Contents

Submissions

Development of a lithium zero-waste flow sheet – flotation based approach 1
D Arteaga, S Luukkanen and M Vera

Automated characterisation and assessment for critical raw materials processing 3
D Ataide Salvador, M Jooshaki, M Markkanen, R Kallio, K Kärenlampi and T Kauppila

Obtaining rare earth element concentrates from Estonian phosphate rock via hydrochloric acid processing 5
R S Azeez, K Tõnsuaadu, M Einard, T Kaljuvee and A Trikkel

Adding downstream value to Australian tungsten concentrates 7
C Baker, E Ho and C Griffith

Defining regolith-hosted REE deposits using multivariate whole-rock geochemistry 9
T G Bamforth, H M Lampinen, L Lynham, N Reid, R Thorne, M Iglesias-Martinez, J Brugger, B Cribb, B Hazelden and F Xia

Genesis and resource quality of contact-metamorphic flake graphite deposits – insights from the Leliyn Graphite Deposit, Northern Territory 11
R J Baumgartner and B Pejcic

Multiscale mineralogy of clay-hosted REE deposits in Western Australia – practical applications for exploration, domaining and resource modelling 13
G V Berni, H M Lampinen, R Fan, M Verrall, N Reid, R Thorne, M Iglesias-Martinez, C Spaggiari, Y Teitler, A J Miles and M Pearce

Experimental insights into the mechanisms of florencite formation in rare earth element deposits 15
T Bezerra Lima, F Xia, T G Bamforth, H C Oskierski and Y Mei

Li and RE hydro-met solid liquid separation processes and combinations 17
G Bickert and A P Mueller

Wastewater treatment with LieNA® processed calcium silicate by-products 19
S Biswas, A N Nikoloski, S Wilson and A Napier

Critical minerals in all solid-state lithium-ion batteries – a path to sustainable and efficient energy storage 21
P M Bodhankar, M Patro, S Sau, N Haque, D Dhawale and S Mitra

Jupiter rising – unearthing Australia's largest clay-hosted REE deposit 23
N K Bonnici, S R Owen, R Naithani and A F Martin

Prospectivity analysis of critical mineral systems in Western Australia and the Mineral Systems Atlas 33
N H Bowman, P Duuring, L Grech, S Morin-Ka and W R Ormsby

Critical Minerals Group Lindfield Project case study – geology, exploration and vanadium resources 35
A Buck, P Kelly and S Winter

Nature as an asset – accounting for nature in the closure process 37
D Campbell, C Hayes and S Borgas

Lessons learned from graphite projects with beneficiation and purification 39
D Connelly

Comparative analysis of narrower lamella spacing on performance of the reflux classifier – pilot and full scale results 41
E Craig, B Bosch, A Vyas and A Gilbert

Quantifying spodumene and classifying pegmatite using core photography – how, why, and its use in resource estimation 49
L D'Andrea and C Brown

Frankenstein's and fairy tales – accelerating discovery to delivery 57
G Deans

Critical minerals from mine waste – aiming for a zero waste mine 59
H S Degeling, E Tan and J Sweet

Texture and compositional zoning in pegmatitic mineral assemblages from Pilgangoora deposits – Pilbara Region, Western Australia 61
R Didonna, C Laukamp, M Verrall and S Caruso

ESG due diligence in a volatile market – aligning global standards with business objectives and lender expectations 63
D Dowdell

The importance of proved material in industrial mineral ore reserves – a case study of the Epanko Graphite Project, Tanzania 65
D Drabble, D Williams, S Khamoud and A Spinks

Unlocking the potential of tailings through geometallurgical approaches for sustainable critical mineral recovery 73
M B Fathi and A Escolme

Characterisation of antimony and tungsten minerals using ECORE – an application of automated mineralogy on a series of drill cores from Hillgrove Gold Antimony Project 75
A Fayad

Deep sea mining – navigating the risks and opportunities of new frontiers for critical minerals 77
J Feldman and L Koch

Processing routes for the critical raw materials recovery from lithium hard rock deposits 79
L O Filippov and I V Filippova

