PROCEEDINGS OF SPIE

# *International Conference on Optical and Terahertz Communications and Future Networks (OTCN 2025)*

**Caiming Sun**
*Editor*

**26–28 September 2025**
**Tokyo, Japan**

*Organized by*
Korea Advanced Institute of Science and Technology (Korea, Republic of)
Xi'an Jiaotong University (China)
The University of Sydney (Australia)
Sun Yat-sen University (China)
The Chinese University of Hong Kong, Shenzhen (Hong Kong, China)

*Published by*
SPIE

**Volume 14063**

Proceedings of SPIE 0277-786X, V. 14063

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Optical and Terahertz Communications and Future Networks (OTCN 2025)*, edited by Caiming Sun, Proc. of SPIE 14063, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*
vii *Introduction*

**INTERNATIONAL CONFERENCE ON OPTICAL AND TERAHERTZ COMMUNICATIONS AND FUTURE NETWORKS (OTCN 2025)**

14063 02 **Benchmarking the radiation and efficiency of seawater antennas compared to copper structures based on conductivity effectiveness: a modelling analysis in VHF band** [14063-2]

14063 03 **Dynamic evaluation on microgrids operation model and benefit realization through optimized RBFNN** [14063-6]

14063 04 **Enhancing resilience in drone-based emergency mesh networks with an integrated tracking algorithm** [14063-7]

14063 05 **Solid-state multi-user terahertz communication system and networking performance** [14063-8]

14063 06 **Sensitivity of image-preprocessing filters in LSPIV/STIV: impacts on velocity accuracy from laboratory to river conditions** [14063-5]

14063 07 **Active antennas in focus: a systematic review of technologies, performance, and limitations in comparison to passive antennas** [14063-4]

14063 08 **A transformer autoencoder-based anomaly detection system for intra-vehicular networks** [14063-9]

14063 09 **Rectifier antenna for wireless solar power transmission: efficiency analysis across multiple frequency bands** [14063-3]
