Contents

Advanced technologies

Advances in vibration monitoring of mining equipment with deep machine learning methods <i>C Aldrich and X Liu</i>	3
Comparative analysis of underground geological mapping – traditional methods versus LiDAR scanning with Apple devices and survey-grade laser scanners <i>C Birch, H Grobler and A Olivier</i>	13
Discrete events simulation approach to investigating the impact of electrifying haul trucks – a case study <i>T Chimbwanda, A Anani and N Risso</i>	35
Enhancing pit optimisation with direct block scheduling (DBS) and the Bienenstock Zuckerberg (BZ) algorithm – maximising NPV and efficiency <i>J Chung and D Rahal</i>	47
From static models to dynamic solutions – the future of resource modelling <i>H Dillon and J Mackenzie</i>	63
Improving underground mobile mechanised mining productivity with safety in mind <i>C Domoney</i>	73
Breaking down silos – enhancing mining operations through Agile collaboration and data-driven decision-making <i>Elisa and D Farascarina</i>	83
Fuel efficiency optimisation of HD785–7 trucks at open pit coalmine – an adaptive, clustering-based approach <i>A H M Fadhil, S Andika and M R Pratama</i>	101
Deep learning for predicting hauling fleet production capacity under uncertainties in open pit mines using real and simulated data <i>N Guerin, M Nakhla, A Dehoux and J L Loyer</i>	109
Advanced PGNAA Analysers – leveraging machine learning for improved precision in iron making <i>H Gu and Y Strutz</i>	125
Transforming mining optimisation – from hours to minutes with massively parallel serverless processing <i>A J Heggart</i>	137
Optimising truck fleet selection and sizing in open pit mining using simulation – analysing sustainability impacts of fleet configuration and truck failures <i>M Kazemi, A Moradi, J Doucette and H Askari-Nasab</i>	143
Monitoring-based optimisation of horizontal transport in underground mines using machine learning and data integration from NGIMU sensors <i>W Koperska, P Stefaniak, A Skoczylas and M Stachowiak</i>	163

A review of artificial intelligence applications in monitoring slope stability for open pit mines <i>M C I Madahana and J E D Ekoru</i>	173
Ground vibration prediction using a machine learning approach <i>M C I Madahana and J E D Ekoru</i>	187
Using digital twin for production scheduling problems – functions used in mining operations <i>E Moosavi and K Tolouei</i>	203
A novel way to view mining operations <i>P Muston, L Fisher, O Siraj, N Kashyap and P Mitchell</i>	209
Accelerating fleet electrification in mining to meet ESG targets – a simulation and operational analysis approach <i>A Naik, D Kumar, K Chhabra and A Kale</i>	219
Triggering a PLC change using a cloud-based machine learning model <i>C Nethercott</i>	229
Real-time detection of perimeter breaches using high-precision GPS for enhanced safety in high-risk dumping zones in open pit mining <i>M R Pratama, S Widodo and K P Adiprima</i>	235
Enhancing mining operations with digital twin technology through an integrated multi-brand software approach <i>V Rais</i>	247
Automated classification of blast-induced rock fragmentation in underground sublevel caving mine <i>S Rajpurohit, A Gustafson, M Tariq, I Marin Rodriguez, C Quinteiro and H Schunnesson</i>	253
Applying artificial intelligence and the cloud to optimise blast designs <i>M J Roberts</i>	265
Beyond grade – evolution of automation to provide timely information from blastholes in open cut operations <i>E Schnetzler, J Jackson, N Battalgaży and F Blaine</i>	275
A robust approach for digital mapping of rock masses with a stereo camera <i>M Shabanimashcool</i>	287
Real-time monitoring and machine tracking in large-scale underground mines using safety systems and machine learning techniques <i>A Skoczylas, W Koperska, P Stefaniak and P Śliwiński</i>	295
Optimisation of mining machinery maintenance in modern mining enterprises through text mining and machine learning techniques <i>M Stachowiak, W Koperska, P Stefaniak and P Śliwiński</i>	305
Fuel consumption reduction in HD785-7 dump trucks at an open cut coal mining site – a data-driven approach <i>M Sukma, I Maulana and T Yanto</i>	315
Safety berm design – moving beyond rules of thumb <i>K Thoeni</i>	321