Decision-making under uncertainty for the strategic implementation and development of the US graphite supply chain 81
G A Forbes, M M Arief, J Kloeckner, D Z Yin and J K Caers

Ultrafine recovery and concentration of tungsten using a modified reflux classifier known as the Grade Pro 83
K P Galvin, J Zhou, K McCaffery and M Zegveld

Germanium by-production from Australian zinc refining – challenges and opportunities 85
J W Gebhardt, M Page and C Griffith

Geometallurgical evaluation of a tailings storage facility to address environmental concerns and maximise the extraction of contained resources 87
P Gutzmer, K Bachmann, R Tolosana-Delgado, L Tusa, C Contreras, P Büttner and J Gutzmer

Regenerating nature – mining's natural contribution to a circular economy 89
C Hayes, J O'Brien and O Mackay

A first principles-based approach to evaluating the environmental performance of nickel and cobalt materials production for the battery supply chain 91
Z J Hearne

Data integration of hyperspectral and whole-rock geochemistry – new insights into Mt Weld carbonatite-hosted REE deposit 93
S Hu, C Laukamp, R Chandler, N Goswami, B Pejcic and M Wawryk

Characterisation of lithium pegmatites in the Ajmer Region, Rajasthan – an integrated geochemical, mineralogical, and isotopic approach 95
M Iglesias-Martinez, R Manton, L Schoneveld, R Wang and E Ramanaidou

Harnessing the true value of critical minerals – West Australian production of cathode materials 97
M Jackson, N Chapman, N Gaebipanah, K Moyes-Martin, K R Barnard, T Tang and M Dixon

Securing graphite for the energy transition – insights from India–Australia resource and recycling strategies 99
A Jena and C R Borra

Integrated water management in critical mineral mining – the role of digital innovation in sustainability and efficiency 101
E Kashi

Trusted minerals – a vision and roadmap for provenance and traceability in critical minerals supply chains 103
G Kennedy and J Lee

KIGAM's technological approach to strengthening the resilience and sustainability of the lithium value chain – upgrading low-grade mineral resources and recycling spent li-ion batteries 105
S Kim, J-R Han, H Kim and K H Kim

By-products – maximising Australia's hidden critical mineral potential 107
C J Kucka, P T Main, C A Stuart and M G Sexton

Mineralogical insights for antimony-gold flow sheet development – Hillgrove Project 109
J Li

Advancing sustainable lithium metal production – LithSonic™ 111
D Liu, D Freeman, W J Bruckard and T Barton

Unlocking Australia's unique opportunity in critical minerals while navigating uncertainties in geopolitics and the global economy 113
A Lomas and M Upcroft

Selective flotation of fine spodumene with anionic polyacrylamide flocculant and calcium activator 115
D Luo, W Sung Ng and G V Franks

Processing and refining – does Australia have what it takes to compete? 117
N Mackay

Addressing Western Australia's critical minerals – opportunities, bottlenecks, and perspectives 119
A Mammadli, P A Opoku, A Ibrahim, C Wessels, G Barakos and N Roocke

Comparative study of kaolin – acid routes to produce high purity alumina (HPA) 139
G Mawire, D H P Souza, A Polenio, T Tacchetto, A Costine and R McDonald

Pioneering sustainable industrial transformation – developing a critical minerals technology hub at Masan High-Tech's Nui Phao operations in Northern Vietnam 141
A McAleese, M Glover, J Do, P Nguyen Hai, S Arnold, C Bain, T Nguyen Anh and T Sheedy

Critical minerals for hydrogen technologies – just transitions perspectives in the Indo-Pacific 143
B C McLellan

Demands of critical minerals and energy – effects and limitations of moving towards the fifth industrial revolution 145
Y Mgema and P Dikson

A lot is not enough – critical metals deportment in complex secondary raw materials 147
R Moeckel, A Renno, D Ebert, K Bachmann, J Krause and J Gutzmer

