

PROCEEDINGS OF SPIE

Tenth International Conference on Biomedical Imaging, Signal Processing (ICBSP 2025)

Andrey S. Krylov
Editor

17–19 October 2025
Xiamen, China

Supported by
Xiamen University (China)
Politecnico di Bari (Italy)
Guangxi University (China)
Tiangong University (China)
Guangxi Normal University (China)
Guangzhou University of Chinese Medicine (China)

Volume 14015

Proceedings of SPIE 0277-786X, V. 14015

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Tenth International Conference on Biomedical Imaging, Signal Processing (ICBSP 2025)*, edited by Andrey S. Krylov, Proc. of SPIE 14015, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MEDICAL IMAGE SEGMENTATION AND CLASSIFICATION FOR INTELLIGENT DIAGNOSIS

MetaFormer and efficient multiscale CNN hybrid model for polyp image segmentation
[14015-4]

An end-to-end workflow from automatic segmentation to mixed reality visualization for liver and tumor on LiTS [14015-20]

Classification of noisy histopathology images with Bayesian and ensemble deep learning
[14015-12]

Y-Unet: a multiscale hybrid deep learning framework for deformable registration of cardiac CT images [14015-13]

Research on infiltration classification of GGN-type pulmonary nodules based on multiresolution 3D dual pathway compression excitation network and semisupervised clustering [14015-2]

LOW-LEVEL PROCESSING AND QUANTITATIVE RECONSTRUCTION IN BIOMEDICAL IMAGING

Unraveling collagen-vascular network dynamics in bone healing using radon transform-based in vivo imaging analysis [14015-22]

Multicontrast MRI denoising through optimal transport-based unsupervised learning
[14015-5]

Geometric calibration method for static CT based on global detector ring structure
[14015-21]

High-fidelity fluorescence suppression in Raman spectroscopy using a multilayer perceptron regressor [14015-8]

Accurate cell abundance quantification in cytometry data using multipositive and unlabeled self-learning [14015-1]

INTELLIGENT HEALTH SENSING AND ASSISTIVE TECHNOLOGY

A pilot cross-sectional study on normal-weight overweight among Chinese college students using bioelectrical impedance analysis (BIA) [14015-19]

Development and evaluation of self-regulation electrolarynx based on Mandarin tone characteristics [14015-17]

A data-driven framework for Parkinson's motor subtype identification using 3D pose estimation and deformable graph networks [14015-16]

Research on the gait patterns of visually impaired people using intelligent mobility aids and the impact on walking efficiency [14015-7]

BIOMEDICAL SIGNAL PROCESSING AND CLASSIFICATION

K-means-based decision-level fusion of ECG and MCG for cardiac source imaging [14015-6]

Convolutional neural networks for cardiac abnormality classification using wavelet scalograms of segmented PCG signals [14015-14]

Magnetocardiography-based bundle branch block detection using machine learning methods [14015-3]

RecMap: improving ECG arrhythmia classification using 2D reoccurrence maps and deep learning techniques [14015-15]

MOLECULAR MECHANISMS AND GENE EXPRESSION REGULATION IN DIABETIC BONE INJURY

Mechanistic analysis of abnormal activation of the RANKL-RANK signaling axis in diabetic bone injury [14015-10]

Mechanistic analysis of abnormal key enzymes in the arginine and proline metabolic pathways in diabetic bone injury [14015-11]