LLM-Nav agent – adaptive ground robot navigation using large language model-based AI agents <i>T E Vhurumuku, C Kuchwa-Dube and P Leeuw</i>	329
Operator behaviour learning to optimise HD785 productivity by adopting modified game theory algorithm <i>P Vorenza and M Hajjrol Dava</i>	339
Multiphysics modelling of in-place recovery of copper at stope-scale <i>Z Wang, C Xu and P Dowd</i>	353
Structurally controlled slope stability study using genetic algorithm <i>G You</i>	363
Study on the influence of surfactants on the wettability of coal dust based on molecular dynamics simulation <i>Y Zhang, L Yuan, T Ren and J Roberts</i>	375
Optimising drill hole spacing using conditional simulation at the Invincible Gold Mine, Australia <i>S Zutah and W Assibey-Bonsu</i>	387
 Exploration and geology	
Advanced multivariable geological modelling – case study of orogenic Au deposit with multi-generational quartz veins <i>M Aliaga and M Moore-Roth</i>	401
Resource estimation of roll front uranium deposits by using traditional and machine learning methods for Nichols Ranch uranium deposit in Wyoming, USA <i>A Aydar and K Dagdelen</i>	421
Adaptive search ellipsoid – a new practical algorithm for local anisotropies in mineral resource estimation <i>A Aydar and K Dagdelen</i>	437
Geometallurgical clusters creation in a niobium deposit using Dsclus and hierarchical indicator kriging with trend <i>J F C L Costa, F G F Niquini, C L Schneider, R M Alcantara and L N Capponi</i>	453
AI-driven spatial data augmentation for geological modelling and resource estimation <i>A Gole and S Sullivan</i>	463
Leveraging machine learning for fast and reliable faulted 3D modelling <i>A Gole and S Sullivan</i>	473
Enhanced resource domain classification for mineral estimation using geostatistical clustering <i>J Gonzalez, M Liang and I Buitrago</i>	481
Dynamic structural modelling for near real time inputs for geotechnical risk management and optimisation <i>A Jani</i>	485
Resource estimation in domains with soft boundaries <i>M Liang</i>	487

Circular economy in iron ore mining – least squares approach to kaolinite estimation of argillaceous waste material	497
<i>L J Oliveira, D T Ribeiro, E K Ferreira and L F B Brito</i>	
Models with locally variable spatial continuity using covariance tables	507
<i>R A Vincenzi, J F C L Costa, M A Bassani and V C Koppe</i>	

Investment and risk management

Application of fault tree analysis in mining – a review of strategies and advances for risk assessment	523
<i>M Avilés, A Hekmat and I Arroqui</i>	
MAFMINE 3.1 – integrating cost estimation and ESG constraints for enhanced preliminary economic assessment in mining	533
<i>C O Petter, U V Pinheiro, J F G Timm, R F D'Arrigo, F A C Cardozo, H Campos, J P Z Oppermann, W M Ambrós and R A Petter</i>	

Mine planning and operations

Application of causal machine learning in mitigating ore dilution for maximum return in mining	547
<i>G Asamoah, J Liu and R K Asamoah</i>	
Controlling ore dilution in mining using causality to establish variable relationship	557
<i>G Asamoah, J Liu and R K Asamoah</i>	
Analysis of alternatives to the use of diesel fuel in mining trucks	563
<i>D Canullan, A Anani and S O Adewuyi</i>	
Strategic planning and sequencing optimisation for fully mobile in-pit crushing and conveying (FMIPCC) systems – a novel approach	571
<i>Y Y Cheng, M Nehring, M Forbes, M S Kizil and P Knights</i>	
Reconfiguring the techno-economic-environmental landscape for low-grade ore extraction – a strategic analysis of stope leaching systems	587
<i>M Gadiile, I Onederra, M S Kizil and M Nehring</i>	
A systematic review of cut-off grade optimisation approaches – application benefits and challenges	603
<i>J Githiria, C Musingwini and B Mutandwa</i>	
Haulage simulation of open pit mines with ore and waste IPCC	621
<i>N A Habib, E Ben-Awuah and H Askari-Nasab</i>	
Mining project risk analysis of the impact of schedule types of open pit mining on mine value	643
<i>R Halatchev, D Gabeva and A Halatchev</i>	
Comparison of stochastic versus deterministic open pit mine production schedule optimisation using mixed integer linear programming with conditional orebody simulations	663
<i>S F Hoerger and K Dagdelen</i>	
Optimising in-pit crushing and conveying systems for cost-effective open pit mine scheduling – a sensitivity analysis on material throughput and haulage costs	685
<i>A Kamrani, H Askari-Nasab and Y Pourrahimian</i>	

