

PROCEEDINGS OF SPIE

International Conference on Remote Sensing and Digital Earth (RSDE 2025)

**Amin Beiranvand Pour
Han Zhai**
Editors

**14–16 November 2025
Dali, China**

Organized by
China University of Mining and Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 14054

Proceedings of SPIE 0277-786X, V. 14054

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing and Digital Earth (RSDE 2025)*, edited by Amin Beiranvand Pour, Han Zhai, Proc. of SPIE 14054, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

REMOTE SENSING INTELLIGENT PROCESSING

- 14054 02 **G-SEED: a spatio-temporal encoding framework for forest and grassland data based on GeoSOT** [14054-16]
- 14054 03 **MLGFN: a multilevel gated fusion network for building extraction** [14054-42]
- 14054 04 **DENet: a dual-encoder network for land use classification** [14054-46]
- 14054 05 **Seasonal change detection network based on spatiotemporal feature alignment** [14054-15]
- 14054 06 **Research on surrounding rock tunnel grade prediction based on time-frequency characteristics of ultrasonic signals and CNN** [14054-13]
- 14054 07 **L-3DCNN, lightweight 3D-CNN for spectral-spatial-elevation fusion: a reproducible baseline for urban land-cover classification** [14054-22]
- 14054 08 **Lightweight and adaptive multimodal fusion network for multisource remote sensing** [14054-5]
- 14054 09 **Research on building semantic segmentation based on convolutional neural network** [14054-21]
- 14054 0A **Learnable positional encoding and adaptive spatiotemporal optimization for marine sensor data fusion** [14054-2]
- 14054 0B **Remote sensing object fusion detection based on multi-attention mechanism and improved yolov8** [14054-37]
- 14054 0C **SDTNet: sensor-difference-aware style transfer network for remote sensing images** [14054-34]
- 14054 0D **Saturation energy restoration technology for infrared point targets** [14054-35]
- 14054 0E **SABNet: a scale-aware building extraction network for high-resolution remote sensing imagery** [14054-41]
- 14054 0F **Relation-aware stock knowledge graph for interpretable urban renewal prioritization and scoring** [14054-19]

- 14054 OG **Filternet-integrated modeling for ionospheric total electron content prediction** [14054-36]
- 14054 OH **An automatic method for contour matching inspection** [14054-24]
- 14054 OI **Benchmarking machine learning models for arctic ozone profile retrieval from MAX-DOAS observations** [14054-10]
- 14054 OJ **Reconstruction of sea surface temperature from Himawari-9 observations using DINCAE** [14054-40]
- 14054 OK **Establishment of the river pattern unit representation model based on rough set rules** [14054-11]

DISASTER AND ENVIRONMENTAL MONITORING

- 14054 OL **Dynamic monitoring of the freezing-thawing parameters in the Qinghai-Tibet plateau from 1950 to 2023 based on ERA5-LAND data** [14054-7]
- 14054 OM **A risk barrier definition analogous to Fermi energy in physics for disaster event analysis** [14054-18]
- 14054 ON **ANALYSIS of dynamic changes in green landscape patterns in Decheng District, Dezhou City, based on NDVI reclassification** [14054-26]
- 14054 OO **A C2M distance-based method for high-precision deformation monitoring of point cloud in coal mine tunnels** [14054-20]
- 14054 OP **Research on ground subsidence monitoring in Changsha city based on time-series insar technology** [14054-23]
- 14054 OQ **Calculation of distorted apparent resistivity values using impedance phase data in the magnetotelluric method** [14054-28]
- 14054 OR **Ecological fire risk assessment based on remote sensing ecological index and machine learning methods** [14054-17]
- 14054 OS **Comparative study on deformation monitoring with POT and MAI techniques based on the LT-1AB satellite: a case study of the Dingri earthquake in Tibet** [14054-44]
- 14054 OT **Analysis of the spatiotemporal characteristics and coupling coordination of the Thress Lives function based on remote sensing in Shaoguan City** [14054-45]
- 14054 OU **Research progress on post-earthquake building collapse detection and buried person assessment based on multisource remote sensing data** [14054-33]
- 14054 OV **Estimation of NPP based on improved CASA model and analysis of its climatic factors in the Three Gorges Reservoir Area** [14054-30]

- 14054 0W **Identifying landslide precursors using multiscale InSAR coherence change detection**
[14054-39]
- 14054 0X **Global land cover mapping at 2-meter resolution** [14054-12]
- 14054 0Y **Spatiotemporal variation of cloud properties using seven-year geostationary observations over China** [14054-14]
- 14054 0Z **Assessment of cultivated land productivity with time-series remote sensing and random forest classification** [14054-4]
- 14054 10 **Rapid wildfire burned-area mapping using fused sentinel-1 SAR and sentinel-2 optical imagery** [14054-3]
- 14054 11 **Landslide susceptibility assessment based on the coupling of information value and machine learning models** [14054-9]
- 14054 12 **Application of UAV remote sensing combined with gravity anomaly model in mine elevation calculation** [14054-29]
- 14054 13 **GeoGNNR: a neural regression framework considering local spatial heterogeneity for landslide susceptibility assessment** [14054-31]
