

PROCEEDINGS OF SPIE

***Fourth International Conference
on Environmental Remote Sensing
and Geographic Information
Technology (ERSGIT 2025)***

Lei Shen
Fei Meng
Editors

17–19 October 2025
Nanjing, China

Organized by
Nanjing University of Information Science and Technology (China)
Jiangsu Ocean University (China)

Published by
SPIE

Volume 14057

Proceedings of SPIE 0277-786X, V. 14057

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Environmental Remote Sensing and Geographic Information Technology (ERSGIT 2025)*, edited by Lei Shen, Fei Meng, Proc. of SPIE 14057, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

- xi *Introduction*

REMOTE SENSING TECHNOLOGIES AND ALGORITHMS

- 14057 02 **Prediction of complex terrain meteorological field based on WRF-LES during cold wave and ice cover periods** [14057-131]
- 14057 03 **Visibility forecast for freezing rain and snow weather based on numerical models and joint machine learning methods** [14057-46]
- 14057 04 **Iterative digital elevation model optimization via ray tracing and multiscale dynamic shape-from-shading reconstruction** [14057-119]
- 14057 05 **Rice yield prediction using UAV-based multispectral remote sensing and random forest machine learning algorithms** [14057-12]
- 14057 06 **A single-station lightning location system designed and implemented based on Raspberry Pi** [14057-146]
- 14057 07 **Spatial-frequency domain-aware network for hyperspectral multiclass change detection with subpixel guidance** [14057-120]
- 14057 08 **Research on road extraction based on high-resolution remote sensing imagery and enhanced UNet2+** [14057-89]
- 14057 09 **Atmospheric weighted average temperature model based on BP neural network** [14057-137]
- 14057 0A **SVM classification-driven correction for spatial distribution errors in remote sensing precipitation and its application** [14057-68]
- 14057 0B **High-resolution simulation of cold waves in southern China in January 2030: temperature and humidity characteristics under two CMIP6 emission scenarios** [14057-47]
- 14057 0C **Automatic ship identification via joint detection and OCR-based hull number recognition** [14057-6]
- 14057 0D **ResNet-FDC: frequency-dynamic collaborative network for mixed-resolution remote sensing scene classification** [14057-28]
- 14057 0E **Near-real-time two-dimensional wave spectrum retrieval from Gaofen-3 wave mode imageries** [14057-108]
- 14057 0F **A prophet-LSTM hybrid model for the network attention prediction of tourist attractions** [14057-143]

- 14057 OG **Research on airborne LiDAR-based technology for analyzing the stability of high-level dangerous rocks** [14057-78]
- 14057 OH **Research on key parameters design of GNSS-R remote sensing constellations for surface anomaly** [14057-122]
- 14057 OI **Density peak-based convolutional neural network method for hyperspectral crop recognition and classification** [14057-30]
- 14057 OJ **Breaking cost barriers: a low-cost multifrequency GNSS system for real-time ionospheric scintillation and TEC monitoring** [14057-32]
- 14057 OK **Real-time onboard vessel detection in WJ-1B satellite panchromatic imagery using deep learning** [14057-79]
- 14057 OL **An LLM-driven agent prototype for automated urban expansion simulation** [14057-81]
- 14057 OM **Analysis of optical path difference in interferometric spectral imaging based on the structure of a static Michelson interferometer** [14057-15]
- 14057 ON **DCANet: dual-stream coupled attention network for hyperspectral unmixing** [14057-44]
- 14057 OO **S²M²-GFA: spectral-spatial multistream Mamba-driven granularity-fusion alignment for cross-domain few-shot image classification** [14057-34]
- 14057 OP **A frequency-aware spatial gating network for denoising DAS-VSP data** [14057-43]
- 14057 OQ **Integrating sub-pixel SIF extraction with a mechanistic model for maize yield estimation in north China** [14057-65]
- 14057 OR **Advances in methane retrieval algorithms using TROPOMI data on Sentinel-5P** [14057-37]
- 14057 OS **Research on WRF wind and temperature forecast error correction methods based on machine learning during cold waves** [14057-48]
- 14057 OT **Transfer learning-based retrieval of cloud base height from FY-4B satellite observations** [14057-20]
- 14057 OU **An extratropical cyclone center location method on satellite images based on transfer learning** [14057-87]
- 14057 OV **Global vegetation resilience prediction model based on stacked machine learning** [14057-127]
- 14057 OW **Quality assessment of ICESat-2 laser altimetry data based on error decomposition** [14057-63]
- 14057 OX **Mid-yolo: an efficient object detection network for remote sensing images** [14057-97]