Machine learning landscape mapping and anomaly detection for the exploration of critical metals 149
R Noble, A Henne, D Cole, M Williams, J Hille and S Bradley

Green engineering approach to screening leaching processes for critical metals 151
J G Outram, S J Couperthwaite and M J McCann

Recovery of rare earth elements from goethite-rich monazite tailings via soda roasting and deep eutectic solvent leaching 153
Y Park, D C Nababan, W J Bruckard, M I Pownceby and S Lee

Strategic ligand design for Nd/Dy separation from coal fly ash leachates 155
A Pati, S Subramanian, G S Gupta, R K Jyothi and N Haque

Securing innovation – navigating IP challenges and opportunities in new critical minerals technologies 157
B Peachey

Critical minerals challenges for accelerating the UK's green economy 159
C Pettit, F Wall, P Foster and E Marquis

Thermodynamic analysis and extraction of copper and cobalt from smelting slag 161
T Phiri, P Singh and A N Nikoloski

Mineralogical domaining for resource characterisation 163
R Pohrib, R Finch, M Baudin and G Merello

A room temperature leaching process for treating lithium-ion battery waste – advances and industrial potential 187
R Qadir, W J Bruckard and M Chen

Critical mineral and commodity recovery from e-waste 189
A Roper

Corrosion prevention of lithium-ion battery poles in NaCl solutions to develop safe and environmentally sustainable discharging process for improved recyclability 191
H Sahivirta, A Santasalo-Aarnio and R Serna-Guerrero

Critical minerals – a very Australian overview 193
A Sarwar

Analysis of lithium-bearing minerals in pegmatites – tools and traps 195
L Schoneveld, M Iglesias-Martinez, M Verrall, R Wang, H M Lampinen, C M MacRae and E Ramanaidou

Real-time data integration across levels 0–3: a scalable framework for critical minerals 197
N Shaik and D Vassallo

Improved copper recovery from low-grade chalcopyrite ore 199
R W Shaw and R J Shaw

Selective recovery of rare earth elements from NdFeB magnet using a deep eutectic solvent 201
J Shree, S K Sarker, W J Bruckard, V Jegatheesan, N Haque and B K Pramanik

Bridging the gap between feasibility studies and operational outcomes – process risk mitigation in lithium and critical mineral concentrator projects 203
R Simmons and L Ryan

Red mud waste as a resource for critical minerals – a review 205
S Singh, A K Verma, M Singh, T N Singh, W J Bruckard and N Haque

Minas Gerais, Brazil – the global hub for critical minerals value chain 207
A B Sullato, H T M Soares and E P Martins

Methods for the characterisation of high-purity alumina 209
T Tacchetto, M Woltering, L Schoneveld, C Sheedy, C McCauley, N Webster, M Pearce, D Holanda Pereira de Souza, A Costine, G Mawire, Z Quadir, D Saxey and D Fougerouse

Metso alkaline leach processes for lithium chemicals production 211
M Tiihonen

Transition metal based cathode for electrochemical recovery of lithium from aqueous brine 213
A K Tripathi, R Amal and R Daiyan

Navigating the geopolitics and economics of critical minerals in a fractured global supply chain 215
V Vivoda

A national-scale assessment of clay-hosted rare earth element mineral system potential in Australia 217
J Walsh, A McPherson, E Oborski, A Senior, J Cloutier and A Ford

Advancing lithium exploration with laser-induced breakdown spectroscopy (LIBS) – a rapid and cost-effective approach 219
R Wang, A Bath and E Ramanaidou

Beyond the baseline – ESG priorities to support capability uplift across the Queensland critical minerals industry 221
N Wolfe, M Curcija and C Pushpamali

Opportunities and threats for critical minerals exploitation in Australia – an analysis using patent data 223
R Wulff, R Moore and N Amitay

The quantitative measurement of lithium in hard rock ores using nuclear magnetic resonance 225
R Yong and A Curtain

Clean and efficient tungsten extraction via direct solvent extraction in alkaline medium 227
L Zeng and K R Barnard

A circular system for metals and critical raw materials 229
A Zsakay

Author index 231
