sub>O<sub>4</sub> and study by spectral methods** [14014-28]
- 14014 OP **Synthesis and theoretical study of polyvinyl alcohol gel** [14014-29]
- 14014 OQ **Creation of a sorption photometric method for the determination of heavy metal ions** [14014-30]
- 14014 OR **Study of the coloring properties of the plant *Scutellaria leptosiphon*** [14014-31]
- 14014 OS **The effect of optical signal amplification methods on ion-selective electrodes for the detection of dibazol and pyridoxine** [14014-32]
- 14014 OT **Synthesis and study of quercetin complex with Fe(III) ions by spectral methods** [14014-33]
- 14014 OU **Flavonoid-rich extracts from *Pyrus communis* L. for chemical profiling and optical analysis** [14014-34]
- 14014 OV **Synthesis of photonic-active adsorbents from local minerals** [14014-35]
- 14014 OW **Synthesis of complex-forming N, S-ionite photonic materials** [14014-36]
- 14014 OX **Development of photocatalytic systems for the utilization of industrial gas emissions** [14014-37]
- 14014 OY **Immobilized reagents based on nitrosonaphtholes derivatives for the determination of metal ions** [14014-38]

- 14014 0Z **Reagent activation of activated carbon obtained from wreck walnut shells and textural characteristics** [14014-39]
- 14014 10 **Computational screening of photonic crystals using AI-driven methods** [14014-40]
- 14014 11 **Autonomous AI pipelines for high-throughput optical material screening** [14014-41]
- 14014 12 **Physics-informed neural operators for ultrafast spectroscopy data reconstruction** [14014-42]
- 14014 13 **Reinforcement learning for adaptive optical coating design** [14014-43]
- 14014 14 **AI for accelerated simulations of plasmonic nanostructures** [14014-44]
- 14014 15 **Designing an optimal photonic crystal fabric structure using FDTD and evolutionary algorithms for visible light applications** [14014-45]
- 14014 16 **Real-time monitoring of garment pressure and strain by integrating FBG sensors into knitted fabric** [14014-46]
- 14014 17 **Heart signal analysis based on optical biosensors: integrating AI technology into human health monitoring** [14014-47]
- 14014 18 **AI-driven discovery of high-efficiency perovskite-organic hybrid materials for next-generation photovoltaics** [14014-48]
- 14014 19 **Spiropyran-based photochromic microcapsules as textile dyes: rapid color switching and stability** [14014-49]
- 14014 1A **Harnessing artificial intelligence for the design and discovery of next-generation optical materials** [14014-50]
- 14014 1B **Harnessing deep learning for predicting nonlinear optical responses in 0D and 2D materials** [14014-51]
- 14014 1C **AI-accelerated discovery of transparent conducting oxides for UV-visible applications** [14014-52]
- 14014 1D **Multiscale simulation frameworks for light-matter interaction in AI-designed materials** [14014-53]
- 14014 1E **Explainable AI in computational optics: interpreting material property relationships** [14014-54]
- 14014 1F **Computational design of optical materials for solar energy harvesting** [14014-55]
- 14014 1G **Quantum-inspired AI models for high-precision spectral property prediction** [14014-57]
- 14014 1H **Bayesian optimization of optical materials with tunable bandgaps** [14014-58]

- 14014 1I **Graph neural networks for structure-property prediction in photonic crystals** [14014-59]
- 14014 1J **Inverse design of optical metamaterials using generative neural networks** [14014-60]
- 14014 1K **Metrological research and theoretical foundations for improving the quality of nondestructive testing calibration** [14014-61]
- 14014 1L **Synthesis, modification, and physicochemical properties of carbon quantum dots** [14014-62]
- 14014 1M **Electrophysical properties of surface-treated natural plant fibers** [14014-63]
- 14014 1N **Stability analysis of trajectories in generalized-homogeneous systems and applications to photonic device optimization** [14014-64]
- 14014 1O **Study of the technology for fabrication and electrical characteristics of SnO<sub>2</sub>-based heterojunctions on silicon** [14014-65]
- 14014 1P **Nanophotonic-enhanced solid-state quantum emitters with AI-optimized photon extraction efficiency** [14014-66]
- 14014 1Q **Photocatalytic and catalytic materials for the oxidation of hydrogen sulfide in air purification systems** [14014-67]
- 14014 1R **Electrophysical properties of Pb-enriched PbTe monocrystalline and polycrystalline thin films** [14014-68]
- 14014 1S **Woven textile-based solar cells: engineering wearable photovoltaics by conformal coating of perovskite thin films on ZnO-modified cotton fibers** [14014-69]
- 14014 1T **Superhydrophobic and self-cleaning fabric mimicking the lotus effect: two-layer functional coating based on silver nanoprisms and fluorosilane** [14014-70]
- 14014 1U **Intelligent fabric integrated with CdSe/ZnS quantum dots and NFC antennas for authentication under specific illumination** [14014-72]
- 14014 1V **Luminescent cotton textiles with enhanced wash fastness: Eu<sup>3+</sup> and Tb<sup>3+</sup> doped PVDF nanofibrous mats via electrospinning** [14014-73]
- 14014 1W **Analysis of cotton fiber motion in the confuser mechanism of a rotor spinning machine: an optomechanical approach** [14014-74]