- 14057 0Y **Rapid and intelligent sugarcane identification: a comparative study of multiple deep learning models** [14057-123]
- 14057 0Z **Differentially private federated learning for remote sensing with gradient inversion attack mitigation** [14057-92]
- 14057 10 **Leveraging self-supervised point cloud pre-training for robust tree species classification in complex forest environments** [14057-24]
- 14057 11 **Exploring semi-supervised learning in building detection: a comparative analysis across diverse environments** [14057-86]
- 14057 12 **A visual enhancement-based image-text multimodal model for high-resolution aerial image scene classification** [14057-98]
- 14057 13 **Design and implementation of an IoT-based intelligent environmental monitoring system** [14057-14]
- 14057 14 **SFMSPGAN: a style synchronization network combined with frequency multiscale pooling** [14057-139]
- 14057 15 **An outlier influence diffusion and interpolation approach based on radioactive geophysical data** [14057-112]
- 14057 16 **Geomagnetic positioning and navigation technology** [14057-144]
- 14057 17 **A point cloud filtering approach for complex valley terrains integrating terrain segmentation and surface compensation** [14057-130]
- 14057 18 **Research on cross-modal fusion building extraction technology based on knowledge distillation** [14057-132]
- 14057 19 **Achieving high-precision cultivated land extraction using an improved SegFormer model** [14057-114]
- 14057 1A **An automated 3D mesh modeling algorithm for coal-seam strata containing complex fault networks** [14057-113]

ENVIRONMENTAL MONITORING AND DISASTERS

- 14057 1B **Identification of relatively poor townships integrating local climate zoning: taking Guangdong province as an example** [14057-64]
- 14057 1C **Multiscale spatiotemporal dynamics of water erosion in the Three Gorges Reservoir area over the past 20 years** [14057-39]
- 14057 1D **Analysis of black soil changes and driving forces via satellite remote sensing** [14057-109]

- 14057 1E **Remote sensing inversion of water quality parameters in urban complex river networks based on the CPO-SVM algorithm** [14057-106]
- 14057 1F **Seasonal variations in drought drivers and assessment in Henan's vegetated regions** [14057-110]
- 14057 1G **Ecological environment quality evaluation and influencing factors analysis of Shenyang metropolitan area** [14057-85]
- 14057 1H **Remote sensing technology in vegetation research: progress and prospects** [14057-107]
- 14057 1I **River ice monitoring in the Yellow River using harmonized Landsat and Sentinel data** [14057-60]
- 14057 1J **Spatiotemporal variations and multiscenario prediction of ecological resilience in the Yangtze River Delta Region, China** [14057-111]
- 14057 1K **Impacts of nighttime artificial light on bird abundance along the Suzhou River: a remote sensing approach** [14057-38]
- 14057 1L **Analysis of spatial and temporal variability of evapotranspiration and its drivers on the Mongolian Plateau** [14057-31]
- 14057 1M **Evaluation and hydrological simulation of different satellite precipitation products in Dadu River Basin** [14057-101]
- 14057 1N **Study on cold wave in Guizhou based on ERA5 remote sensing data and WRF-solar model** [14057-49]
- 14057 1O **Urban air quality assessment based on deep neural network** [14057-96]
- 14057 1P **Research on a high-precision method for seamless spatio-temporal reconstruction of Guangxi surface temperature** [14057-7]
- 14057 1Q **Remote sensing-based road damage recognition using EfficientNet with attention mechanism** [14057-128]
- 14057 1R **A review of methods for interpreting optical remote sensing and InSAR measurements based on disaster identification** [14057-41]
- 14057 1S **Technical optimization of hyperspectral remote sensing inversion for marine red tide disasters and adaptation research of ecological early warning mechanisms under international law** [14057-75]
- 14057 1T **Spatiotemporal patterns of landscape ecological risk at optimal spatial scales in the Nanbei Panjiang River Basin** [14057-5]
- 14057 1U **Spatiotemporal analysis of arctic sea ice area variations using multisource satellite remote sensing data** [14057-71]