Representative measurement using high performance PGNAA to digitalise process feed quality <i>H Kurth and A Brodie</i>	697
A comparison of methods for determining weights of criteria in multi-criteria decision-making problems in mine planning <i>M J Mahase, T Tholana, C Musingwini and B Mutandwa</i>	705
Integrating operational design and data analytics to maximise shovel performance in an open cut coalmine <i>L C Maia, R L Peroni, J L V Mariz, B T Kuckartz and A F Machado</i>	723
Semi-automated fracture characterisation to optimise dimension stone mining <i>G R S Maior, R L Peroni, J L V Mariz, J T Zagôto, D Vale and B T Kuckartz</i>	733
Optimisation of cut-off grade in open pit mines considering spatial and temporal dimensions – a case study <i>F Manríquez, M Valdivia, F Pérez and R Montecinos</i>	743
Mineral processing plant capacity based on geometallurgical block model scheduling <i>D B Mazzinghy, N Morales, A Brickey, G Nelis, J Ortiz and M J F Souza</i>	755
Multi-criteria selection of a travelling way development method at a case study conventional underground platinum mine <i>B Meyer, C Musingwini and T Tholana</i>	771
Towards a system for integrating open pit mine production scheduling stages <i>P Muke, T Tholana, C Musingwini, M Ali and B Mutandwa</i>	789
Operational design of ramps in open pit mines considering switchbacks through the assistance of mathematical optimisation – a case study <i>P Nancel-Penard, F Manríquez, R Figueroa, M Lobos and M Núñez</i>	811
Short-term grade uncertainty and its impact on operational dig-limit definitions <i>G Nelis, C Aguilera, A Campos and N Morales</i>	821
AMC's Hill of Value® – modelling sequential decisions to transfer strategy optimisation into an operational mine plan <i>T M Pelech and F Grobler</i>	833
Analysing the haul road design from the simulation perspective – theoretical and real improvements <i>R L Peroni, J L V Mariz, E G O Neto, D J Souza and A Moradi Afrapoli</i>	847
A mathematical model for production scheduling from uncertain resources to run-of-mine stockpiles and processing plant in the sub-level caving method <i>J Qu, C Xu and P Dowd</i>	859
Advancing long-term open pit mine planning with quantum computing – concepts, reformulations and implementation <i>A Quelopana, B Keith and J Canales</i>	877
Mine operations management – the path to digital connected mining operations <i>S Rahangdale and K Chhabra</i>	891
Dynamic on-bench loading location optimisation of explosive trucks for short-term mine planning <i>M Samaei, R Shirani Faradonbeh, P Klaric and R Suhane</i>	897

A robust scheduling framework for short-term planning of underground mining operations using constraint programming – a Canadian case study <i>R Shahin, M Gamache and G Pesant</i>	907
Geotechnology applied to quality control in bauxite mining in Brazil <i>I Soares, R Radtke, A Pina, K Gomes, B Gomes and S Farias</i>	927
Development of a simulation-integrated mine road quality index (MRQI) for efficient dispatching operations in surface mines <i>S N Topal, A Elshahawy and O Gölbaşı</i>	937
Towards responsible mining – ESG-integrated multi-objective optimisation in sublevel stoping production scheduling <i>W Ullah, M Nehring, M S Kizil and P Knights</i>	955
Fleet management system in PT Indo Muro Kencana <i>H Utama, H T Wibowo and L Silitonga</i>	977
Spatial data management system applied to the stability of underground excavations <i>F Vardanega, R L Peroni, J L V Mariz and B T Kuckartz</i>	991
Remote monitoring of slurry pumps in mining and mineral processing – enhancing reliability and performance through digitalisation <i>A Varghese, J Xiang, P Mikkonen, E Lessing, G M Hassan and A Karrech</i>	1005
Incorporating materials supply in strategic mine planning <i>D K Walker, E Y Baafi and S Kiridena</i>	1015
Separation of fine-grained rutile and zircon by flotation – a study of sensitive flotation chemistry with considerations for operational circuits <i>G Wren and G Senanayake</i>	1023
Digital twins for stockyard reclamation optimisation <i>S Zhao, T F Lu, L Statsenko, H Assimi and C Garcia</i>	1037
Sustainable practices	
Modelling blasting vibration in sustainable mine planning using machine learning techniques – a case study <i>M Aghdamigargari, S Avane, A Anani and S O Adewuyi</i>	1047
Reducing a quarry's greenhouse gas emissions through air deck implementation <i>R Heryadi, H Utama and L Aprisko</i>	1053
The effect of social license on the exploitation of mines using machine learning algorithm <i>S Kohanpour, E Moosavi and M Zakeri Niri</i>	1063
Haul truck intelligence system for effective decarbonisation <i>P McBride and A Soofastaei</i>	1073