- 14057 1V **Investigating 3D ice velocity variations of Rimo Glacier, Karakoram, using multitemporal Sentinel-1 ascending and descending SAR observations** [14057-23]
- 14057 1W **Glacier mass balance estimates over Karakoram range from 2019 to 2024 based on ICESat-2 laser altimetry** [14057-16]
- 14057 1X **Research and application of refined storm surge prediction system for Taizhou coastal based on ADCIRC model** [14057-82]
- 14057 1Y **Prediction and mapping of landslide susceptibility in western mountainous areas of Xingtai City based on multiobjective optimization algorithm** [14057-18]
- 14057 1Z **An intelligent identification and classification method for tidal flat vegetation integrating Relief F and CART** [14057-80]
- 14057 20 **Remote sensing estimation of tree species diversity based on forest class II survey data** [14057-116]

GEOSPATIAL APPLICATIONS AND TECHNOLOGIES IMPLEMENTATION

- 14057 21 **The GIS-based spatial optimization model for high-speed railway location in complex topographic regions** [14057-94]
- 14057 22 **Research on the construction and distribution model of spatiotemporal database of medicinal plant resources based on GIS technology** [14057-105]
- 14057 23 **Reconstructing the land use changes in Shapingba District, Chongqing City using remote sensing images** [14057-67]
- 14057 24 **A cross-section measurement method for UHV projects based on airborne LiDAR point clouds** [14057-4]
- 14057 25 **Off-road path planning based on TIN with cross-node connection** [14057-69]
- 14057 26 **Subsidence monitoring and analysis in Wuhan main urban area based on improved IPTA method using time-series InSAR** [14057-52]
- 14057 27 **Extraction and application of rock and mineral information in the Kunlun River area of Qinghai Province based on ZY1-02D hyperspectral data** [14057-103]
- 14057 28 **Land use simulation in the Inner Mongolia section of the Yellow River Basin based on CA-Markov model** [14057-26]
- 14057 29 **Prediction of land use change in Chinese Tianshan Mountain Region under water resource constraints** [14057-42]
- 14057 2A **Analysis of spatial-temporal variation and multiscenario simulation of land use in Chongqing based on MOP-MCCA model** [14057-21]

- 14057 2B **Automatic path planning for low-altitude aircraft based on geological hazard data** [14057-77]
- 14057 2C **Building extraction from MA-LiDAR with spatial-spectral synchronization constraints** [14057-10]
- 14057 2D **Research on urban village identification methods based on multisource spatial data** [14057-25]
- 14057 2E **Application of UAV in engineering field** [14057-90]
- 14057 2F **Parcel boundary detection based on gradient-based feature from UAV images** [14057-121]
- 14057 2G **Urban building footprint and height extraction for enhanced urban analytics** [14057-53]
- 14057 2H **Spatial inference of soil mechanical properties based on mechanical feature similarity** [14057-61]
- 14057 2I **Automated building 3D reconstruction from high-resolution satellite remote sensing data** [14057-70]
- 14057 2J **Road recognition and extraction from high-resolution remote sensing images based on deep learning** [14057-40]
- 14057 2K **UAV-based supervision methodology for water diversion projects with monitoring points serving as image control points-taking the Jiaodong Yellow River water diversion project as an example** [14057-9]
- 14057 2L **An exploratory study on spatial quality based on multisource street data** [14057-145]
- 14057 2M **3D building mesh simplification based on structure perception** [14057-141]
- 14057 2N **Research on ambient rendering method of digital terrain** [14057-93]
- 14057 2O **Mapping production-living-ecological spaces with POI data: spatiotemporal evolution in urban Lanzhou** [14057-136]
- 14057 2P **Research on the construction of evaluation index system for health town in Bikou Town from the perspective of cultural gene genealogy** [14057-134]
- 14057 2Q **Analysis on spatial pattern and influencing factors of medical and related facilities in Baoji City** [14057-118]
